

Totolink N600R

Totolink N600R 600Mbps Wireless N AP/Router User Manual

Model: N600R

1. INTRODUCTION

This manual provides detailed instructions for setting up, operating, and maintaining your Totolink N600R 600Mbps Wireless N AP/Router. The N600R is designed to provide stable wireless performance and enhance your Wi-Fi network with features like 600Mbps wireless N speed, easy setup, outstanding bandwidth control with QoS, multiple wireless networks for access control, advanced security, and parental control.

2. PRODUCT OVERVIEW

2.1 Package Contents

- Totolink N600R AP/Router
- Power Adapter
- Ethernet Cable
- Quick Installation Guide

2.2 Device Layout

Familiarize yourself with the physical components of your N600R router.

Figure 2.2.1: Front view of the Totolink N600R router, showing the main unit with four external antennas and the Totolink branding.

Figure 2.2.2: Rear view of the Totolink N600R router, highlighting the WAN port (yellow), four LAN ports (orange), and the DC power input.

2.2.1 Front Panel Indicators

- **Power LED:** Indicates the power status of the device.
- **WAN LED:** Indicates the status of the internet connection.
- **LAN LEDs:** Indicate the status of wired connections to LAN ports.
- **WLAN LED:** Indicates the status of the wireless network.
- **WPS LED:** Indicates the status of the WPS function.

2.2.2 Rear Panel Ports and Buttons

- **WAN Port (Yellow):** Connects to your modem or internet service provider's network.

- **LAN Ports (Orange):** Connects to wired devices such as computers, smart TVs, or gaming consoles.
- **DC In:** Power input port for the included power adapter.
- **WPS/RST Button:** Used for WPS (Wi-Fi Protected Setup) to quickly connect devices, or to reset the device to factory defaults by pressing and holding.

3. SETUP

3.1 Hardware Connection

1. Power off your modem.
2. Connect one end of the Ethernet cable from your modem's LAN port to the **WAN port (yellow)** on your Totolink N600R router.
3. Connect your computer to one of the **LAN ports (orange)** on the router using another Ethernet cable, or connect wirelessly using the default Wi-Fi name (SSID) and password found on the router's label.
4. Connect the power adapter to the **DC In** port of the router and plug it into a power outlet.
5. Power on your modem, then power on your router. Wait for the indicator lights to stabilize, which may take a few minutes.

3.2 Initial Configuration

1. Open a web browser (e.g., Chrome, Firefox, Edge) on your connected computer or device.
2. Type the default IP address (commonly 192.168.1.1 or 192.168.0.1) into the address bar and press Enter. Refer to the router's label or Quick Installation Guide for the exact default IP.
3. Enter the default username and password (typically admin for both). If these do not work, check the router's label.
4. Follow the on-screen Quick Setup Wizard to configure your internet connection type (e.g., PPPoE, Dynamic IP, Static IP) and set up your preferred wireless network name (SSID) and a strong password.
5. Save your settings and restart the router if prompted. Your router should now be configured for internet access.

4. OPERATING

4.1 Wireless Network Configuration

The N600R supports 600Mbps Wireless N speed, providing stable wireless performance for your devices.

- **Changing Wi-Fi Name (SSID) and Password:** Access the router's web interface, navigate to the "Wireless Settings" or "Wi-Fi" section to customize your Wi-Fi network name and set a strong WPA2-PSK password for security.
- **WPS Functionality:** Use the WPS button on the router to quickly connect WPS-compatible devices (e.g., smartphones, printers) without manually entering the password.
- **Multiple Wireless Networks:** The router allows for creating multiple SSIDs (e.g., a main network and a guest network) for better access control and network segmentation.

4.2 Advanced Features

- **Bandwidth Control (QoS):** Utilize the Quality of Service (QoS) feature to prioritize network traffic for specific applications or devices, ensuring outstanding bandwidth control for critical tasks like online gaming or video streaming.
- **Parental Control:** Manage internet access for specific devices or users by setting time limits or blocking access to certain websites, promoting a safer online environment.
- **Advanced Security:** The router includes advanced security features such as firewall, WPA/WPA2 encryption, and MAC address filtering to protect your network from unauthorized access.
- **Boost Your Wi-Fi by Turbo Switch:** Some Totolink models feature a 'Turbo Switch' or similar setting in the web interface to enhance Wi-Fi coverage and signal strength. Refer to your router's specific interface for this option.

