4. Troubleshooting

If you encounter any issues with your futon sofa bed, please refer to the following common solutions.

- **Sofa feels unstable:** Ensure all five metal legs are securely tightened. Check that the armrests are fully engaged with the seat base.
- **Backrest not adjusting smoothly:** Verify that no obstructions are preventing the mechanism from moving freely. Apply gentle, even pressure when adjusting.

- **Squeaking noises:** Check all connection points and tighten any loose screws. Lubrication may be applied to moving parts if necessary, using a silicone-based lubricant.
- **Upholstery appears flattened:** Regular fluffing of cushions and pillows can help restore their shape. Rotate seating areas if possible to distribute wear evenly.
