1. Introduction

Thank you for choosing the brotect HD-Clear Screen Protector for your myPhone Halo A LTE. This high-quality protection film is designed to safeguard your device's screen from scratches, dirt, and fingerprints while maintaining crystal-clear visibility and touch sensitivity. Manufactured in Germany, our screen protectors ensure durability and a bubble-free installation experience.

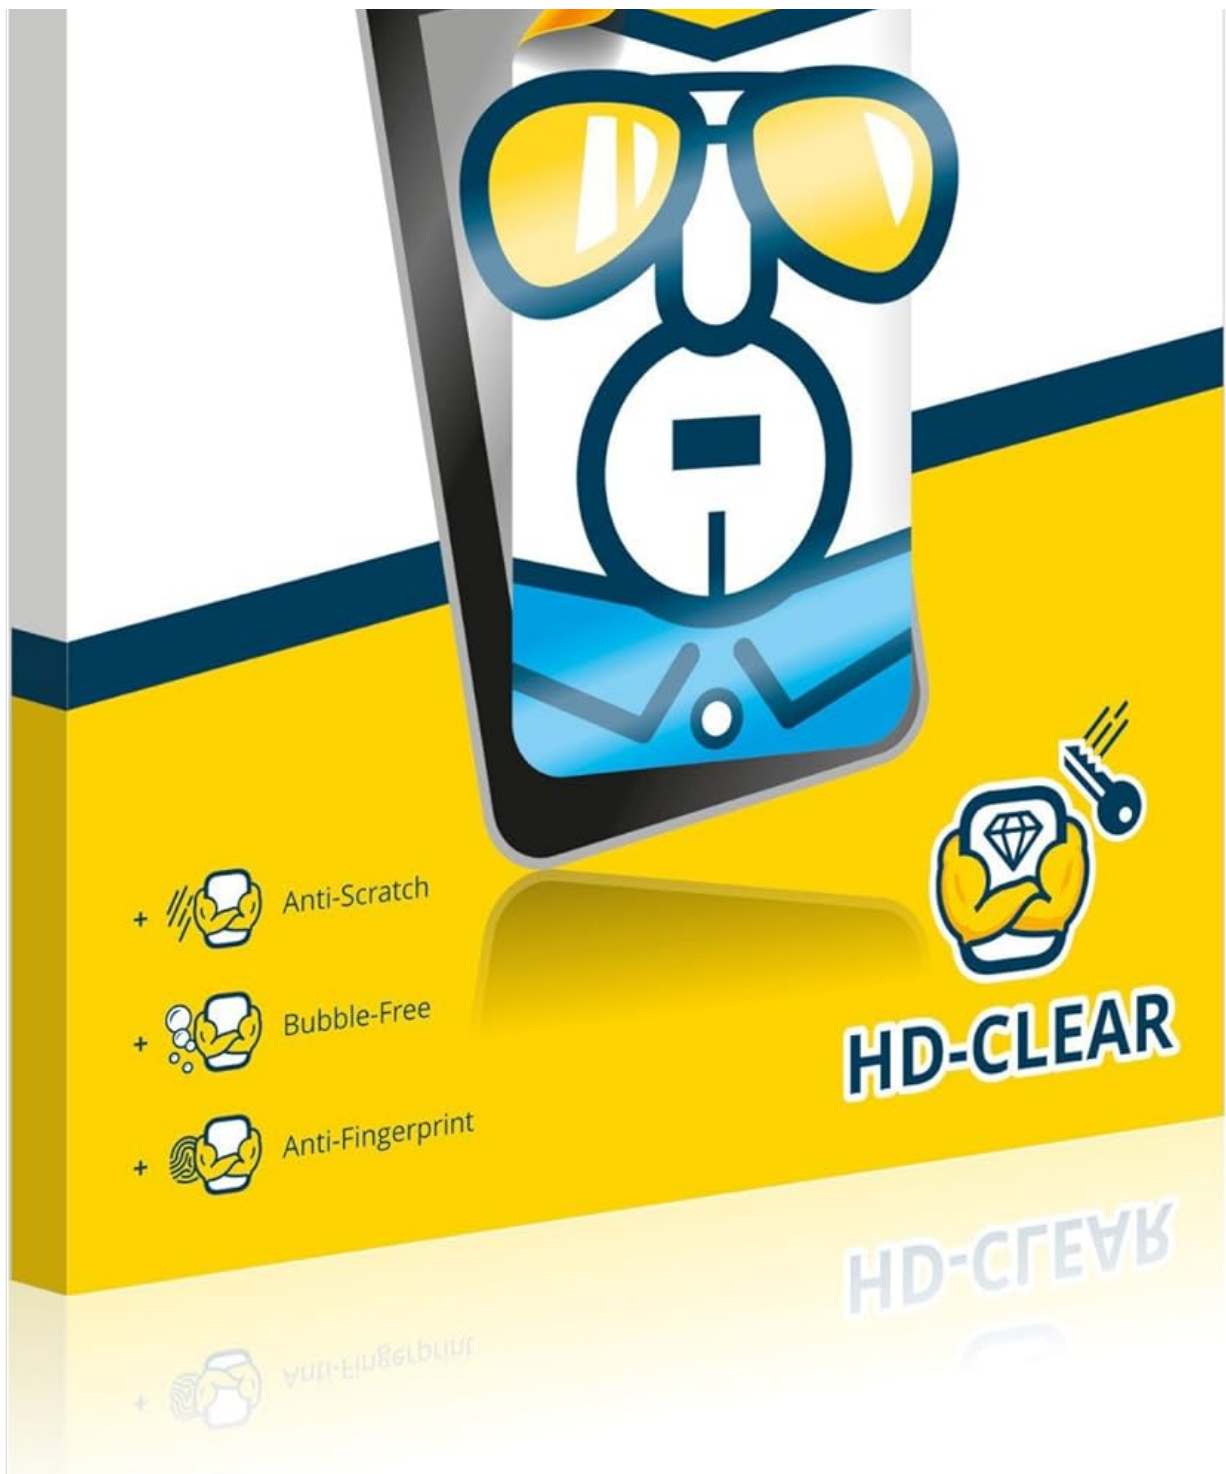

Image 1.1: Packaging of the protect HD-Clear Screen Protector. The packaging highlights key features such as anti-scratch, bubble-free, and anti-fingerprint properties, along with the HD-Clear designation.

2. Package Contents

Your protect HD-Clear Screen Protector package includes:

- 2x BROTECT HD-Clear Screen Protector compatible with myPhone Halo A LTE

3. Installation Guide

Follow these steps carefully for a successful, bubble-free installation of your screen protector.

3.1. Preparation

- Choose a dust-free environment for installation (e.g., a bathroom after a hot shower).
- Thoroughly clean your device's screen using a microfiber cloth to remove any dust, dirt, or fingerprints. Ensure the screen is completely dry.

3.2. Application Steps

1. **Peel and Align:** Carefully peel back about half of the thin film from the screen protector. Align the exposed adhesive side of the screen protector precisely with your myPhone Halo A LTE screen. Ensure it is centered and straight.
2. **Apply and Smooth:** Once aligned, slowly lower the screen protector onto the device's screen. Use a soft cloth or a credit card wrapped in a soft cloth to gently smooth the protector from one side to the other, pushing out any air bubbles as you go. Simultaneously, continue to peel off the remaining backing film.
