COMMON ISSUES AND SOLUTIONS

- **Bed rail feels loose after installation:** Re-check the anchoring system. Ensure the straps are pulled tight and the rail is flush against the bed. Adjust the strap length if necessary to achieve a secure fit.
- **Fold-down mechanism is stiff:** Ensure no fabric or bedding is caught in the hinges. Apply gentle, even pressure when operating the release buttons. If the issue persists, check for any obstructions in the mechanism.
- **Damage to fabric or frame:** Discontinue use immediately if any part of the bed rail is damaged. Do not attempt to repair broken components. Contact customer support for replacement parts or further guidance.
