3. INSTALLATION AND REPLACEMENT

Replacing the main brush cover is a hassle-free process that requires no special tools. Follow these steps to replace your old cover with a new one:

1. Turn off your robotic vacuum cleaner and place it upside down on a clean, flat surface.
2. Locate the main brush cover, which is typically secured by two latches.
3. Press the latches to release the old brush cover.
4. Carefully remove the old brush cover.
5. Align the new roborock Main Brush Cover (Type F) with the designated slot on the vacuum.
6. Press down firmly until you hear a click, indicating that the cover is securely latched into place.
7. Ensure the protective pads on the cover are properly seated to prevent scraping.

Hassle-Free Replacement

No tools are required. Our roller brush cover can be easily disassembled and replaced to maintain optimal performance.

4. MAINTENANCE

To maintain optimal performance of your robotic vacuum, the main brush cover should be cleaned regularly, in sync with the main brush. This prevents debris buildup and ensures efficient operation.

- Remove the main brush cover as described in the installation steps.
- Wipe the cover with a damp cloth to remove any dust or hair.
- Ensure the cover is completely dry before reattaching it to the vacuum.

Clean Regularly

Clean often, in sync with the main brush.

5. PROTECTIVE DESIGN

The main brush cover features protective pads designed to prevent the cover from scraping against hard floors. This design helps to avoid damage to both the cover and your flooring, contributing to better cleaning results.

Protective Design

Protective pads prevent the cover from scraping against the hard floor and causing damage.
