AMBITFUL FW60x90

AMBITFUL FW60x90 60x90cm Honeycomb Grid Bowens Softbox Instruction Manual

Model: FW60x90 | Brand: AMBITFUL

1. Product Overview

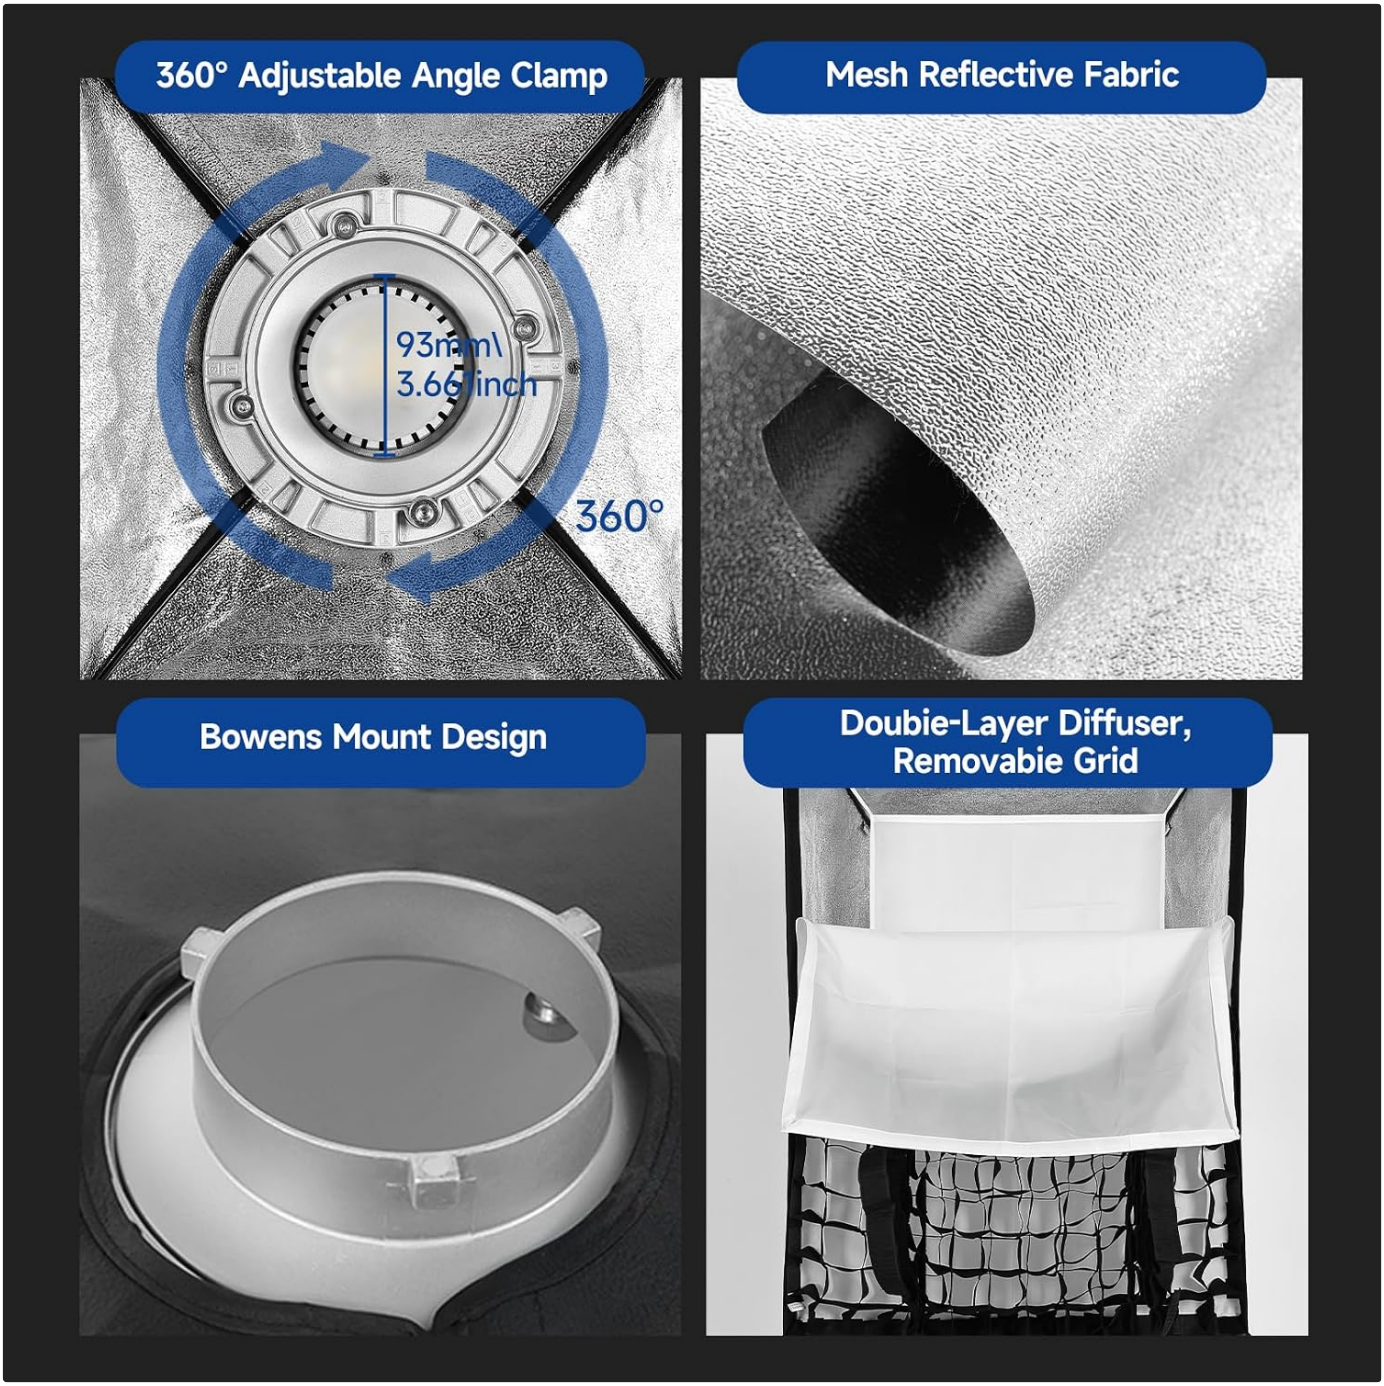

The AMBITFUL FW60x90 Softbox is designed to provide soft, diffused lighting for photography and videography. It features a Bowens mount for compatibility with various studio lights and includes a removable honeycomb grid for light control.

This image illustrates the overall dimensions of the AMBITFUL FW60x90 softbox, showing its width, height, and depth.

Key Features:

- Foldable design for easy setup and storage.
- S-type bracket compatible with most Speedlite flashes.
- Honeycomb grid for light softening and direction control.
- Includes a carrying case for portability.
- Professional reflective fabric for soft and full light output.

This image highlights key features of the softbox, including the adjustable angle clamp for precise positioning, the highly reflective mesh interior, the standard Bowens mount for compatibility, and the dual diffusion layers with a removable honeycomb grid.

2. What's in the Box

Verify that all components are present before proceeding with assembly.

- Softbox (x1)
- Bowens Mount (x1)
- Support Rods (x4)
- Outer Soft Light Cloth (x1)
- Inner Soft Light Cloth (x1)
- Honeycomb Grid (x1)

- Storage Bag (x1)

