Afloia KILO

Afloia Air Purifier Model KILO User Manual

Model: KILO

1. INTRODUCTION

Thank you for choosing the Afloia Air Purifier Model KILO. This user manual provides important information on how to set up, operate, and maintain your air purifier to ensure optimal performance and longevity. Please read this manual thoroughly before using the product and keep it for future reference.

The Afloia KILO Air Purifier is designed to improve indoor air quality by effectively removing various airborne pollutants. Equipped with an advanced H13 HEPA filtration system, it captures 99.99% of dust, pollen, smoke, pet dander, and odors, providing a cleaner and healthier environment for you and your family.

2. SAFETY INSTRUCTIONS

To reduce the risk of electric shock, fire, or injury, please read all instructions before using the air purifier.

- Always place the air purifier on a firm, level surface.
- Do not immerse the unit in water or other liquids.
- Keep the power cord away from heated surfaces.
- Do not operate the unit if the cord or plug is damaged.
- Unplug the air purifier before cleaning or performing any maintenance.

- Do not block air inlets or outlets.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

3. PRODUCT OVERVIEW

The Afoia KILO Air Purifier features a multi-layer filtration system designed to capture various airborne particles and odors. Understanding its components will help you with setup and maintenance.

3.1 Components

- **Control Panel:** Located on the top of the unit, for power, mode, timer, and light control.
- **Air Inlet:** Located around the lower part of the unit, where air is drawn in.
- **Air Outlet:** Located on the top of the unit, where purified air is released.
- **Filter Compartment:** Located at the bottom, housing the multi-layer filter.
- **Power Cord:** For connecting the unit to an electrical outlet.

Purify Large Room Up to 1076 Ft²

Take **30 minutes** to purify a **538 ft²** room

CADR
140m³/h

4. SETUP

Follow these steps to set up your Afloia Air Purifier for the first time.

4.1 Unpacking

1. Carefully remove the air purifier from its packaging.
2. Remove all packaging materials, including any plastic bags or protective foam.
3. Check the unit for any signs of damage. If damaged, contact customer support.

4.2 Filter Installation

The filter comes pre-installed but may be wrapped in plastic for protection. Remove the plastic before use.

1. Turn the air purifier upside down.
2. Twist the filter cover counter-clockwise to unlock and remove it.
3. Take out the filter assembly. If it's new, remove any plastic packaging from the filter.
4. Insert the filter back into the unit, ensuring it is seated correctly.
5. Replace the filter cover and twist clockwise to lock it securely.

4.3 Placement

For optimal performance, place the air purifier in a location with good air circulation.

- Place the unit on a flat, stable surface.
- Ensure there is at least 15 cm (6 inches) of space around all sides of the unit for proper airflow.
- Avoid placing the unit near heat sources, direct sunlight, or in damp environments.

5. OPERATING INSTRUCTIONS

Learn how to use the various functions of your Afloia Air Purifier.

5.1 Power On/Off

- Plug the power cord into a suitable electrical outlet.
- Press the **Power Button** (*symbol: circle with vertical line*) on the control panel to turn the unit on or off.

5.2 Fan Speed / Mode Selection

The air purifier offers three fan speed modes: High, Mid, and Sleep.

- Press the **Fan Speed Button** (*symbol: fan blades*) repeatedly to cycle through the modes: High > Mid > Sleep.
- In **Sleep Mode**, the unit operates at its lowest noise level (22dB) and all indicator lights turn off to ensure undisturbed sleep.

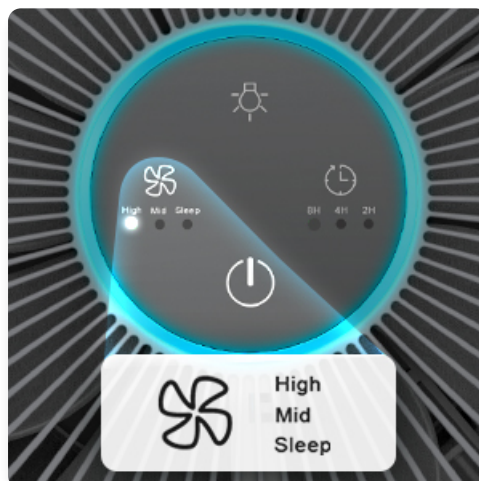

Image 5.1: Fan Speed Control. This image highlights the fan speed button on the control panel, indicating the options for High, Mid, and Sleep modes.

Wake Up Refreshed

Image 5.2: Sleep Mode Operation. The air purifier is shown in a bedroom, emphasizing its quiet operation at 22dB in sleep mode, ideal for nighttime use, along with the timer function.

5.3 Timer Function

Set the air purifier to operate for a specific duration (2, 4, or 8 hours) before automatically turning off.

- Press the **Timer Button** (symbol: clock with arrow) repeatedly to select the desired operating time: 2H > 4H > 8H.
- The corresponding indicator light will illuminate.
- To cancel the timer, press the button until no timer indicator light is on.

Image 5.3: Timer Settings. This image focuses on the timer button on the control panel, showing the options for setting the purifier to run for 2, 4, or 8 hours.

5.4 Night Light Function

The air purifier features a 7-color night light for added ambiance.

- Press the **Light Button** (*symbol: light bulb*) to turn the night light on.
- Press again to cycle through the 7 colors or to set it to automatically cycle through colors.
- Press a third time to turn the night light off.

6. MAINTENANCE

Regular maintenance ensures the efficiency and extends the lifespan of your air purifier.

6.1 Filter Replacement

The filter should be replaced every 3 to 6 months, depending on usage and air quality. A red indicator light on the control panel will illuminate when it's time to replace the filter.

1. Unplug the air purifier from the power outlet.
2. Turn the unit upside down and twist the filter cover counter-clockwise to remove it.
3. Remove the old filter and dispose of it properly.
4. Insert a new Afloia replacement filter (ASIN: B08X2747G4) into the unit.
5. Replace the filter cover and twist clockwise to lock it securely.
6. Plug in the air purifier. To reset the filter replacement indicator, press and hold the **Light Button** for 3-5 seconds until the red light turns off.

Image 6.1: Filter Replacement Indicator. This image shows the control panel with the red light illuminated, signaling that the filter needs to be replaced.

6.2 Cleaning the Exterior

- Wipe the exterior of the air purifier with a soft, dry cloth.
- Do not use abrasive cleaners or solvents.

7. TROUBLESHOOTING

If you encounter any issues with your Afloia Air Purifier, refer to the following table for common problems and solutions.

Problem	Possible Cause	Solution
Unit does not turn on	Not plugged in; Power outlet malfunction; Filter cover not securely locked.	Ensure power cord is securely plugged in; Try a different outlet; Ensure filter cover is twisted clockwise until locked.
Airflow is weak	Filter is dirty or clogged; Air inlets/outlets are blocked.	Replace the filter; Ensure nothing is obstructing the air inlets or outlets.
Unusual noise	Filter not installed correctly; Foreign object inside the unit.	Reinstall the filter correctly; Unplug the unit and check for any foreign objects.
Odor persists	Filter needs replacement; Strong odor source.	Replace the filter; Identify and remove the source of the strong odor.

If the problem persists after trying these solutions, please contact Afloia customer support.
