AQUA CREST AQU-RF10

AQUA CREST RF10 Water Filter Replacement Manual

Model: AQU-RF10

PRODUCT OVERVIEW

The AQUA CREST RF10 is a replacement water filter designed for use with specific Waterdrop under sink water filtration systems. This filter is engineered to reduce various contaminants, improving water quality for drinking and cooking. It features a multi-stage filtration process and is certified by NSF/ANSI 42 for chlorine, taste, and odor reduction.

Compatible With Waterdröp

WD-10UA

WD-10UB

COMPATIBILITY

This AQUA CREST RF10 undersink water filter is compatible with the following Waterdrop Undersink Water Filtration Systems:

- Waterdrop WD-UA series
- Waterdrop WD-UB series
- Waterdrop WD-UC series

It supports various connection methods, allowing purified water access from your refrigerator, dedicated faucet, or original faucet.

Composite Filtration Layer Thorough Purification

FILTRATION TECHNOLOGY AND BENEFITS

The AQUA CREST RF10 filter utilizes an advanced multi-stage filtration process to effectively reduce a range of contaminants from your water. Key benefits include:

- **Contaminant Reduction:** Designed to reduce heavy metals, sediments, chemical pollutants, chlorine, bad taste, and odors.
- **Certified Performance:** IAPMO-certified against NSF/ANSI 372 for lead-free materials. NSF/ANSI 42 certified for the reduction of chlorine, taste, and odor. It is also BPA-free.
- **Material:** Features an activated carbon block and other advanced filter media for efficient filtration.

INSTALLATION INSTRUCTIONS

The AQUA CREST RF10 filter features a twist-and-lock design for quick and easy replacement. No special tools or technical knowledge are required.

1. **Prepare:** Ensure the water supply to the under sink system is turned off before beginning the replacement process.
2. **Remove Old Filter:** Gently twist the old filter counter-clockwise to unlock it from the filter head. Pull it downwards to remove.
3. **Install New Filter:** Align the new AQUA CREST RF10 filter with the filter head. Push it upwards and twist clockwise until it locks securely into place.
4. **Flush System:** Turn on the water supply. Open the filtered water faucet and allow water to run for approximately 5 minutes to flush the new filter. This removes any carbon fines and air from the system.
5. **Check for Leaks:** Inspect all connections for any signs of leaks.

OPERATING INSTRUCTIONS

Once installed and flushed, the AQUA CREST RF10 filter operates automatically with your compatible Waterdrop under sink system. Simply open your filtered water faucet to dispense purified water.

- **Initial Use:** After installation, run water through the filter for 5 minutes to ensure proper activation and to remove any air or loose carbon particles.
- **Water Flow:** A slight reduction in water pressure is normal with filtration systems.

MAINTENANCE AND FILTER LIFESPAN

For optimal performance and water quality, it is recommended to replace the AQUA CREST RF10 filter every **12 months** or after filtering **11,000 gallons** of water, whichever comes first. Filter lifespan may vary based on local water quality and usage.

Careful Customer Service

Great business is
built on friendship.

TROUBLESHOOTING

If you encounter issues with your water filter system, refer to the following common problems and solutions:

- **Slow Water Flow:**

- Ensure the water supply valve is fully open.
- Check if the filter is correctly seated and locked into the filter head.
- A new filter may require a longer flush time (5-10 minutes) to achieve full flow.
- If the filter is old, it may be clogged and require replacement.

- **Leaks:**

- Ensure all connections are tightened securely.
- Verify the filter is properly installed and twisted into the locked position.
- Check O-rings for proper seating and damage.

- **Unusual Taste or Odor:**

- Ensure the filter has been adequately flushed after installation.
- If the filter is past its recommended lifespan, replace it.
