› Domi Outdoor Living 12' x 20' Hardtop Gazebo User Manual

## domi outdoor living 12'x20'

# Domi Outdoor Living 12' x 20' Hardtop Gazebo

## PRODUCT INSTRUCTION MANUAL

### Product Overview

The Domi Outdoor Living 12' x 20' Hardtop Gazebo is a robust and elegant outdoor structure designed to enhance your patio, backyard, or lawn. Featuring a durable aluminum frame and a galvanized steel double roof, this permanent pavilion offers superior protection and comfort. Its thoughtful design includes integrated netting and curtains for privacy and insect control, along with a unique drainage system to manage rain and snow effectively.

### Key Features

- **Ventilated Double Roof Design:** Promotes air circulation, keeping the gazebo cool and comfortable, and allows rain and snow to slide off.
- **Drainage System Design:** Rainwater flows from eaves to poles, reducing accumulation and prolonging lifespan.
- **Sturdy Aluminum Frame:** Powder-coated aluminum frame (4.72"x4.72" poles) offers superior resistance to fading, rust, and can withstand winds up to 40 MPH.
- **Included Netting & Curtains:** Double-track system with double-sided zippers for easy sliding. Netting provides ventilation and insect protection, while curtains offer privacy and warmth.
- **Versatile Ceiling Hooks:** Equipped with hooks to easily hold decorative items, fans, lights, and heaters.
- **Ideal Space:** Measures 20' L x 12' W x 10.5' H, providing 240 square feet of versatile space for various outdoor activities.

### Important Safety Information

**Always secure the gazebo to a stable foundation to prevent it from tipping over in high winds. Do not use the gazebo in winds exceeding 40 MPH. Keep children and pets away from the gazebo during assembly, disassembly, and in high winds. Always follow the assembly instructions carefully to avoid injury.**

## Setup and Assembly

While detailed step-by-step assembly videos from the seller are not available, the following general steps and visual aids from product images will guide you through the setup process. It is highly recommended to have at least two people for assembly, especially for lifting and securing larger components.

### Assembly Steps Overview:

1. **Prepare the Base:** Ensure you have a level and stable surface for the gazebo. Unpack all components and verify against the parts list.
2. **Assemble Beams and Poles:** Connect the horizontal beams and vertical support poles. The aluminum frame features a wood-like finish for aesthetic appeal.
3. **Set Up the Main Frame:** Carefully raise and secure the assembled beams and poles to form the main rectangular structure. Ensure all connections are tight and stable.
4. **Install Roof Frame:** Assemble the internal roof support structure. This typically involves connecting various bars and brackets to create the framework for the double roof.
5. **Attach Roof Panels:** Install the galvanized steel roof panels. These panels are designed for durability and weather resistance. Ensure proper alignment for effective drainage.
6. **Install Netting and Curtains:** Utilize the double-track system to hang the mosquito netting and privacy curtains. The double-sided zippers allow for easy opening and closing.
7. **Secure to Ground:** Anchor the gazebo securely to the ground using the pre-drilled base plates on each pole. This is crucial for stability, especially in windy conditions.

### Visual Aids for Assembly:

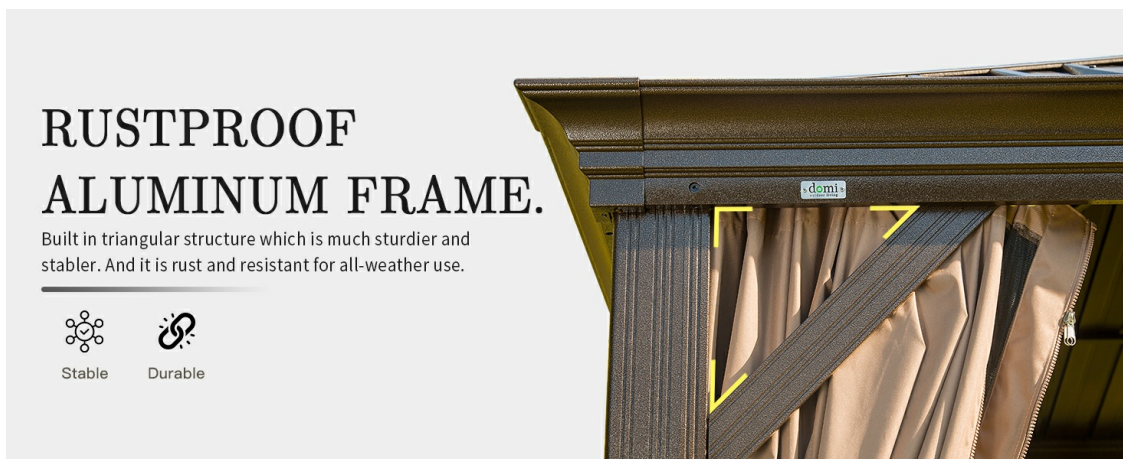

Figure 2: Detail of the stable anchoring stands with pre-drilled holes for secure ground attachment.

## DOUBLE TRACK DESIGN.

Designed with two tracks, the netting can help you away from disturb. Meanwhile, it provides you a view for outside. Polyester sidewall can create a privacy room.

## Operating Instructions

### Curtains and Netting:

The gazebo features a convenient double-track system. The inner track is for the mosquito netting, and the outer track is for the privacy curtains. Both have double-sided zippers for easy operation from inside or outside the gazebo. You can choose to have them fully open, semi-open, or completely closed based on your needs for ventilation, privacy, or insect control.

### Ceiling Hooks:

The gazebo is equipped with ceiling hooks. These hooks are designed to support various items such as decorative lights, fans, or heaters, allowing you to customize your outdoor living space for comfort and ambiance.

## STABLE ANCHORING STANDS.

With pre-drilled holes, you could fix the pole to the ground or lawn using suitable stakes (Stakes are not included).

## Maintenance

Regular maintenance will help prolong the life and appearance of your gazebo.

- **Frame:** Clean the aluminum frame with mild soap and water. Rinse thoroughly and dry to prevent water spots. Avoid abrasive cleaners.
- **Roof Panels:** The galvanized steel roof is designed for durability. Periodically inspect for debris and clean as needed with a soft brush and water.
- **Curtains and Netting:** These are made from durable synthetic fabric. They can be spot cleaned with mild soap and water. For deeper cleaning, follow specific care instructions on the fabric tags if available. Ensure they are completely dry before zipping up for extended periods to prevent mildew.
- **Winter Care:** For prolonged lifespan, especially in areas with heavy snow, consider purchasing the recommended winter cover (B0DCNL6WR3) to protect the gazebo structure.

## Troubleshooting

- **Assembly Difficulties:** If parts do not align, ensure all screws are loosely fitted before tightening any. This allows for minor adjustments. Refer to the instruction manual's diagrams carefully.
- **Missing/Damaged Parts:** In case of missing or damaged components upon delivery, contact customer support immediately for assistance.
- **Water Leakage:** Ensure all roof panels are correctly installed and screws are tightened. The integrated drainage system should effectively channel water. If leaks persist, inspect seals and connections.
- **Wind Stability:** Always ensure the gazebo is securely anchored to the ground. In anticipation of high winds (exceeding 40 MPH), it is recommended to remove curtains and netting and consider temporary disassembly if necessary.

## Specifications

| Attribute              | Detail                                            |
