bobble HAF00I200

Bobble Carbon Filter Replacement Manual

For Bobble Classic, Infuse, and Plus Bottles

Introduction

This manual provides essential instructions for the proper installation, use, and maintenance of your Bobble Replacement Carbon Filters. These filters are designed to fit Bobble Classic, Infuse, and Plus bottles, ensuring you continue to enjoy clean, fresh-tasting water.

Each filter is engineered to reduce chlorine taste and odor from tap water, offering an eco-friendly alternative to single-use plastic bottles. Please read these instructions carefully before use.

Setup and Initial Installation

Follow these steps to install a new carbon filter into your Bobble bottle:

1. **Unscrew the Cage:** Carefully unscrew the filter cage from the top of your Bobble bottle.
2. **Remove Old Filter:** If replacing an existing filter, remove the old filter from the cage and discard it.
3. **Insert New Filter:** Place the new Bobble carbon filter into the filter cage. Ensure it is seated correctly.
4. **Screw Cage Back On:** Screw the filter cage, with the new filter installed, back onto the top of your Bobble bottle until secure.
5. **Prime the Filter:** Before first use, fill the bottle with water and gently squeeze a small amount through the filter to remove any carbon dust. Repeat this process a few times.

Operating Instructions

Once the filter is installed and primed, your Bobble bottle is ready for use:

- **Fill with Water:** Fill your Bobble bottle with tap water.
- **Drink:** Sip water through the mouthpiece. The filter will purify the water as you drink, removing chlorine

and improving taste.

- **Portability:** The Bobble bottle with its filter is designed for on-the-go hydration, providing filtered water wherever you are.

Maintenance and Filter Replacement

Regular filter replacement is crucial for optimal performance and water quality:

- **Replacement Schedule:** Replace each filter after 2-3 months of use, or after filtering approximately 40 gallons (150 liters) of water, whichever comes first.
- **Cleaning:** The bottle and filter cage can be hand-washed with warm, soapy water. Do not wash the carbon filter itself with soap.
- **Storage:** If storing the bottle for an extended period, remove the filter, allow it to air dry completely, and store it in a cool, dry place.

Troubleshooting

If you encounter issues with your Bobble filter, consider the following:

- **Slow Water Flow:** This may indicate that the filter is clogged or nearing the end of its lifespan. Try priming the filter again or replace it if it's been 2-3 months since the last replacement.
- **Unusual Taste/Odor:** If water still has an unusual taste or odor after filtering, ensure the filter is correctly seated and has been properly primed. If the issue persists, replace the filter.
- **Leaking:** Ensure the filter cage is securely screwed onto the bottle and that the filter is correctly inserted into the cage. Check for any damage to the bottle or cage.

Specifications

Feature	Detail
Material	Carbon
Product Dimensions (D x W x H)	0.5" x 0.5" x 3"
Item Weight	22.68 g
External Testing Certification	NSF
Product Benefits	Filter Replacement
Model Number	HAF00I200
Compatible With	Bobble Classic, Infuse, and Plus Bottles

UPC	755247200651

Warranty Information
