WHAT'S IN THE BOX

Your package should contain the following items:

- Car Stereo
- Camera
- Mic
- Cable set (including power cable, RCA cables, USB cables, GPS antenna, rear camera cable)
- Brackets
- User Manual

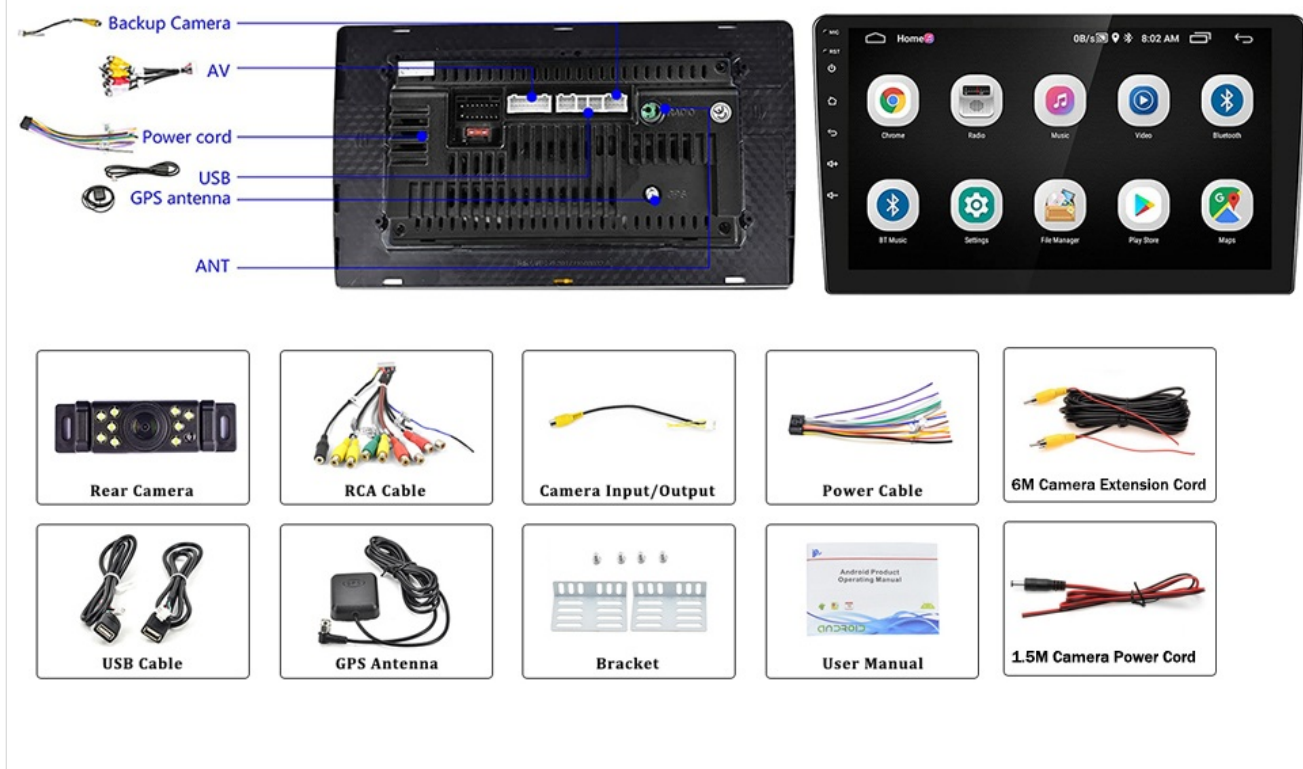

Image: All components included in the product package.

SETUP

Before installation, ensure your vehicle's power is disconnected. Professional installation is recommended.

Physical Installation

The car stereo is designed for double DIN slots. Refer to the dimensions below to ensure compatibility with your vehicle's dashboard.

Split Screen Function

You can view two applications on the screen at the same time. With the same screen display, the left or right screen can be operated independently.

Initial Power On

After completing all physical connections, reconnect your vehicle's power. The unit should power on automatically or

by pressing the power button.

Network Connection (WiFi)

To access online features and download applications, connect the head unit to a WiFi network. Navigate to the settings menu, select "WiFi," and choose your desired network. Enter the password if prompted.

GPS Navigation

Built-in GPS navigation, you can download offline navigation directly from the Play Store. After connecting to wifi, the online map can also be used perfectly.

GPS Setup

The unit has built-in GPS navigation. You can download offline navigation maps directly from the Play Store. After connecting to WiFi, online maps can also be used for real-time traffic and updates.

OPERATING INSTRUCTIONS

Mirror Link Function

The Mirror Link feature allows you to project your mobile phone's screen onto the car stereo display. This is ideal for viewing videos or using navigation apps from your phone on the larger screen. Select the "PhoneLink" APP on the

head unit to initiate the connection.

Your browser does not support the video tag.

