Turtle Wax Hybrid Solutions Ceramic 3-in-1 Detailer

Turtle Wax Hybrid Solutions Ceramic 3-in-1 Detailer User Manual

INTRODUCTION

The Turtle Wax Hybrid Solutions Ceramic 3-in-1 Detailer is an advanced car care product designed to provide safe waterless cleaning, intensify shine, and add durable ceramic wax protection to your vehicle's exterior surfaces. This versatile formula combines the benefits of a detailer, a ceramic booster, and a waterless wash, offering a comprehensive solution for maintaining your car's appearance.

SAFETY INFORMATION

- **Keep out of reach of children.**
- Avoid contact with eyes. In case of eye contact, rinse thoroughly with water for several minutes. If irritation persists, seek medical attention.
- Do not ingest. If swallowed, do not induce vomiting. Seek medical attention immediately.
- Use in a well-ventilated area to avoid prolonged inhalation of vapors.
- Wear appropriate protective gloves if you have sensitive skin or for prolonged use.
- Statements regarding dietary supplements have not been evaluated by the FDA and are not intended to diagnose, treat, cure, or prevent any disease or health condition. This product is for automotive exterior use only.

SETUP AND PREPARATION

1. **Vehicle Surface Condition:** Ensure the vehicle's surface is cool to the touch and out of direct sunlight. Applying the product to a hot surface or in direct sun may lead to streaking or premature drying.
2. **Shake Well:** Before each use, shake the bottle thoroughly to ensure all ingredients are properly mixed.
3. **Microfiber Towels:** Prepare several clean, high-quality microfiber towels. It is recommended to use separate towels for application and buffing.

OPERATING INSTRUCTIONS

Method 1: Waterless Cleaning and Shine

This method is ideal for light dirt, dust, and fingerprints, while adding a layer of ceramic protection.

1. **Spray:** Work on one section of the vehicle at a time (e.g., one door, half a hood). Spray the product directly onto the surface, ensuring even coverage.
2. **Wipe:** Gently wipe the sprayed area with a clean, folded microfiber towel. Use light pressure to lift dirt.
3. **Buff:** Turn the microfiber towel to a clean, dry side or use a separate clean microfiber towel. Buff the area to a high-gloss, streak-free finish.
4. **Repeat:** Continue this process section by section until the entire vehicle is cleaned and detailed.

Method 2: Ceramic Wax Protection and Booster

This method is for enhancing existing ceramic coatings or adding a layer of ceramic protection after a traditional wash.

1. **Clean Surface:** Ensure the vehicle is clean and dry. For best results, wash the vehicle thoroughly before application.
2. **Spray:** Lightly mist the product onto a small section of the vehicle's paintwork. A little goes a long way.
3. **Spread:** Using a clean, folded microfiber towel, gently spread the product evenly across the surface.
4. **Haze (Optional):** Allow the product to haze for a few minutes. This step can enhance durability but is not always necessary for shine.
5. **Buff:** With a separate, clean, and dry microfiber towel, buff the area to a brilliant, streak-free shine.
6. **Cure Time:** For optimal ceramic protection, allow the product to cure for at least 24 hours without

exposure to moisture.

MAINTENANCE

- **Regular Use:** Regular application of the Hybrid Solutions Ceramic 3-in-1 Detailer will maintain and boost the ceramic protection and hydrophobic properties on your vehicle's surface.
- **Microfiber Towel Care:** Always use clean microfiber towels. Wash towels separately from other laundry, using a microfiber-specific detergent and avoiding fabric softeners, which can reduce absorbency.
- **Storage:** Store the product in its original container, tightly sealed, in a cool, dry place away from direct sunlight and extreme temperatures. Do not allow the product to freeze.

TROUBLESHOOTING

- **Streaking or Hazing:**
 - **Cause:** Too much product applied, application on a hot surface, or insufficient buffing.
 - **Solution:** Use less product. Ensure the surface is cool before application. Buff more thoroughly with a fresh, clean, dry microfiber towel. If streaking persists, lightly re-spray the affected area and immediately buff off.
- **Uneven Application:**
 - **Cause:** Inconsistent spray pattern or wiping motion.
 - **Solution:** Ensure even spray coverage. Use consistent, overlapping wiping motions to spread the product uniformly across the surface.

SPECIFICATIONS

Product Name	Turtle Wax Hybrid Solutions Ceramic 3-in-1 Detailer
Brand	Turtle Wax
Item Form	Liquid
Unit Count (per bottle)	32 Fluid Ounces
Specific Uses	Shine
Recommended Uses	Cleans, For Polishing, For Paint Protection
Manufacturer	TURTLE WAX INC
ASIN	B08X727MPM
UPC	074660534137
