# Radio Flyer 4-in-1 Stroll 'N Trike Instruction Manual

Model: 469PZ

## INTRODUCTION

This instruction manual provides essential information for the safe assembly, operation, and maintenance of your Radio Flyer 4-in-1 Stroll 'N Trike, Model 469PZ. This versatile tricycle is designed to grow with your child through four distinct stages, accommodating ages 1 to 5 years. Please read this manual thoroughly before use and retain it for future reference.

## SAFETY INFORMATION

**WARNING: Adult assembly required. Adult supervision is required at all times when the trike is in use.**

- Always ensure all bolts, nuts, and fasteners are securely tightened before each use.
- Ensure your child wears a properly fitted helmet when riding the trike in stages where they are actively pedaling or steering.
- Do not use near stairs, on steep inclines, near roadways, or in areas with vehicular traffic.
- The maximum weight capacity for this trike is 49 lbs (22.2 kg).
- Always use the safety harness in stages where it is applicable.
- Keep children away from moving parts during adjustments.

For detailed safety instructions, please refer to the included safety documentation.

## PRODUCT OVERVIEW

The Radio Flyer 4-in-1 Stroll 'N Trike is engineered for adaptability and comfort, featuring a durable steel frame and high-density foam tires for a smooth ride. Key components and features include:

- **Adjustable UV Protection Canopy:** Provides shade and protection from the sun.
- **Wrap-Around Tray:** Offers a secure space for snacks or toys.
- **3-Point Safety Harness:** Ensures the child is securely fastened.
- **Adjustable Seat:** Allows for comfortable positioning as your child grows.
- **Footrest:** Provides support for younger riders.

- **Height-Adjustable Parent Push Handle:** Enables easy steering and control by an adult.
- **Rear Storage Bucket with Lid:** Convenient for carrying small items.
- **Cup Holder:** Located on the front tray for beverages.

## OPERATING INSTRUCTIONS: 4 STAGES OF GROWTH

---

The 4-in-1 Stroll 'N Trike is designed to adapt to your child's developmental stages. Adjustments should always be made by an adult.

Image: Visual representation of the 4 stages.

### Stage 1: Toddler Trike (12-18 months)

In this stage, the trike functions as a parent-controlled stroller. All accessories are typically in place to ensure the child's safety and comfort.

- **Configuration:** UV canopy, wrap-around tray, headrest, 3-point safety harness, footrest, and parent push handle are all attached.
- **Operation:** The parent steers and pushes the trike using the adjustable push handle. The child's feet rest on the footrest.

### Stage 2: Steering Trike (18-24 months)

As your child grows, some accessories can be removed, but parent control remains primary.

- **Configuration:** Remove the headrest. Keep the UV canopy, wrap-around tray, 3-point safety harness, footrest, and parent push handle attached.
- **Operation:** The parent continues to steer and push. The child may begin to show interest in the handlebars.

## Parent controlled steering

Image: Parent-controlled steering in action.

### Stage 3: Learn-to-Ride Trike (2-3 years)

This stage introduces independent pedaling and steering, with the parent push handle still available for assistance.

- **Configuration:** Remove the UV canopy and wrap-around tray. The 3-point safety harness can be removed if the child is stable. The footrest can be folded or removed as the child learns to pedal. The parent push handle can remain attached for guidance or removed for full independence.
- **Operation:** The child begins to pedal and steer independently. The parent can still guide the trike using the push handle if needed.

Image: Option for parent steering or child pedaling.

#### Stage 4: Classic Trike (4-5 years)

The trike transforms into a traditional tricycle for independent riding.

- **Configuration:** All removable accessories, including the parent push handle, are detached.
- **Operation:** The child rides the trike completely independently, pedaling and steering on their own.

#### MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your Radio Flyer 4-in-1 Stroll 'N Trike.

- **Cleaning:** Wipe down the trike with a damp cloth and mild soap. Avoid abrasive cleaners.
- **Inspection:** Periodically check all nuts, bolts, and screws for tightness. Tighten any loose fasteners.
- **Tires:** The high-density foam tires do not require inflation. Inspect them for wear or damage.
- **Storage:** Store the trike in a dry, protected area away from extreme temperatures and direct sunlight to prevent material degradation.

## TROUBLESHOOTING

If you encounter issues with your trike, consider the following:

- **Loose Parts:** If any part feels loose or wobbly, re-check the assembly instructions and tighten all fasteners.
- **Steering Issues:** Ensure the parent push handle is correctly engaged for parent steering, or disengaged for child steering. Check for any obstructions in the steering mechanism.
- **Pedaling Difficulty:** Verify that the pedals are correctly installed and not obstructed. For younger children, ensure the footrest is properly positioned or removed if they are learning to pedal.
- **Unusual Noises:** Inspect all moving parts for foreign objects or signs of wear. Lubricate moving joints if necessary with a child-safe lubricant.

If problems persist, please contact customer support.

## SPECIFICATIONS

Feature	Detail
Model Number	469PZ
Product Dimensions (L x W x H)	36.3" x 17.8" x 37.2" (92.2 cm x 45.2 cm x 94.5 cm)
Item Weight	13.7 pounds (6.2 kg)
Maximum Weight Capacity	49 pounds (22.2 kg)
Recommended Age	12 months - 5 years
