UYIKOO Mini Hidden Spy Camera 1080P HD User Manual

Model: Mini Hidden Spy Camera 1080P HD | Brand: UYIKOO

1. INTRODUCTION

Thank you for choosing the UYIKOO Mini Hidden Spy Camera. This compact device, designed to resemble a car key fob, offers high-definition 1080P video recording, motion detection, night vision, and audio recording capabilities. It is ideal for discreet surveillance and capturing important moments. This manual provides detailed instructions to help you set up, operate, and maintain your camera effectively.

2. PRODUCT OVERVIEW AND COMPONENTS

Familiarize yourself with the various parts and controls of your UYIKOO Mini Hidden Spy Camera.

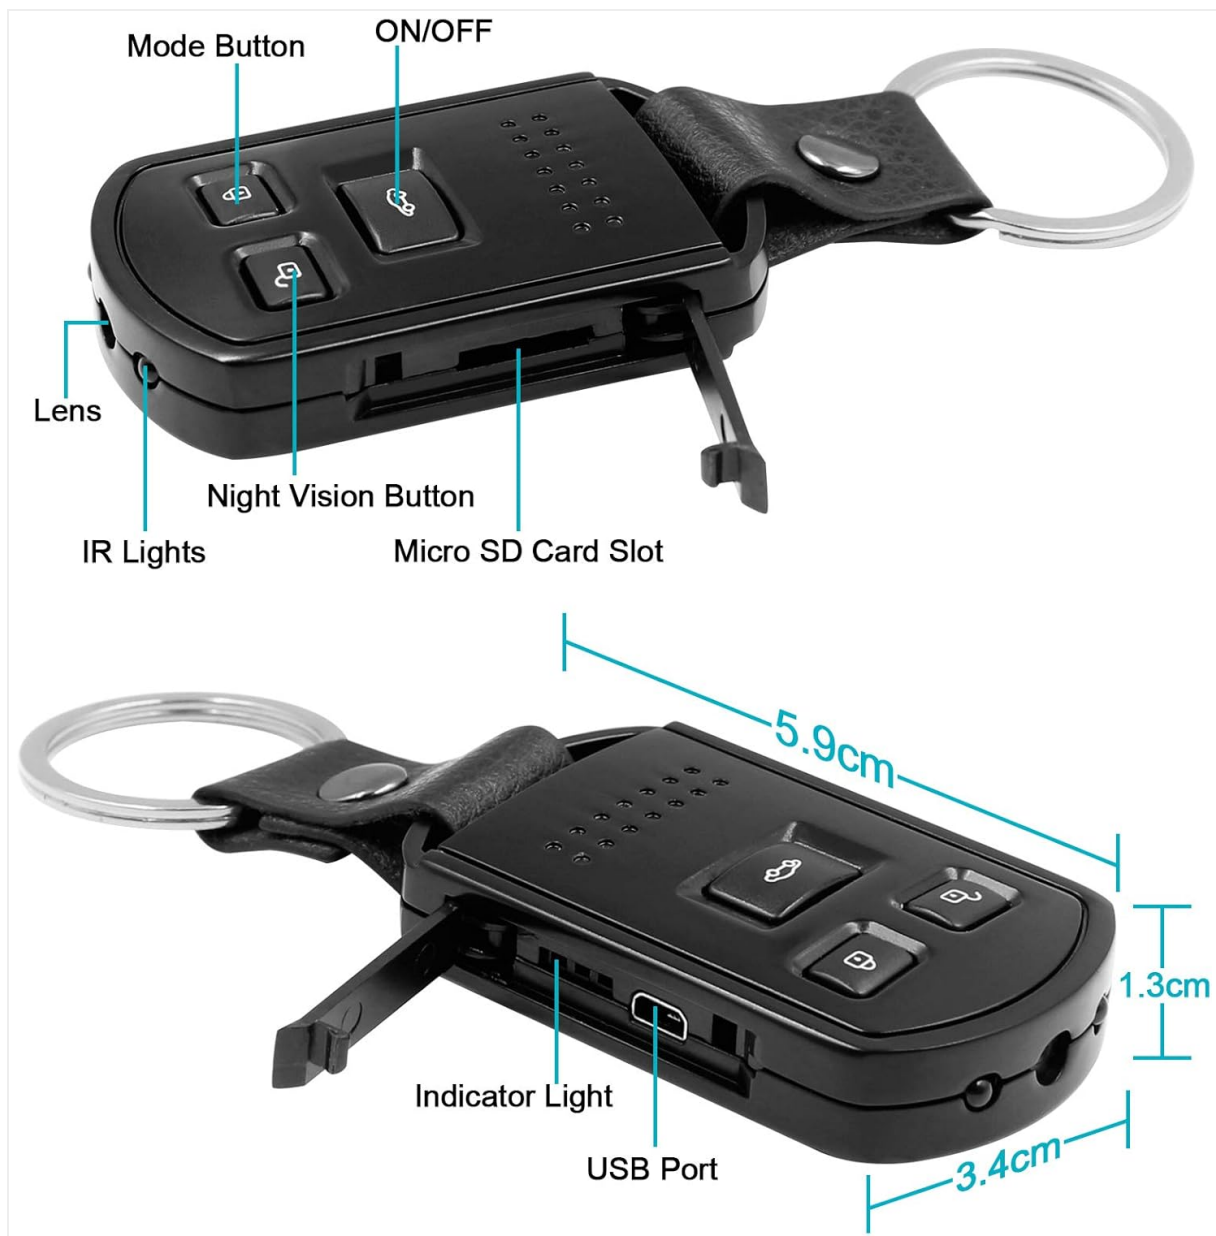

Image 2.1: Detailed view of the camera's components and controls.

- **ON/OFF Button:** Powers the device on or off.
- **Mode Button:** Switches between different recording modes (e.g., video, motion detection, audio).
- **Night Vision Button:** Activates or deactivates infrared night vision.
- **Lens:** The camera's recording lens.
- **IR Lights:** Infrared lights for night vision functionality.
- **Micro SD Card Slot:** Insert your Micro SD card here (supports up to 32GB).
- **USB Port:** For charging the device and connecting to a computer for file transfer.
- **Indicator Light:** Provides status feedback (e.g., power on, recording, charging).

3. SETUP

3.1. Inserting the Micro SD Card

Before using the camera, you must insert a Micro SD card (not included) into the designated slot. The camera supports cards up to 32GB. Ensure the card is inserted correctly with the gold contacts facing the correct direction, as indicated by the diagram on the device or in the manual. A click sound usually confirms proper insertion.

3.2. Initial Charging

For optimal performance, fully charge the camera before its first use. Connect the camera to a USB power source using the provided USB cable. The indicator light will typically show a specific color or pattern during charging and change when fully charged. A full charge provides up to 70 minutes of continuous operation.

4. OPERATING INSTRUCTIONS

4.1. Power On/Off

- **To Power On:** Press and hold the ON/OFF button until the indicator light illuminates.
- **To Power Off:** Press and hold the ON/OFF button again until the indicator light turns off.

4.2. 1080P HD Video Recording

Once the camera is powered on, press the Mode button to select video recording mode. Press the ON/OFF button briefly to start recording. The indicator light will flash to confirm recording is in progress. Press the ON/OFF button again to stop recording and save the file.

4.3. Motion Detection Recording

