3. SETUP AND INSTALLATION

Before beginning installation, ensure your workspace is clean and static-free. Always handle the motherboard by its edges to avoid damaging components.

3.1 CPU Installation

Carefully open the CPU socket lever. Align the triangular mark on your AMD AM4 processor with the corresponding mark on the socket. Gently place the CPU into the socket without forcing it. Once seated, close

the lever to secure the CPU.

3.2 RAM Installation

This motherboard supports DDR4 memory. Open the clips on both ends of the DIMM slots. Align the notch on the RAM module with the key in the DIMM slot. Press down firmly on both ends of the RAM module until the clips snap into place. For optimal performance, install memory modules in a dual-channel configuration as recommended in the Quick Installation Guide.

3.3 Storage Installation

The motherboard provides multiple storage options:

- **SATA Drives:** Connect your SATA hard drives or SSDs to the 6 SATA3 ports using SATA data cables.
- **M.2 SSDs:** The motherboard features one Ultra M.2 slot (PCIe Gen3 x4) and one M.2 slot (PCIe Gen3 x2 & SATA3). Insert your M.2 SSD into the appropriate slot and secure it with the provided M.2 screw.

3.4 Graphics Card Installation

Insert your graphics card into one of the PCIe 3.0 x16 slots. Ensure it is firmly seated and secure it with the case's retention mechanism. Connect any necessary PCIe power cables from your power supply to the graphics card.
