Seville Classics WEB690

Seville Classics UltraDurable 5-Tier Steel Wire Shelving Unit

Brand: Seville Classics | **Model:** WEB690

Introduction

The Seville Classics UltraDurable 5-Tier Commercial-Grade NSF-Certified Steel Wire Shelving System is engineered for robust and versatile storage. Constructed from industrial-strength steel, this heavy-duty unit is suitable for a wide range of applications, from home garages to commercial kitchens. Its design emphasizes durability, adjustability, and ease of use, providing a reliable solution for organizing various items.

Safety Information

WARNING: Failure to follow these safety guidelines may result in injury or damage to the product.

- Do not exceed the maximum weight capacity of 800 lbs (363 kg) per shelf when using leveling feet, or 4,000 lbs (1814 kg) total for the unit on leveling feet.
- When using wheels, the total weight capacity for the entire shelving system is 500 lbs (227 kg).
- Exercise caution when moving the unit on wheels to prevent accidents, especially on uneven surfaces.
- Ensure all components are properly secured and tightened before placing items on the shelves.
- Do not allow children to climb on, play with, or around the shelving unit.
- Always adhere strictly to the assembly instructions to ensure proper setup and prevent potential injury.

Package Contents

Before beginning assembly, please verify that all components listed below are present and undamaged:

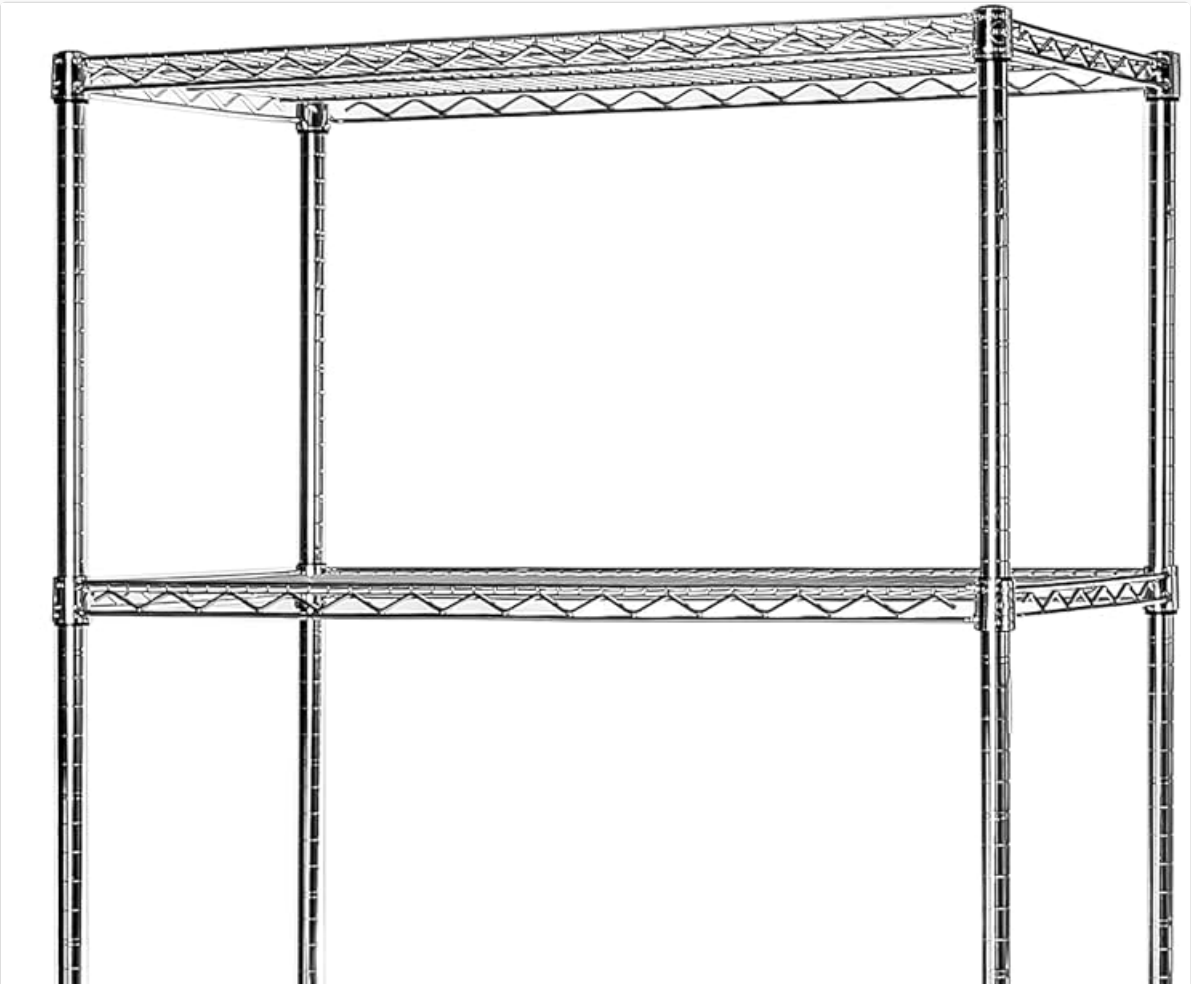

- 5 x Shelves (36" x 18")
- 4 x Pairs of Poles (1" diameter)
- 4 x Wheels (3" diameter)

