## SAFETY INFORMATION

---

Please read and understand all instructions before installation and use. Keep this manual for future reference.

- Ensure the mounting surface is clean, dry, and free from grease or dust before installation.
- Do not exceed the maximum recommended load of 33 kg per mounting loc.
- Avoid placing fragile or valuable items on the shelf until a secure hold is confirmed.
- This product is intended for indoor use in bathrooms or similar environments.

## SETUP AND INSTALLATION

---

The WENKO Vacuum-Loc system allows for quick and secure installation without drilling. Follow these steps carefully:

1. **Prepare the Surface:** Clean the desired mounting surface thoroughly. It must be airtight, flat, and free of dirt, dust, and grease.

2. **Fix the Vacuum Adapter:** Press the Vacuum-Loc adapter firmly against the chosen surface in the corner where the shelf will be installed.
3. **Create the Vacuum:** Place the supplied pump against the Vacuum-Loc adapter. Pull out the pump piston until a loud 'plop' sound is heard. Repeat this process 4 times for each adapter to ensure a strong vacuum.
4. **Attach the Shelf:** Once both Vacuum-Loc adapters are securely installed, attach the corner shelf to the adapters. Ensure it clicks into place firmly.
5. **Test Security:** Gently pull on the shelf to confirm it is securely attached before placing items on it. Each mounting loc can hold up to 33 kg of tensile force.

**To Release the Vacuum-Loc:** Open the valve on the adapter to release the vacuum. The loc can then be removed without leaving any residue and repositioned as needed.

## MAINTENANCE

---

To ensure the longevity and appearance of your WENKO Bari Corner Shelf:

- Clean the shelf regularly by wiping it with a dry cloth.
- Avoid using abrasive cleaners or harsh chemicals, as these may damage the matte black finish.
- Periodically check the Vacuum-Locs for secure attachment. If the hold weakens, simply re-apply the vacuum using the pump.

## TROUBLESHOOTING

---

If you encounter issues with your WENKO Vacuum-Loc Bari Corner Shelf, consider the following:

- **Shelf is not holding securely:**
  - Ensure the mounting surface is clean, dry, and airtight. Porous or heavily textured surfaces are not

suitable.

- Re-apply the vacuum using the pump, ensuring you hear the 'plop' sound 4 times for each loc.
- Check if the valve on the Vacuum-Loc is fully closed after pumping.
- **Difficulty attaching the shelf to the adapters:**
  - Ensure the adapters are correctly oriented and aligned with the shelf's mounting points.
  - Apply gentle, even pressure until the shelf clicks into place.
