- Ensure there is adequate space around the machine for ventilation and access.

Water and Drain Connections

- Connect the water inlet hose to a cold water tap with a 3/4-inch thread. Ensure the connection is tight to prevent leaks.
- Position the drain hose into a standpipe or over the edge of a sink, ensuring it is securely fixed to prevent displacement during the drain cycle. The drain hose should not be kinked or submerged in water.

Electrical Connection

- Connect the power cord to a grounded electrical outlet. The washing machine operates on 220V, 60Hz.