- 4 x Leveling Feet

Setup and Assembly

Assembly of the Seville Classics UltraDurable shelving unit requires no tools. Follow these steps for a secure setup:

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, flat surface.
2. **Choose Base Option:** Decide whether to use the leveling feet for a stationary unit or the caster wheels for mobility.
3. **Assemble Bottom Poles:** Screw the chosen leveling feet or caster wheels into the bottom of the four lower pole sections. Ensure they are tightened securely.
4. **Attach Shelf Clips:** Snap the plastic shelf clips onto the poles at the desired height for your first (bottom) shelf. The poles have grooves at 1-inch increments to guide placement. Ensure all four clips for a single shelf are at the same height.
5. **Install First Shelf:** Slide the first wire shelf down over the poles until it rests firmly on the installed clips. Gently press down on the shelf corners to ensure it is fully seated.
6. **Extend Poles (if necessary):** If assembling a taller unit, screw the upper pole sections into the lower pole sections.
7. **Install Remaining Shelves:** Repeat steps 4 and 5 for the remaining four shelves, adjusting the height of the clips as needed for each shelf.
8. **Final Check:** Once all shelves are in place, ensure all connections are secure and the unit is stable. If using leveling feet, adjust them to ensure the unit is level on uneven floors. If using wheels, engage the locking mechanisms on the two locking wheels to prevent unintended movement.

Operation and Usage

The Seville Classics shelving unit is designed for versatile storage in various environments. Its key operational features include:

- **Adjustable Shelves:** The five wire shelves can be adjusted in 1-inch increments along the poles, allowing you to customize the spacing to accommodate items of different heights.
- **Weight Capacity:** The unit supports up to 800 lbs (363 kg) per shelf when using leveling feet, with a total capacity of 4,000 lbs (1814 kg) for the entire unit. When equipped with wheels, the total capacity is 500 lbs (227 kg). Distribute weight evenly across shelves for optimal stability.
- **Mobility:** The included 3-inch heavy-duty rubber wheels provide convenient mobility, allowing you to easily move the unit. Two of the wheels are equipped with locking mechanisms to secure the unit in place.
- **NSF Certification:** This shelving system is NSF Certified to NSF/ANSI Standard 2 - Food Equipment, making it suitable for commercial and restaurant use in dry environments.

The shelving unit positioned in a garage, demonstrating its use for organizing various items like storage bins, tools, and household supplies.

The shelving unit utilized in a commercial kitchen setting, holding various kitchenware such as plates, bowls, glasses, and cooking pots.

Maintenance

To ensure the longevity and optimal performance of your Seville Classics shelving unit, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the shelves and poles with a dry cloth to remove dust and debris. For more stubborn dirt, a damp cloth with mild soap can be used, followed by immediate drying to prevent corrosion.
- **Inspection:** Periodically check all connections, especially the shelf clips and pole joints, to ensure they remain tight and secure.
- **Environment:** This unit is designed for use in dry environments. Avoid prolonged exposure to moisture or high humidity, which can lead to rust or damage.

Troubleshooting

If you encounter any issues with your shelving unit, consider the following common troubleshooting steps:

- **Unit is Unstable/Wobbly:**
  - Ensure all shelf clips are securely snapped onto the poles at the same height for each shelf.

- If using leveling feet, adjust them to ensure the unit is balanced on uneven surfaces.
- Verify that the pole sections are fully screwed together.

- **Shelves Not Level:**
  - Check that the plastic shelf clips are positioned at identical heights on all four poles for the affected shelf.
  - Ensure the shelf is fully seated onto the clips.

- **Difficulty Moving Unit (on wheels):**
  - Verify that the locking mechanisms on the caster wheels are disengaged.
  - Check for any obstructions on the floor preventing smooth movement.

Specifications

Feature	Detail
Product Dimensions	18"D x 36"W x 75"H (72"H on leveling feet)
Shelf Type	Tiered Shelf
Frame Material	Alloy Steel, Metal
Color	Steel
Furniture Finish	Chrome
Style	Modern
Maximum Weight Recommendation (on wheels)	500 Pounds (total)
Maximum Weight Recommendation (on leveling feet)	800 Pounds (per shelf), 4000 Pounds (total)
Number of Shelves	5
Assembly Required	Yes (No tools required)
Item Weight	44 pounds
Model Number	WEB690
UPC	017641006902
Special Features	Adjustable shelves, Mobile (with wheels)

Diagram illustrating the overall dimensions of the shelving unit: 75 inches (1.9 meters) in height, 36 inches (91.4 cm) in width, and 18 inches (45.7 cm) in depth.
