Key features of your Radley Smartwatch include:

- Color screen with crown navigation.

- Up to 7 days of battery life.
- Call and message notifications.
- Real-time activity tracking (running, walking, cycling, climbing).
- Distance, step, and calorie tracking.
- Live weather updates.
- Selfie camera control.
- "Find Your Phone" function.
- Sleep tracking.
- Alarm and reminder functions.
- Hydration alerts.

### **Downloading the Radley London Active App**

To unlock all features and synchronize your smartwatch data, download the free Radley London Active App. The app is compatible with both iOS and Android devices.

1. Scan the QR code provided in your watch's packaging or search for "Radley London Active" in the Apple App Store or Google Play Store.
2. Download and install the app on your smartphone.
3. Open the app and follow the on-screen instructions to create an account and pair your smartwatch via Bluetooth. Ensure Bluetooth is enabled on your phone.

## Call and Message Notifications

Once paired with your smartphone, your smartwatch will display incoming call and message notifications directly on your wrist. You can manage notification settings within the Radley London Active App.

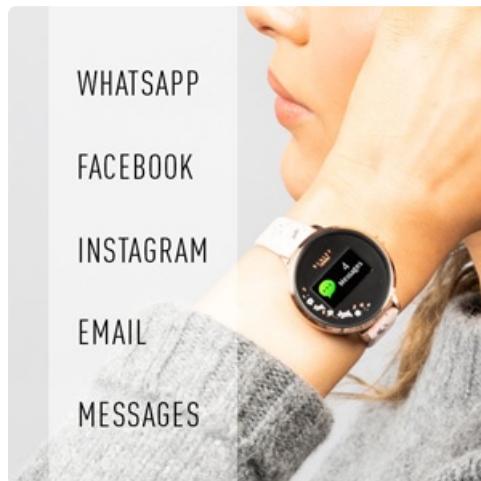

Image: Message Notification on Smartwatch. This image demonstrates how message notifications appear on the smartwatch display.

## Activity Tracking

The smartwatch tracks your daily activities including steps, distance, and calories burned. You can also track specific activities like running, walking, cycling, and climbing in real-time. View detailed statistics in the Radley London Active App.

Image: Activity Tracking Display. This image shows the smartwatch screen displaying current step count and calories burned.

Image: Smartwatch and App Activity Data. This image illustrates how the smartwatch syncs with the app to provide comprehensive activity data.

## Sleep Tracking

Wear your smartwatch to bed to monitor your sleep patterns. The app provides insights into your sleep duration and quality.

## Selfie Camera Control

Use your smartwatch as a remote control for your smartphone's camera to take selfies or group photos with ease.

Image: Camera Control Feature. This image illustrates the smartwatch's ability to remotely control a smartphone camera.

## Find Your Phone

If you misplace your phone, use the "Find Your Phone" feature on your smartwatch to make your phone ring (even if it's on silent mode).

Image: Find Your Phone Feature. This image visually represents the "Find Your Phone" function, showing a user searching for their device.

## Alarms and Reminders

Set alarms and reminders through the app to receive vibrations on your smartwatch for important events or tasks.

## Hydration Alerts

Configure hydration reminders in the app to ensure you stay adequately hydrated throughout the day.

Image: Hydration Alerts. This image shows the smartwatch displaying a hydration reminder, encouraging users to drink water.

## MAINTENANCE

### Cleaning Your Smartwatch

To keep your smartwatch in optimal condition, regularly clean the screen and strap. Use a soft, lint-free cloth. For stubborn marks, slightly dampen the cloth with water. Avoid using harsh chemicals or abrasive materials.

### Battery Care

- Charge the battery fully before first use.
- Avoid exposing the watch to extreme temperatures, as this can affect battery life.
- If the watch will not be used for an extended period, charge it periodically to maintain battery health.

## TROUBLESHOOTING

If you encounter issues with your Radley Smartwatch, refer to the table below for common problems and their solutions.

Problem	Solution
Watch not turning on.	Ensure the watch is fully charged. Connect it to the charger and wait a few minutes.
Cannot pair with smartphone.	Ensure Bluetooth is enabled on your phone. Make sure the watch is within range of your phone. Restart both the watch and your phone. Check the Radley London Active App for pairing instructions.

Problem	Solution
Notifications not appearing.	Verify notification permissions are enabled for the Radley London Active App in your phone's settings. Ensure the app is running in the background. Check the app's notification settings.
Inaccurate activity tracking.	Ensure the watch is worn snugly on your wrist. Calibrate settings within the Radley London Active App if available.

For further assistance, refer to the Radley London Active App or contact customer support.
