Modelones Dip Powder Nail Kit

Modelones Dip Powder Nail Kit Instruction Manual

Model: Dip Powder Nail Kit

1. PRODUCT OVERVIEW

The Modelones Dip Powder Nail Kit provides a comprehensive solution for achieving salon-quality manicures at home. This kit includes a variety of dip powders, essential liquids, and tools for a complete nail dipping system.

Image: Overview of the Modelones Dip Powder Nail Kit, showing various colored powders, activator, and base/top coat bottles.

Kit Contents:

- 30 x Dip Powder Colors (0.28 oz. each)
- 4 x Dip Liquid System Essentials (0.34 oz. each):
 - Base Coat
 - Top Coat
 - Activator
 - Brush Saver
- 8 x Dip Nail Tools:
 - Nail File
 - Nail Brush
 - Nail Buffer
 - Cuticle Oil
 - Cuticle Pusher
 - Nail Stick

- 2 x Replacement Brush Heads

2. SETUP AND PREPARATION

Proper nail preparation is crucial for optimal adhesion and longevity of your dip powder manicure.

1. **Clean Nails:** Ensure nails are clean, dry, and free of any oils or old polish.
2. **Shape Nails:** Use the provided nail file to shape your nails to your desired length and form.
3. **Push Back Cuticles:** Gently push back cuticles using the cuticle pusher.
4. **Buff Nail Surface:** Lightly buff the nail surface with the nail buffer to create a slightly rough texture for better adhesion. Remove any dust with the nail brush.

SALON QUALITY & NAIL-FRIENDLY

11 TOXIN-FREE CRUELTY-FREE & VEGAN LOW SMELL

FORMULATED WITHOUT

Formaldehyde-resin	Parabens	Campher
Dibutyl-Phthalate	Formaldehyde	Xylene
Ethyl-Tosylamide	Bisphenol-A	Sulfates
Triphenyl-Phosphate	Toluene	

Image: Illustration highlighting the 11 toxin-free ingredients and nail-friendly aspects of the dip powder system.

3. APPLICATION INSTRUCTIONS

Follow these steps for a successful dip powder application. No UV/LED lamp is required as the system air-dries.

Image: Visual guide demonstrating the three main steps of dip powder application: applying base, dipping in powder, and applying top coat.

1. **Apply Base Coat:** Apply a thin, even layer of the Base Coat to one nail.
2. **Dip in Powder:** Immediately dip the entire nail into the desired Dip Powder color. Gently brush off any excess powder with the nail brush. Allow to air dry for 60 seconds.
3. **Repeat (Optional):** For deeper color or added strength, repeat steps 1 and 2 once or twice.
4. **Apply Activator:** Apply a layer of Activator to all nails. Allow to air dry for 60 seconds. This hardens the powder.
5. **Shape and Buff:** After the Activator has dried, gently file and buff the nails to refine the shape and smooth the surface. Remove dust.
6. **Apply Top Coat:** Apply a thin layer of Top Coat to seal the manicure and provide shine. Allow to air dry for 60 seconds.
7. **Final Activator (Optional):** For extra shine and durability, some users prefer a second thin layer of Activator after the Top Coat, followed by another Top Coat layer.
8. **Cuticle Oil:** Finish by applying cuticle oil to moisturize the cuticles.

Important Tips:

- Shake and loosen Dip Powder before use, as powder may settle over time.
- Always brush parallel to the nail to ensure bristles do not indent the powder.
- Dip at a 45-degree angle and pull straight back out. Avoid pushing the nail against the powder.
- Ensure each layer is completely dry before applying the next to prevent smudging or lifting.

4. MAINTENANCE AND REMOVAL

Maintaining Your Manicure:

- The Modelones dip powder manicure is designed to last for 28+ days with proper application.

- Regularly apply cuticle oil to keep cuticles moisturized and healthy.
- Avoid using nails as tools to prevent chipping or breaking.

Brush Saver:

The kit includes a Brush Saver liquid. If any of your liquid brushes (Base, Top, Activator) harden during use, swap the hardened brush with a clean brush from the Brush Saver bottle. Place the hardened brush into the Brush Saver bottle to clean it for future use.

Removal Process:

For hassle-free removal, the dip powder can be soaked off. While specific detailed steps are not provided in this manual, a common method involves:

1. **File Top Layer:** Gently file off the shiny top coat layer to break the seal.
2. **Soak Nails:** Soak nails in acetone for 10-15 minutes. This can be done by wrapping cotton balls soaked in acetone on each nail with foil, or by submerging fingertips in a bowl of acetone.
3. **Gently Scrape:** After soaking, the softened dip powder should be easy to gently scrape off with a cuticle pusher or wooden stick. Avoid harsh scraping to protect the natural nail.
4. **Moisturize:** After removal, wash hands and apply cuticle oil and hand cream to rehydrate nails and skin.

5. TROUBLESHOOTING

Issue	Possible Cause / Solution
Nails chipping or cracking quickly	<ul style="list-style-type: none"> • Ensure proper nail preparation, including buffing the nail surface. • Apply thin, even layers of Base Coat and Top Coat. • Ensure sufficient layers of dip powder for strength (2-3 layers recommended). • Allow adequate drying time between each step.
Brushes hardening	<ul style="list-style-type: none"> • This is common if powder gets into the liquid. Use the provided Brush Saver. • Immediately swap the hardened brush with a clean one from the Brush Saver bottle. • Clean the hardened brush in the Brush Saver for future use.
Uneven application / Bumps	<ul style="list-style-type: none"> • Ensure Base Coat is applied thinly and evenly. • Gently tap off excess powder after dipping. • File and buff the nail surface after Activator application to smooth out any imperfections before applying Top Coat.
Powder not adhering well	<ul style="list-style-type: none"> • Ensure nails are completely clean and dry before starting. • Lightly buff the nail surface to create a porous base. • Apply Base Coat quickly and dip immediately.

6. PRODUCT SPECIFICATIONS