5. MAINTENANCE

- **Firmware Updates:** Regularly check the official Totolink website (www.totolink.net) for the latest firmware updates. Updating firmware can improve performance, add new features, and enhance security.
- **Physical Cleaning:** Keep the router clean and free from dust. Use a soft, dry cloth to wipe the exterior. Ensure proper ventilation by not blocking the vents to prevent overheating.
- **Optimal Placement:** Place the router in a central location in your home or office, away from obstructions (e.g., thick walls, metal objects) and sources of interference (e.g., microwaves, cordless phones) for the best wireless coverage and signal strength.
- **Regular Reboots:** Periodically rebooting your router (by unplugging and replugging the power adapter after 10 seconds) can help clear temporary issues, refresh network connections, and improve overall performance.

6. TROUBLESHOOTING

6.1 No Internet Access

- **Check Connections:** Ensure all Ethernet cables (WAN, LAN) are securely connected and the power adapter is plugged in.
- **Verify Modem Status:** Confirm that your modem is working correctly and has an active internet connection.
- **Reboot Devices:** Power cycle both your modem and the Totolink N600R router. Wait for them to fully restart.
- **Check WAN Status:** Access the router's web interface and check the WAN status. Ensure it shows a connected status and has a valid IP address from your ISP.

6.2 Slow Wireless Speed

- **Router Placement:** Ensure the router is placed in an optimal, central location, free from obstructions and interference.
- **Interference:** Other electronic devices (e.g., cordless phones, microwaves) or neighboring Wi-Fi networks can cause interference. Try changing the Wi-Fi channel in the router's settings.
- **Firmware Update:** Ensure your router's firmware is up to date.
- **Network Congestion:** Too many devices or bandwidth-intensive activities (e.g., 4K streaming, large downloads) can slow down the network. Consider using QoS settings.

6.3 Cannot Access Router Web Interface

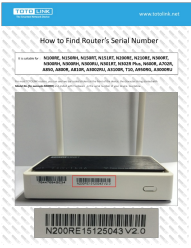

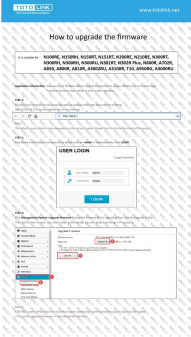

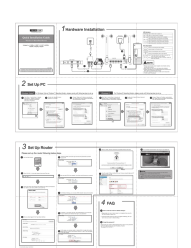

- **Connection:** Ensure your device is connected to the router's network (either via Ethernet cable to a LAN port or wirelessly).
- **IP Address:** Verify that you are typing the correct default IP address (e.g., 192.168.1.1) into your browser's address bar.
- **Browser Issue:** Try using a different web browser or clearing your browser's cache and cookies.
- **Firewall/Antivirus:** Temporarily disable any firewall or antivirus software on your computer that might be blocking access.
- **Factory Reset:** If all else fails, perform a factory reset. With the router powered on, press and hold the WPS/RST button for 5-10 seconds until the LEDs flash. This will revert all settings to factory defaults, requiring re-configuration.

7. SPECIFICATIONS

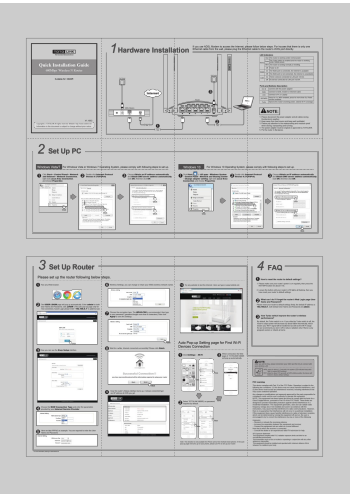

Feature	Detail
Brand	Totolink
Model Name	N600R
Wireless Type	802.11n
Frequency Band Class	Single-Band
Special Features	WPS
Operating System	RouterOS
Compatible Devices	Laptop, Personal Computer, Smart Television, Tablet
Recommended Uses For Product	Home, Small Office
Item Weight	456 g
Package Dimensions	22.4 x 14.4 x 6.7 cm
Manufacturer	Totolink
Date First Available	1 April 2021

8. WARRANTY AND SUPPORT

For detailed warranty information, technical support, and frequently asked questions, please visit the official Totolink website (www.totolink.net) or contact their customer service directly. Please retain your purchase receipt as proof of purchase for any warranty claims.