3. **Remove Air Bubbles:** If any small air bubbles remain, gently push them towards the edges of the screen protector using the soft cloth or credit card. Persistent bubbles may require lifting a small section of the protector and reapplying it carefully.

Screen Protector

Instructions in various languages can be found inside.

Anbringungsanleitung
 Instructions

- 1.** Nutze zur Montage einen staubarmen Ort (z.B. Badezimmer) und reinige das Display gründlich von Staub und Verschmutzungen.

Before assembling, locate a dust free area (e.g. bathroom) and carefully remove any dust or dirt from the display.
- 2.** Löse das Trägermaterial zur Hälfte von der Displayschutzfolie ab und setze die Displayschutzfolie an einer Seite auf dem Display an. Die Displayschutzfolie sollte in aufgezogenem Zustand mittig auf dem Display ausgerichtet sein.

Remove half of the thin cover film of the screen protector and align the screen protector on one side with your screen. Make sure that the screen protector will be centered on the middle of your screen.
- 3.** Streiche die Displayschutzfolie leicht mittels einer mit einem weichen Tuch umwickelten Kreditkarte von einer Seite zur anderen auf das Display. Ziehe dabei gleichzeitig den Rest des Trägermaterials ab.

Cover a credit card with a soft cloth and carefully slide over the screen protector from one side to the other on your screen, enabling you to remove the rest of the thin cover film.