To activate motion detection, power on the camera and then press the Mode button until the indicator light shows the specific pattern for motion detection mode. Once activated, the camera will only record when motion is detected, conserving battery life and storage space. Recording will automatically stop when motion ceases and resume when detected again.

5. FILE MANAGEMENT

To access and manage your recorded files, you have two primary options:

- **Direct USB Connection:** Connect the camera to your computer using the provided USB cable. The camera will appear as a removable disk, allowing you to copy, move, or delete files.
- **Micro SD Card Reader:** Remove the Micro SD card from the camera and insert it into a card reader. Connect the card reader to your computer to access the files.

Built-in Rechargeable Battery

6. CHARGING THE DEVICE

The UYIKOO Mini Hidden Spy Camera features a built-in rechargeable lithium-ion battery. To charge, connect the camera to any standard USB power source using the included USB cable. This can include:

- A computer's USB port.
- A USB wall adapter.
- A power bank.
- A car charger with a USB port.

The indicator light will signal the charging status. The device supports recording while charging, offering extended operational time when connected to a continuous power source.

7. TROUBLESHOOTING

If you encounter issues with your UYIKOO Mini Hidden Spy Camera, please refer to the following common problems and solutions:

- **Camera does not turn on:**

- Ensure the battery is fully charged. Connect to a power source and allow sufficient charging time.
- Try resetting the device (if a reset button is available, refer to the product diagram).
- **Camera does not record:**
 - Check if a Micro SD card is properly inserted.
 - Ensure the Micro SD card has sufficient free space.
 - Verify the Micro SD card is formatted correctly (FAT32 is usually recommended).
 - Confirm you are in the correct recording mode (video, motion detection, audio).
- **Poor video/audio quality:**
 - Ensure the lens is clean and free from smudges or dust.
 - Record in well-lit environments for best video quality, or ensure night vision is properly activated in low light.
 - Ensure the microphone is not obstructed for clear audio.
- **Battery drains quickly:**
 - Ensure the camera is fully charged before use.
 - Continuous recording consumes more battery than motion detection.
 - Battery performance can degrade over time; consider replacing the device if it's significantly old.
- **Micro SD card not recognized or not fitting:**
 - Ensure the card is inserted in the correct orientation.
 - Use a high-quality Micro SD card from a reputable brand.
 - Verify the card capacity does not exceed 32GB.

If these steps do not resolve your issue, please contact UYIKOO customer support for further assistance.