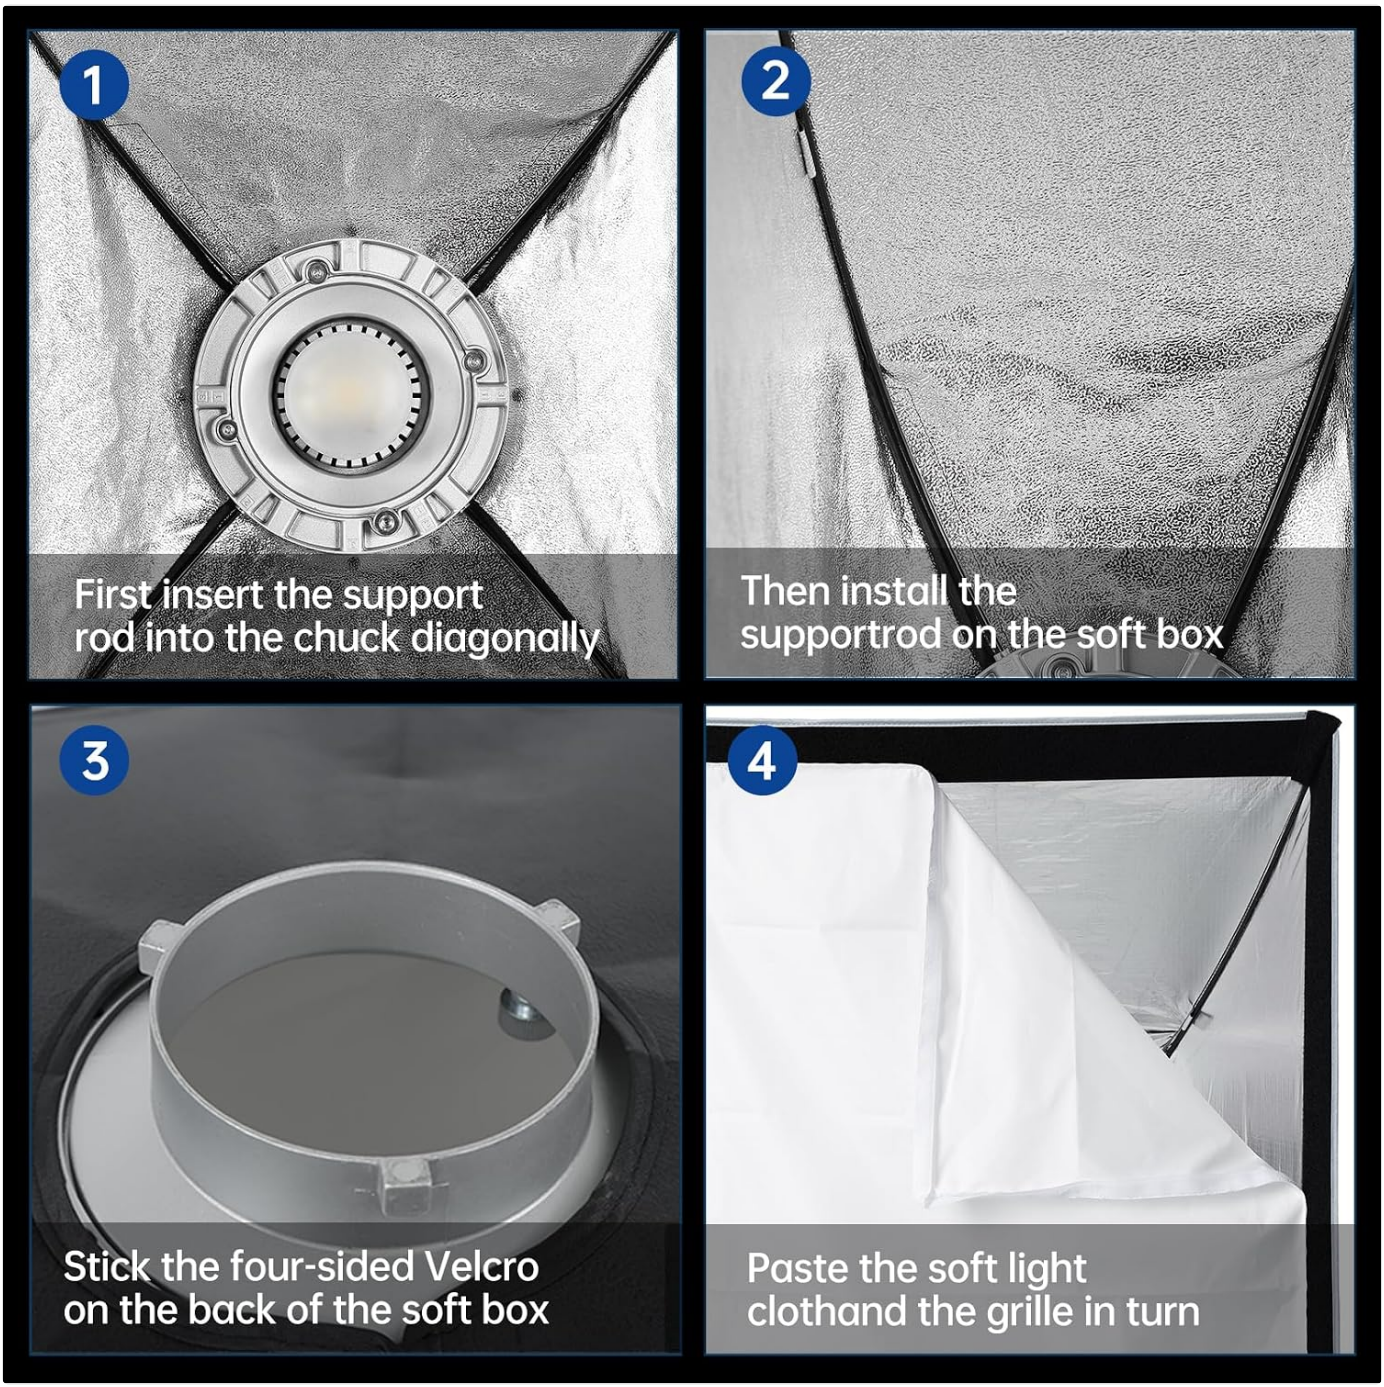

This image displays all components included in the package: the softbox, Bowens mount, four support rods, an outer soft light cloth, an inner soft light cloth, a honeycomb grid, and a storage bag.