Smooth out any remaining air

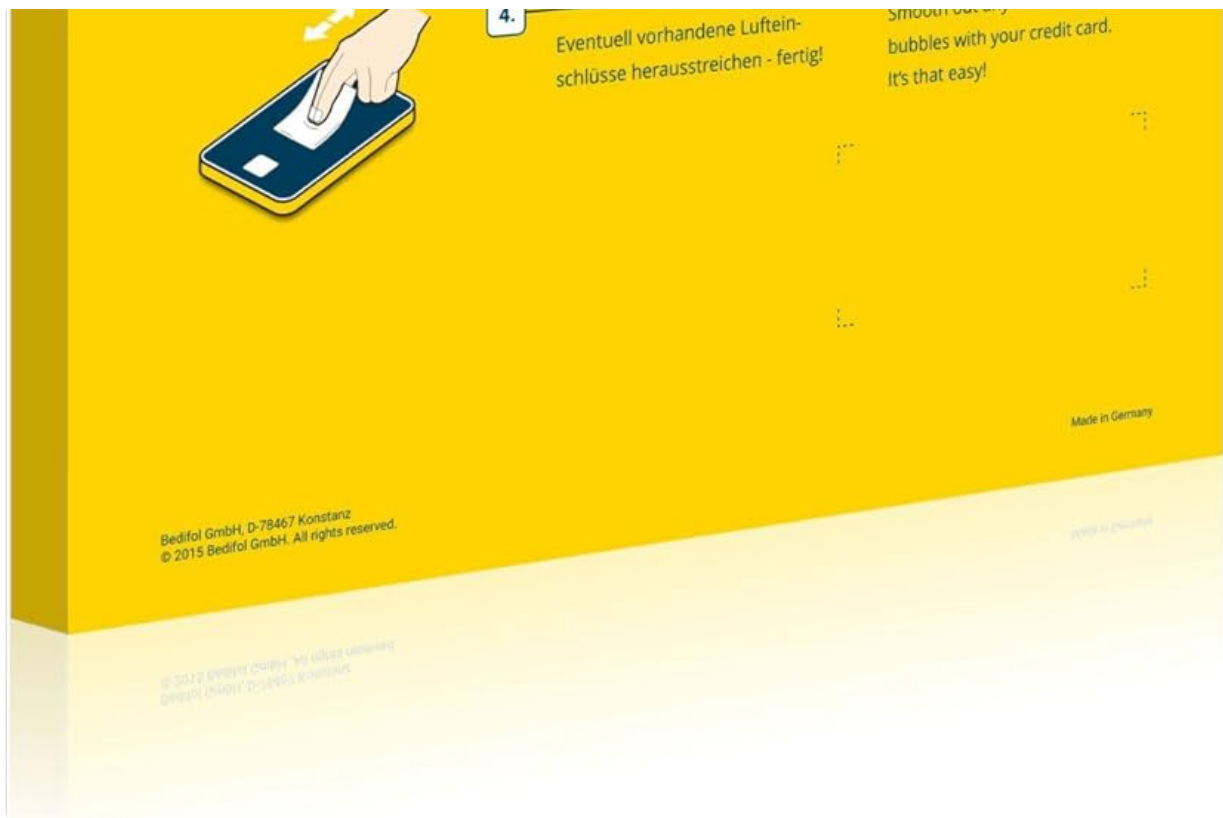

Image 3.1: Visual guide for screen protector installation. The image illustrates the four main steps: cleaning the screen, peeling and aligning the protector, smoothing it onto the screen, and removing any remaining air bubbles.

4. Key Features

The protect HD-Clear Screen Protector offers several advanced features to enhance your device's protection and user experience:

- **High Transparency:** Ensures a clear and sharp view of all screen content without distortion.
- **Scratch-Resistant:** Provides an extremely durable surface that protects against scratches from daily use.
- **Anti-Fingerprint Coating:** An additional layer that repels dirt and fingerprints, making the screen easy to clean.
- **Bubble-Free Installation:** Features a newly developed adhesive layer for stress-free application without air bubbles.

