2. **Assemble Lower Frame:** Connect the lower vertical metal frame pieces. Ensure all connections are finger-tight before fully tightening.
3. **Attach Crossbars:** Secure the X-frame crossbars to the lower frame. For easier placement behind a toilet, consider attaching the bottom screws of the crossbars to the main posts, but leave the top screws loose until the lower section is positioned.
4. **Position Lower Section:** Carefully slide the assembled lower section behind your toilet.
5. **Complete Crossbar Attachment:** Once the lower section is in place, hand-tighten the top screws of the crossbars to the main posts.
6. **Install Lower Shelf:** Place the lowest wooden shelf board onto the designated supports.
7. **Assemble Upper Frame:** Attach the upper vertical metal frame pieces to the lower frame.
8. **Install Remaining Shelves:** Place the middle and top wooden shelf boards onto their respective supports.
9. **Attach Hooks:** Secure the four hanging hooks to the side bars as desired.
10. **Final Tightening:** Once all components are in place, systematically tighten all screws and bolts using the provided Allen wrench. Do not overtighten.
11. **Install Anti-Falling Device:** Secure the anti-falling device to the top of the rack and then to the wall using appropriate wall anchors. This step is crucial for stability and safety.
12. **Adjust Foot Pads:** Adjust the foot pads at the bottom of the unit to ensure the rack is level and stable on your floor.
