Valdus VG15

Valdus Smartwatch VG15 User Manual

Model: VG15

1. Introduction

This manual provides detailed instructions for the Valdus Smartwatch VG15. It covers setup, operation, maintenance, and troubleshooting to ensure optimal use of your device. The Valdus Smartwatch is designed to assist with fitness tracking, health monitoring, and smart notifications, featuring a 1.28-inch round touchscreen and IP68 waterproofing.

2. Setup Guide

2.1. Charging the Device

Before first use, fully charge the smartwatch. Connect the magnetic charging cable to the charging points on the back of the watch and plug the USB end into a power adapter (not included) or a computer USB port. A full charge typically takes 2-3 hours.

- Battery life: 5-7 days of working time, 20-25 days standby time.

2.2. App Installation and Pairing

To utilize all features, download the "Tefiti" app on your smartphone. The app is compatible with both Android and iOS

systems (e.g., iPhone 12/11/X, Samsung Galaxy, Sony, LG).

1. Scan the QR code in the manual or search for "Tefiti" in your phone's app store.
2. Install and open the "Tefiti" app.
3. Ensure Bluetooth is enabled on your smartphone.
4. In the app, navigate to the device pairing section and select the Valdus Smartwatch (VG15) from the list of available devices.
5. Confirm the pairing request on both your phone and the smartwatch.

3. Operating Instructions

3.1. Navigating the Interface

The smartwatch features a 1.28-inch IPS full-color touchscreen. Swipe left/right or up/down to access different functions

and menus. Press the side button to return to the main watch face or power on/off the device.

3.2. Health Monitoring

- **Heart Rate Monitoring:** The watch continuously monitors your heart rate. View real-time data on the watch or detailed historical data in the Tefiti app.
- **Blood Pressure & Blood Oxygen:** The device can measure blood pressure and blood oxygen levels. Consult the app for measurement instructions and data logging.
- **Sleep Monitoring:** The smartwatch automatically tracks your sleep patterns, including deep sleep, light sleep, and awake time. Review your sleep quality in the app.
- **Sedentary Reminder:** Set reminders in the app to prompt you to move after periods of inactivity.
- **Menstrual Cycle Recording:** For female users, the app allows tracking and prediction of menstrual cycles.

3.3. Sports Modes

The smartwatch supports 24 sports modes, including running, cycling, basketball, walking, football, badminton, jump rope, yoga, golf, dancing, baseball, volleyball, cricket, tennis, hiking, spinning, rugby, and indoor running. Select your desired sport mode to track specific metrics like steps, distance, calories burned, and heart rate during activity.

3.5. Other Features

- **Music Control:** Control music playback on your smartphone directly from the watch (play, pause, skip tracks).
- **Alarm Clock:** Set multiple alarms through the app.
- **Stopwatch:** Use the built-in stopwatch function for timing activities.
- **Find Phone:** Use the watch to locate your paired smartphone.
- **Brightness Adjustment:** Adjust the screen brightness directly on the watch.
- **Custom Watch Faces:** Choose from 6 main watch faces or select more options in the app. You can also customize the watch face with your own photos.
- **Weather Forecast:** View local weather forecasts on your watch after syncing with the app.

4. Maintenance

4.1. Waterproofing (IP68)

The Valdus Smartwatch is IP68 waterproof, meaning it is resistant to dust and can withstand immersion in water up to 1.5 meters for 30 minutes. You can wear it during hand washing, in the rain, and while swimming.

- **Important:** Do not use the watch in hot water, steam, saunas, or hot springs, as this can damage the device.

4.2. Cleaning

Wipe the watch and strap regularly with a soft, damp cloth. Ensure the charging contacts are clean and dry before charging.

5. Troubleshooting

Problem	Possible Cause / Solution
Watch not turning on	Battery may be depleted. Charge the watch for at least 30 minutes.
Cannot pair with smartphone	Ensure Bluetooth is enabled on your phone. Make sure the watch is within Bluetooth range. Restart both the watch and your phone. Check if the "Tefiti" app is updated to the latest version. Forget the device in your phone's Bluetooth settings and try pairing again.
No notifications received	Ensure the watch is connected via Bluetooth to the app. Check notification permissions for the "Tefiti" app in your phone's settings. Verify that notification alerts are enabled within the "Tefiti" app for specific applications (e.g., Facebook, WhatsApp). Ensure your phone's "Do Not Disturb" mode is off.
Inaccurate health data	Ensure the watch is worn snugly on your wrist, but not too tight. Clean the sensor on the back of the watch. Avoid excessive movement during measurements.