Bluetooth Connectivity

The unit supports Bluetooth for hands-free calls, synchronizing your address book, and playing music from your mobile phone. Pair your device through the Bluetooth settings on the head unit.

Mirror Link

Connect to the radio, the screen of the mobile phone can be projected onto the radio screen. You can enjoy the video on the big radio screen, etc.

Image: Bluetooth and FM Radio interface.

FM Radio Operation

Enjoy your favorite radio stations with the built-in FM radio, supporting frequencies from 87.5-108 MHz. You can also transmit music to the car stereo through FM.

Steering Wheel Control Function

Control the car audio system using your vehicle's original steering wheel buttons for more convenient and safer operation. The unit supports learning functions for various steering wheel controls.

Steering Wheel Controls

Use the steering wheel control buttons to make the operation more convenient.

Reversing Display

Waterproof night vision camera, reversing image is clearer. Automatically switch the reverse image when in reverse gear.

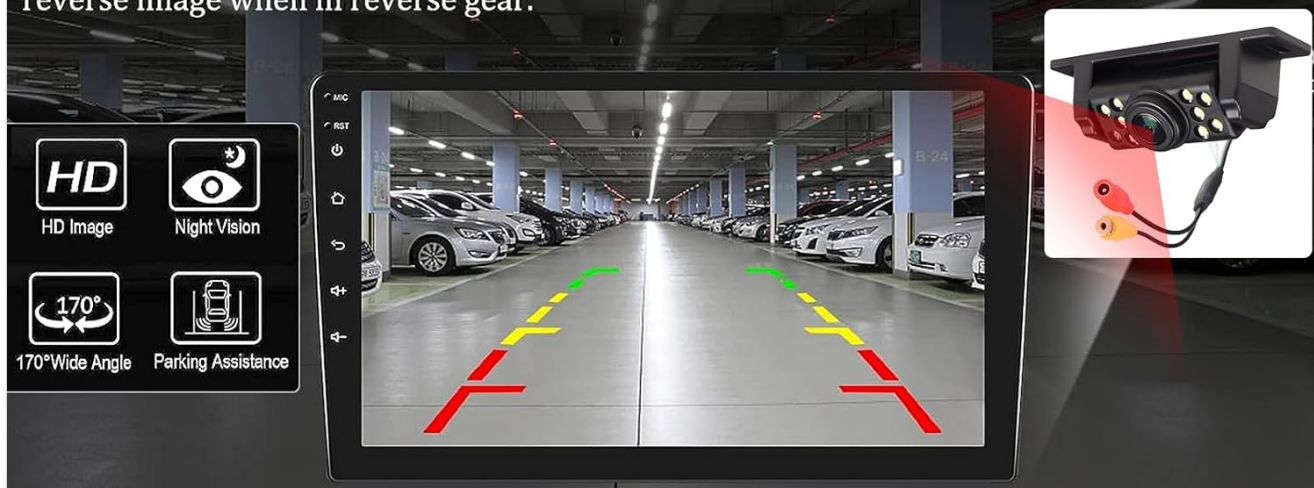

Image: Steering Wheel Controls and Reversing Display.

Backup Camera Display

The included ultra-clear wide-angle backup camera provides a clear reversing line and excellent night vision with 9 bright LED lights. The display automatically switches to the reverse image when the vehicle is in reverse gear, ensuring safer and easier maneuvering.

Split Screen Function

Utilize the split screen feature to view two applications simultaneously. You can operate the left and right screens independently, enhancing multitasking capabilities.

EQ ASP Sound Adjustments

Adjust various popular sound effects to achieve optimal audio quality. The EQ ASP feature improves high and low sounds and surround stereo sound, providing a pleasant and perfect listening experience.

MAINTENANCE

To ensure the longevity and optimal performance of your AMprime car stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the touchscreen and exterior. Avoid abrasive cleaners or solvents that may damage the surface.
- **Temperature:** Do not expose the unit to extreme temperatures. Operating temperature range is -40°C to 80°C.
- **Moisture:** Keep the unit dry. Moisture can cause damage to internal components.
- **Software Updates:** Periodically check for software updates to ensure the system runs efficiently and has the latest features.

TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No Power	Loose power connection, blown fuse.	Check power cables and vehicle fuses. Ensure proper wiring.
No Sound	Volume too low, incorrect audio source, speaker wiring issue.	Increase volume, select correct audio source (FM, Bluetooth, USB), check speaker connections.
GPS Signal Lost	GPS antenna obstruction or faulty connection.	Ensure GPS antenna has a clear view of the sky and is securely connected.
Mirror Link Not Connecting	Incorrect WiFi hotspot settings, app not open on phone.	Verify phone's personal hotspot is active and connected to the head unit. Ensure "PhoneLink" app is open.
Rear Camera Not Displaying	Incorrect camera wiring, faulty camera.	Check camera video input and reverse trigger wire connections. Test camera functionality.

If the problem persists after attempting these solutions, please contact customer support.
