Follow these steps to properly attach the hose pipe to your Euroclean vacuum cleaner and its accessories.

1. **Identify Connection Points:** Locate the suction inlet and blower outlet ports on your Euroclean vacuum cleaner. These are typically circular openings designed for hose attachment.
2. **Attach to Vacuum Cleaner:** Insert one end of the hose pipe firmly into the desired port (suction or blower) on the vacuum cleaner. Ensure it clicks or twists securely into place to prevent air leakage during operation.

3. **Attach Accessories:** Connect your desired vacuum cleaner accessories (e.g., nozzles, brushes) to the free end of the hose pipe. Push and twist until the accessory is snug.

3. OPERATING INSTRUCTIONS

Once the hose pipe is securely attached, operate your Euroclean vacuum cleaner as per its original instruction manual. The hose pipe facilitates the transfer of air for both vacuuming (suction) and blowing functions.

- **Suction Mode:** Connect the hose to the vacuum cleaner's suction inlet. Use appropriate attachments for cleaning various surfaces.
- **Blower Mode:** Connect the hose to the vacuum cleaner's blower outlet. This function can be used for tasks such as blowing dust from hard-to-reach areas.

Always ensure the vacuum cleaner is switched off before connecting or disconnecting the hose or accessories.

4. MAINTENANCE

Regular maintenance helps prolong the life of your hose pipe and ensures efficient operation.

- **Cleaning:** Periodically inspect the inside of the hose for blockages. If necessary, clear any debris using a long, flexible tool or by flushing with water (ensure it is completely dry before reattaching to the vacuum cleaner).
- **Inspection:** Check the hose pipe for any cracks, tears, or punctures. Damaged hoses can lead to loss of suction or blower power. Replace if significant damage is found.

- **Storage:** Store the hose pipe coiled loosely in a dry place, away from direct sunlight or extreme temperatures, to prevent material degradation. Avoid sharp bends or kinks during storage.