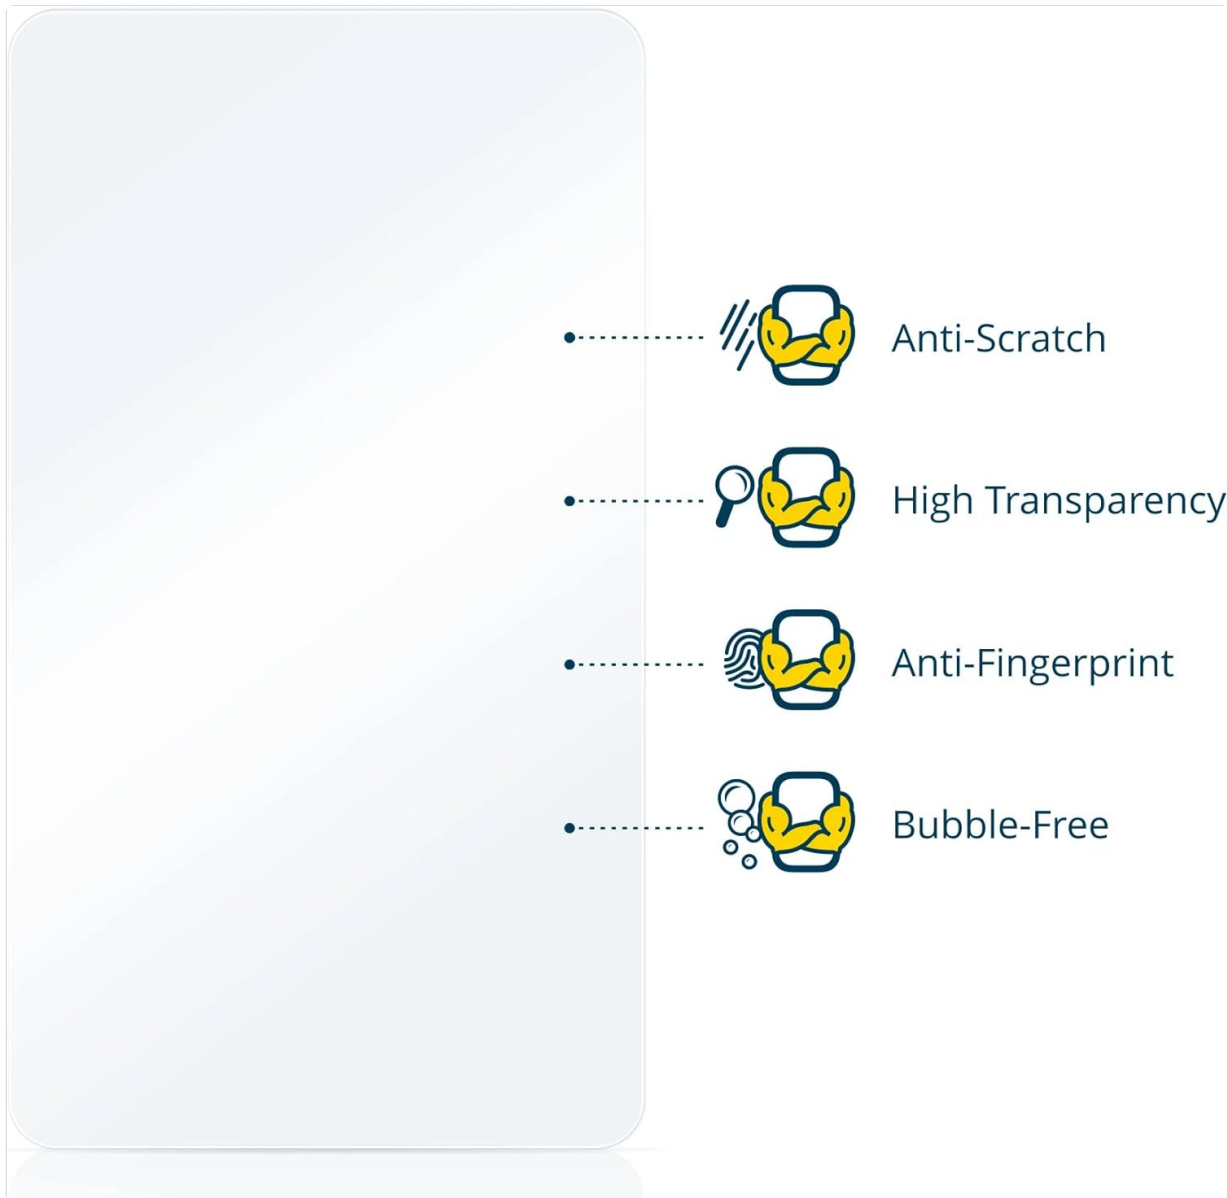

Image 4.1: Icons representing the key features of the protect screen protector: Anti-Scratch, High Transparency, Anti-Fingerprint, and Bubble-Free.

5. Maintenance

To keep your screen protector in optimal condition:

- Wipe the screen protector regularly with a soft, lint-free cloth to remove dust and smudges.
- For stubborn marks, lightly dampen the cloth with water or a screen cleaner specifically designed for electronics. Avoid harsh chemicals or abrasive materials.

6. Troubleshooting

Issue: Air bubbles remain after installation.

- **Solution:** Small bubbles often disappear within 24-48 hours as the adhesive settles. For larger bubbles, try gently pushing them towards the nearest edge with a credit card wrapped in a soft cloth. If a bubble is caused by a dust particle, you may need to carefully lift a corner of the protector, remove the dust with a piece of tape, and reapply.

Issue: Screen protector does not adhere properly.

- **Solution:** Ensure the screen was thoroughly cleaned and free of any oils or residues before application. Extreme temperatures can affect adhesion; apply in a room temperature environment.

7. Specifications

Product Name	brotect HD-Clear Screen Protector
Compatible Device	myPhone Halo A LTE
Material	Polyethylene Terephthalate (PET)
Special Feature	Anti-Fingerprint, Scratch-Resistant, High Transparency, Bubble-Free
Screen Surface Description	Glossy
