your hand to the edge

6: Remove the stick 2. if there have bubble,  
please use your hand  
make the bubble disappear

*Image: Visual guide for screen protector installation, showing six distinct steps from cleaning to final application.*

- 1. Clean the Screen:** Use the provided wet wipe to thoroughly clean your smartwatch screen. Follow with the dry wipe to remove any moisture. Finally, use the fiber cloth to polish the screen and remove any remaining dust or smudges. Ensure the screen is completely dry and free of particles.
- 2. Remove Back Stick 1:** Carefully peel off the protective film labeled "Back Stick 1" from the screen protector. Avoid touching the adhesive side.
- 3. Align the Position:** Gently align the screen protector with your smartwatch screen. Pay close attention to the edges and any cutouts (e.g., for sensors).
- 4. Align Edge and Stick:** Once aligned, slowly lower the screen protector onto the screen, starting from one edge and allowing it to adhere gradually.
- 5. Press to Edge:** Use your finger or a soft card (not included) to gently press the entire screen protector, working from the center outwards to the edges. This helps to remove air bubbles.
- 6. Remove Stick 2:** Carefully peel off the top protective film labeled "Stick 2". If any small bubbles remain, gently push them towards the nearest edge with your finger or the fiber cloth.

## 4. MAINTENANCE

---

To ensure the longevity and clarity of your screen protector:

- Clean the screen protector regularly with a soft, lint-free cloth.
- For stubborn smudges, lightly dampen the cloth with water or a screen cleaner specifically designed for electronics.
- Avoid using harsh chemicals, abrasive materials, or excessive force when cleaning, as this may damage the protector.

## 5. TROUBLESHOOTING

---

Common issues and their solutions:

- **Bubbles After Installation:** Small bubbles often disappear within 24-48 hours as the adhesive settles. For larger bubbles, gently lift the nearest edge of the protector and reapply, pushing the bubble out with a soft cloth. Ensure no dust particles are trapped underneath.
- **Dust Particles Underneath:** If dust is trapped, carefully lift the nearest edge of the protector and use a dust removal sticker (if available) or a piece of tape to gently dab the dust particle off the adhesive side. Reapply

the protector.

- **Edges Not Sticking:** Ensure the screen was thoroughly cleaned and dry before application. Press firmly along the edges for a few seconds. If the issue persists, the protector may need to be replaced.

## 6. PRODUCT SPECIFICATIONS

---
