Operating the Pull-Back Car

The COGO 3430 Racing Car features a pull-back mechanism for dynamic play:

1. **Place on a Flat Surface:** Position the assembled racing car on a smooth, flat surface.
2. **Pull Back:** Gently pull the car backward along the surface. You will feel resistance as the internal mechanism winds up.
3. **Release:** Release the car. It will propel forward on its own.

Ensure the wheels are free from obstructions for optimal performance.

Maintenance and Care

- **Cleaning:** To clean the building blocks, wipe them with a damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** Store the blocks in a dry, cool place away from direct sunlight to prevent material degradation.
- **Handling:** Handle the assembled model with care to prevent pieces from detaching.

Troubleshooting

- **Missing Pieces:** If you find any pieces missing, carefully re-check the packaging and surrounding area. If still missing, contact the retailer or manufacturer for assistance.
- **Difficulty Connecting Pieces:** Ensure pieces are aligned correctly. Apply gentle, even pressure. Do not force pieces together, as this may cause damage.
- **Pull-Back Mechanism Not Working:** Check that the wheels are properly attached and can spin freely. Ensure no debris is obstructing the mechanism.
