4.4 Connecting to an Audio System

- **RCA Connection:** Use the supplied RCA cable to connect the turntable's output to an available line-level input (e.g., AUX, CD) on your amplifier or receiver. Ensure the phono preamplifier switch on the turntable is set to 'Line Out' if connecting to a line-level input, or 'Phono Out' if connecting to an amplifier with a dedicated phono input.
- **USB Connection:** Connect the turntable to your computer using a USB cable (not included). This allows for digital recording of your vinyl.

5.2 Speed Selection

The turntable supports 33, 45, and 78 RPM playback. Use the electronic speed change function to select the appropriate speed for your record. For 78 RPM records, a specific OM78 stylus (not included) and a drive belt turnover to a larger diameter of the pulley are required.

5.3 Playing a Record

1. Place a record on the platter.
2. Ensure the correct playback speed is selected.
3. Raise the tonearm using the tonearm lift lever.
4. Gently move the tonearm over the desired starting groove of the record.
5. Slowly lower the tonearm using the lift lever. The stylus will descend onto the record and playback will begin.

5.4 Stopping Playback

1. Raise the tonearm using the tonearm lift lever.
2. Move the tonearm back to its rest position.
3. Lower the tonearm onto its rest using the lift lever.

4. Turn off the turntable.

5.5 USB Recording

To record vinyl to your PC/Mac, connect the turntable via USB. Use appropriate audio recording software (not included) on your computer to capture the audio signal. Ensure the turntable's phono preamplifier is set to 'Line Out' for USB recording.

6. MAINTENANCE

6.1 Cleaning the Stylus

Regularly clean the stylus using a soft brush or a dedicated stylus cleaning fluid. Brush gently from back to front to remove dust and debris.

6.2 Cleaning Records

Use a carbon fiber brush or a record cleaning solution to keep your vinyl records free of dust and static. Clean records before each play to minimize wear on the stylus and improve sound quality.

6.3 Dustcover Care

Clean the dustcover with a soft, damp cloth. Avoid abrasive cleaners that may scratch the surface.
