# BePuzzled Disney Stitch 3D Crystal Puzzle Instruction Manual

Model: 31094

## INTRODUCTION

Welcome to the world of BePuzzled 3D Crystal Puzzles! This manual provides comprehensive instructions for assembling your Disney Stitch 3D Crystal Puzzle. Designed for puzzlers aged 12 and up, this unique puzzle offers a challenging yet rewarding experience, culminating in a beautiful, translucent display piece.

The BePuzzled 3D Crystal Puzzles feature uniquely shaped, interlocking, translucent crystalline pieces that transform into a stunning three-dimensional figure. Enjoy the process of bringing Stitch to life!

## PRODUCT OVERVIEW

The Disney Stitch 3D Crystal Puzzle is a brain-teasing activity that results in a decorative item. Key features include:

- **Challenging Assembly:** Designed to engage and stimulate problem-solving skills.
- **Beautiful Display:** Once completed, the translucent pieces create a visually stunning, crystal-like figure perfect for display.
- **Precision-Molded Pieces:** Each piece is crafted for a flawless and secure fit.
- **Collectible Series:** Part of a larger collection of over 150 unique 3D Crystal Puzzle designs.

## What's in the Box

Your BePuzzled Disney Stitch 3D Crystal Puzzle package contains:

- 1 Crystal Puzzle (consisting of 43 precision-molded, translucent pieces)
- 1 Display Base (for the assembled puzzle)
- Instruction Sheet (this manual)

## Setup

1. **Unpack Components:** Carefully remove all puzzle pieces and the display base from the packaging.
2. **Organize Pieces:** Lay out all the translucent pieces on a clean, flat surface. It can be helpful to group similar-looking pieces or

pieces with distinct features.

3. **Review Instructions:** Familiarize yourself with the general shape of the assembled puzzle and identify any key pieces that might form a core or base structure.

Image: A person's hands sorting the clear, translucent puzzle pieces on a glass table, preparing for assembly.

## OPERATION (ASSEMBLY)

Assembling the 3D Crystal Puzzle requires patience and attention to detail. The pieces interlock in a specific sequence to form the final figure. There is no single correct starting point, but many puzzlers find it helpful to begin with a central or base section.

1. **Identify Core Pieces:** Look for pieces that appear to form the central structure or base of the Stitch figure. These often have multiple connection points.
2. **Interlock Carefully:** Gently push pieces together. They should fit snugly without excessive force. If a piece doesn't fit, try rotating it or looking for an alternative connection point.
3. **Build Layer by Layer:** The puzzle is often built in layers or sections. Work methodically, ensuring each piece is securely interlocked before adding the next.

4. **Utilize Visual Cues:** The shape and curvature of the pieces will guide you. Pay attention to how the pieces form the contours of Stitch's body, head, and ears.
5. **Ears and Extremities:** Pieces forming the ears and other extremities may be among the last to be attached, as they often connect to the main body structure.
6. **Final Assembly:** Once all pieces are interlocked, carefully place the completed Stitch figure onto its designated display base.

## MAINTENANCE

---

To keep your BePuzzled Disney Stitch 3D Crystal Puzzle looking its best:

- **Cleaning:** Gently wipe the assembled puzzle with a soft, dry, lint-free cloth to remove dust. Avoid using abrasive cleaners or harsh chemicals, as these can scratch or damage the translucent plastic.
- **Storage:** If disassembling for storage, keep all pieces together in a secure container to prevent loss. Store in a cool, dry place away from direct sunlight to prevent discoloration.
- **Handling:** Handle the puzzle by its base or main body to avoid putting stress on individual interlocking pieces.

## Troubleshooting

While assembling the puzzle, you might encounter some common challenges:

| Problem                                | Solution                                                                                                                                                                                                                                                                                |
|----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Pieces do not fit together.            | Ensure you are using the correct pieces for that section. Try rotating the piece; sometimes the orientation is critical. Refer to the visual guides or online solutions if available.                                                                                                   |
| Puzzle feels unstable during assembly. | This is common with 3D puzzles. Continue adding pieces, as the structure will become more stable as more pieces interlock. Patience is key. Some users may opt for a small amount of clear adhesive on internal, non-visible joints for permanent display, though this is not required. |
| Missing pieces.                        | Carefully check your work area and packaging. If pieces are genuinely missing, contact BePuzzled customer support (see Warranty & Support section).                                                                                                                                     |

For additional assistance or step-by-step solutions, you can often find resources on the manufacturer's website: [ugames.com/instructions.asp](http://ugames.com/instructions.asp).

## Specifications

- **Product Dimensions:** 1.75 x 3.75 x 5.75 inches
- **Item Weight:** 4.8 ounces
- **Country of Origin:** China
- **Item Model Number:** 31094
- **Manufacturer Recommended Age:** 12 years and up
- **Number of Pieces:** 43
- **Material:** Translucent Plastic
