## 4.2 Connecting Audio Sources

Use RCA cables to connect external audio sources (e.g., DVD player, CD player) to the AUDIO INPUT (DVD/CD) jacks on the rear panel. For other line-level devices, use the appropriate RCA input.

## 4.3 Connecting FM Antenna

Connect the provided FM antenna to the FM ANTENNA port on the rear panel for radio reception.

## 4.4 Power Connection

Connect the power cable to the POWER input on the rear panel and then plug it into a standard AC power outlet.

## 5. OPERATING INSTRUCTIONS

### 5.1 Power On/Off

Press the **POWER** button on the front panel to turn the amplifier on or off. The TFT display will illuminate when

the unit is powered on.

## 5.2 Input Selection

Rotate the **INPUT SELECTOR** knob on the front panel or use the corresponding buttons on the remote control to switch between available input sources: Bluetooth (BT), FM Radio (FM), USB/SD, LINE 1, and LINE 2.

## 6. TROUBLESHOOTING

---

### 6.1 Bluetooth Connection Issues

If you experience issues with Bluetooth connectivity, consider the following:

- Ensure the amplifier is in Bluetooth mode (display shows "BLUE"). Press the "MODE" button if necessary.
- Verify that Bluetooth is enabled on your transmitting device (e.g., mobile phone).
- Search for "MAMP7" in your device's Bluetooth settings and attempt to connect. A beep indicates a successful connection.
- If the connection is unstable, ensure there are no obstacles (especially metal objects) blocking the signal path.
- Try turning off the amplifier, disconnecting and clearing the connection on your Bluetooth device, then attempt to reconnect.
- The amplifier supports only one Bluetooth connection at a time. Connecting multiple devices simultaneously may disrupt the audio stream.
- Bluetooth speakers are receivers and already contain a small power amplifier. Connecting them to the MAMP7 amplifier may cause damage.

### 6.2 External Bluetooth Receiver Connection

If the amplifier's built-in Bluetooth range is insufficient, you can connect an external Bluetooth receiver:

1. Identify an available input port on the amplifier, such as the 3.5mm AUX port or an RCA port (AUDIO INPUT).
2. Connect the output of your external Bluetooth receiver to the chosen input port on the amplifier. Use appropriate adapter cables if necessary.

### 6.3 No Sound Output

- Check all cable connections, especially speaker wires, for secure and correct polarity.
- Ensure the correct input source is selected on the amplifier.
- Increase the MUSIC VOLUME and MIC VOL knobs.
- Verify that the audio source device is playing and its volume is turned up.
