## TROUBLESHOOTING

If you encounter any issues with your dining set, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Furniture wobbles or is unstable.	Loose bolts or uneven surface.	Ensure all assembly bolts are fully tightened. Move furniture to a flat, level surface.
Tabletop not completely flat.	Manufacturing variation or assembly issue.	While minor variations can occur, ensure the table legs are evenly tightened. If significant, contact customer support.
Fading or discoloration of frame.	Prolonged exposure to harsh UV rays or weather.	The frame is UV-resistant, but extreme conditions over time can affect finish. Consider using a furniture cover when not in use for extended periods.
