## 5. OPERATING THE MONITOR

### 5.1. Using the Hotkey Puck G2

The Hotkey Puck G2 provides convenient control over the monitor's On-Screen Display (OSD) settings. Use the dial to

navigate menus and the customizable buttons for quick access to frequently used functions like input switching or color modes.

## 5.2. Color Modes and Display Pilot Software

The monitor features specialized color modes such as M-book mode (to match Mac colors), CAD/CAM mode, Animation mode, and Darkroom mode. Utilize the BenQ Display Pilot software for Mac to easily switch between these modes, adjust settings, and ensure color synchronization with your Mac device.

## 6. MAINTENANCE

### 6.1. Cleaning the Monitor

To clean the monitor screen, gently wipe it with a soft, lint-free cloth. For stubborn marks, lightly dampen the cloth with water or a mild, non-abrasive screen cleaner. Avoid using harsh chemicals or abrasive materials.

### 6.2. General Care

Keep the monitor in a well-ventilated area. Avoid exposing it to direct sunlight, excessive heat, or moisture. Ensure cables are neatly organized to prevent damage and maintain a tidy workspace.

## 7. TROUBLESHOOTING

- No Display/No Signal:** Ensure all cables (power, Thunderbolt 3/HDMI/DisplayPort) are securely connected to both the monitor and your computer. Verify the correct input source is selected on the monitor using the OSD or Hotkey Puck.
- Flickering Screen:** Check cable connections. Ensure your graphics card drivers are up to date. Try a different cable or port.
- Color Inaccuracy:** Run the BenQ Display Pilot software to ensure proper color synchronization with your Mac. Perform a hardware calibration if you have a colorimeter.
- KVM Switch Issues:** Ensure both computers are properly connected to the monitor's USB upstream ports and video inputs. Verify the KVM switch settings in the OSD.