600Mbps Wireless N Router
802.11n/g/b

Model No. N600R

N600R wireless router complies with IEEE 802.11n standard and delivers Wi-Fi speed up to 600Mbps. It has four (4) high performance antennas. With four high performance antennas, N600R offers more stable Wi-Fi signal and wider coverage to reduce hard-to-reach areas. N600R is the best solution for home and small office use.

Features

- Complies with IEEE 802.11n high standards for 2.4GHz Wireless LAN.
- Up to 600Mbps data rate for Wi-Fi network.
- Advanced MIMO technology enhances the throughput and wireless coverage.
- One-Touch WPS button for easy and quick Wi-Fi coverage extension.
- Supports DHCP, Static IP, PPPoE, PPTP and VPN standard functions.
- Provides DVDRS as WEP, WPA, WPA2 and WPA-Mixed security.
- Converts the router into a wireless access point and bridging mode.
- Supports IP, MAC, URL, Port, and Port Forwarding.
- QoS bandwidth control based on IP.
- Multi-SSID allows you to create multiple SSIDs according to their needs.
- Universal uplinker and WDS function for easy Wi-Fi extension.

N600R Multiple SSID settings

It is suitable for: **N600R, A800R, A810R, A3100R, T10, A950RG, A3000RU**

Application Introduction
 Solution about how to configure multiple SSID for TOTOLINK products.

STEP 1:
 Connect your computer to the router by cable or wireless, then login the router by entering http://192.168.0.1 in the address bar of your browser.

Enter:

The default access address varies depending on the actual situation. Please refer to the bottom label of the product.

STEP 2:
 User Name and Password are required for default login. Please refer to the bottom label of the product.

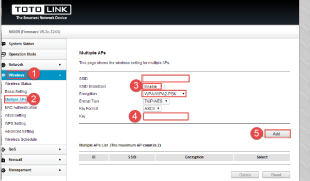

USER LOGIN

Enter Name:

Password:

LOGIN

STEP 3:
 Click on **Advanced** > **Wireless** > **Wireless Mode** and then click on the checkbox **Enable Multiple SSID** and click **OK**. It will show the Multiple SSID settings page for configuration.

How to set up static DHCP?

It is suitable for : **N300RH_V4, N600R, A800R, A810R, A3100R, T10, A950RG, A3000RU, A7000R**

Set up steps

STEP-1: Connect your computer

Connect your computer to the router by cable or wireless, then login the router by entering <http://192.168.0.1> into the address bar of your browser.

Note: The default access address varies depending on the actual situation. Please find it on the bottom label of the product.

STEP-2 :

User Name and Password are required, by default both are **admin** in lowercase letter. Click **LOGIN**.

USER LOGIN

Forgot Password?

User Name:

Password:

LOGIN

STEP-3 :

Select advanced settings to enter the settings page

Easy Setup

The easy setup will guide you to configure AP for first time.

Advanced Setup

Connection Status

Connection Status: DHCP **Disconnected**

Internet Setting

WAN Connection Type: DHCP **Auto Detect**

5G Wireless

Network Name(SSID): **TOTOLINK_A810R_5G**

Password:

The Password length should be between 8-30 bits

STEP-4 :

Enter the Static DHCP Setting to open the setting and checklist the Enable, input IP Address, MAC Address and Comment. After click Apply, we can see the information in the static DHCP List.

System Status

System Info

System Setting

Static DHCP Setting

Static DHCP List

Static DHCP Setting

Static DHCP List

The page shows you whether IP addresses, and assign the static IP address to the network device with the specified MAC address and comment. If IP address, the IP address list will be shown. If there is a device has a static IP address except that the device has not been added in IP address from the DHCP server.

Static DHCP Setting

Enable: ☒ **Disable**

IP Address:

MAC Address:

Comment:

Apply

Current Static DHCP List (The maximum entry count is 16)

ID	IP Address	MAC Address	Select
1	192.168.0.1	88:88:88:88:88:88	☐
