BAODINI BDN8816

BAODINI Windproof Compact Automatic Umbrella User Manual

Model: BDN8816

INTRODUCTION

Thank you for choosing the BAODINI Windproof Compact Automatic Umbrella. This manual provides essential information for the proper setup, operation, and maintenance of your umbrella. Designed for durability and convenience, this umbrella features a robust 12-rib windproof frame, a 46-inch arc canopy for ample coverage, and an automatic open/close mechanism. Its reflective edge enhances visibility during low-light conditions, contributing to your safety.

SETUP

Unpacking and Initial Inspection

- Carefully remove the umbrella from its packaging.
- Inspect the umbrella for any visible damage or missing components. Ensure the strap is securely attached and the handle is intact.
- Familiarize yourself with the automatic open/close button located on the handle.

OPERATING INSTRUCTIONS

Opening the Umbrella

- Ensure the umbrella is not obstructed by any objects or people.
- Press the automatic open/close button on the handle. The canopy will extend and lock into place automatically.

Closing the Umbrella

- Press the automatic open/close button again. The canopy will retract.

2. To fully close the umbrella, firmly push both ends of the umbrella shaft together until it clicks into the locked position. This action compresses the spring mechanism for the next automatic opening.

Reflective Safety Feature

The umbrella features highly reflective stripes around its edge. These stripes are designed to increase your visibility to others, especially in low-light conditions or at night, enhancing safety.

Figure 1: Steps for automatic umbrella operation. This image illustrates how to open and close the umbrella using the button and how to fully retract the shaft.

Video 1: Demonstration of the automatic open/close function and windproof design of the BAODINI umbrella. This video shows the umbrella opening and closing with a single button press and its stability in windy conditions.

FEATURES

- **12 Ribs Windproof Design:** Constructed with 12 reinforced ribs, this umbrella offers enhanced stability and wind resistance compared to standard 8 or 10-rib designs.
- **46-Inch Arc Canopy:** The generous 46-inch arc canopy provides extensive coverage, comfortably shielding one or two individuals from rain.
- **300T Waterproof Fabric:** Made from high-density 300T fabric, the canopy offers superior water repellency and durability, ensuring you stay dry.
- **Compact and Portable:** When folded, the umbrella measures approximately 13 inches (33 cm) in length and weighs about 1.1 lbs, making it easy to carry in a purse, backpack, or travel bag.
- **Reflective Stripes:** Integrated reflective stripes along the canopy edge improve visibility in dark or rainy conditions, enhancing user safety.

Umbrella for 2 people

Figure 3: The 46-inch arc canopy offers generous coverage for two people.

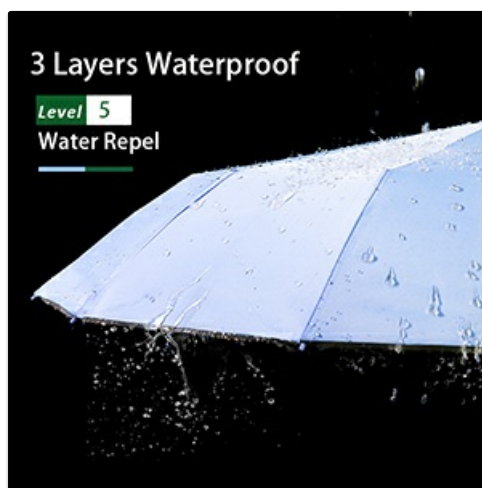

Figure 4: The 300T fabric provides a high level of water repellency.

Figure 5: The umbrella's compact size allows for easy storage in a purse.

Figure 6: The umbrella fits conveniently into a backpack for travel.

MAINTENANCE

- **Drying:** After use, always leave the umbrella open to air dry completely before folding and storing. This prevents mildew and preserves the fabric's integrity.
- **Cleaning:** If the canopy becomes dirty, gently wipe it with a damp cloth and mild soap. Rinse thoroughly and allow to air dry. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the umbrella in a cool, dry place away from direct sunlight when not in use. Ensure it is fully dry before storing to prevent damage.

TROUBLESHOOTING

- **Umbrella not opening/closing smoothly:** Ensure the shaft is fully retracted and clicked into place before attempting to open. If the canopy retracts but the shaft does not, firmly push both ends of the shaft together until it locks.
- **Canopy inverts in strong wind:** While designed to be windproof, extreme gusts may cause inversion. If this occurs, gently pull the canopy back into shape. The flexible frame is designed to withstand inversion without breaking.

SPECIFICATIONS

Feature	Detail
Model Number	BDN8816
Canopy Arc	46 inches
Ribs	12 (Fiberglass Frame Material)
Fabric Material	300T Waterproof
Shaft Material	Steel
Handle Material	Rubber
Product Dimensions (folded)	2 x 14 x 2 inches
Item Weight	1 pound