3. Setup Instructions

Follow these steps to assemble your AMBITFUL FW60x90 Softbox:

1. **Insert Support Rods:** Carefully insert each of the four support rods diagonally into the designated chuck points on the softbox. Ensure they are securely seated.
2. **Install Softbox on Mount:** Attach the softbox to the Bowens mount by aligning the mount with the softbox opening and securing it. The four-sided Velcro on the back of the softbox should be used to further secure the mount.
3. **Attach Inner Diffuser:** Secure the inner soft light cloth inside the softbox using the attached fasteners. This layer helps to further soften the light.
4. **Attach Outer Diffuser/Honeycomb Grid:** Depending on your lighting needs, attach either the outer soft light cloth

or the honeycomb grid to the front of the softbox using the Velcro strips. The honeycomb grid provides more directional light and reduces spill.

This visual guide details the assembly process: 1. Insert support rods diagonally into the chuck. 2. Install the softbox onto the support rods. 3. Secure the four-sided Velcro on the back of the softbox. 4. Attach the soft light cloth and grid in sequence.

Official product video demonstrating the assembly and features of the AMBITFUL FW60X90 Softbox.

4. Operating Instructions

Once assembled and mounted to your Bowens-compatible light source, the softbox is ready for use. The primary function of the softbox is to diffuse and soften the light, creating a more even and flattering illumination.

Using the Honeycomb Grid:

The included honeycomb grid attaches to the front of the softbox via Velcro. It helps to narrow the beam of light, preventing light spill and providing more directional control. This is particularly useful for creating dramatic lighting effects or isolating your subject from the background.

This image demonstrates the effect of the honeycomb grid. On the left, the grid provides more directional light and enhanced contrast. On the right, without the grid, the light is softer and more spread out.

Adjusting Light Softness:

The softbox comes with two diffusion layers. You can use both layers for maximum softness, or remove one or both layers to achieve a harder light quality, depending on your creative needs.

5. Maintenance

To ensure the longevity and optimal performance of your softbox, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to gently wipe down the exterior and interior reflective surfaces. For stubborn marks, a slightly damp cloth with mild soap can be used, ensuring to dry thoroughly afterward. Do not use harsh chemicals or abrasive materials.
- **Storage:** When not in use, disassemble the softbox and store it in the provided carrying bag. This protects it from dust, dirt, and potential damage.
- **Handling:** Avoid excessive force when assembling or disassembling the softbox, especially with the support rods, to prevent bending or breakage.

The image shows the softbox folded and stored in its carrying bag, emphasizing its compact and portable design for easy transport.

6. Troubleshooting

If you encounter issues with your softbox, consider the following:

- **Difficulty Assembling:** The initial assembly of the softbox, particularly inserting the support rods, can sometimes require patience. Ensure the rods are inserted diagonally and fully seated into the chuck. Refer to the setup instructions and video for visual guidance.
- **Light Leakage:** Check that all Velcro seams are properly sealed and that the diffusion layers and honeycomb grid are securely attached to prevent unwanted light leakage.
- **Unstable Setup:** Always use a sturdy light stand capable of supporting the weight of both the softbox and your light fixture. Ensure the stand's legs are fully extended and locked.

7. Specifications

Brand	AMBITFUL
Model Number	Glimmer-soft
Product Dimensions (D x W x H)	12.91"D x 23.62"W x 35.43"H (approx. 32.8cm D x 60cm W x 90cm H)
Material	Polyvinyl Chloride or Polyester, Aluminum
Color	Black
Light Source Compatibility	Flash, Continuous (Bowens mount lamps)
Built-In Media	Honeycomb grid, S-type bracket, carrying case, foldable design
UPC	744337294403

8. Warranty Information

This product comes with no stated warranty. Please refer to the retailer's return policy for details on returns or exchanges.
