2. SAFETY GUIDELINES

Your child's safety is our utmost priority. Please adhere to the following guidelines to ensure a safe play environment:

- **Adult Supervision:** Always ensure children are supervised by an adult while using the playset.
- **Age and Weight Limits:** This playset is designed for children aged 2-6 years. The maximum weight recommendation is 110 pounds. Do not exceed this limit.
- **Proper Installation:** Ensure the playset is assembled correctly and all fasteners are securely tightened before use. Regularly check for loose parts.
- **Placement:** Place the playset on a flat, stable surface indoors. Ensure adequate clear space around the playset to prevent collisions.
- **Inspection:** Before each use, inspect the playset for any damage, splinters, or loose components. Do not

allow children to use the playset if any part is damaged.

- **Clothing:** Avoid loose clothing, scarves, or jewelry that could get caught on the playset.

3. SETUP AND ASSEMBLY

Assembly of the Avenlur Magnolia playset is designed to be straightforward. While professional installation is not required, a power drill is highly recommended for efficient assembly. Please follow the included detailed assembly instructions carefully.

3.1. Before You Begin

- Unpack all components and verify against the parts list provided in your assembly manual.
- Lay out all hardware and tools. A power drill with appropriate bits will significantly speed up the process.
- Inspect all wooden parts for any imperfections or splinters. While our products are quality-checked, a quick visual inspection is always recommended.

3.2. Assembly Tips

- **Climbing Holds:** Pay close attention to the orientation of the climbing holds. Some instructions may depict them differently than the final product image. Refer to the product images for correct placement if there is a discrepancy.
- **Section B Assembly:** Some users have noted that Section B of the assembly instructions might show the orientation of a side panel backward. Ensure that screws are inserted from the correct side (typically the back or underside) to maintain structural integrity and aesthetics. If the instructions show the front, the screws should go on the opposite side.
- **Two-Person Assembly:** While possible for one person, assembly is significantly easier and safer with two people, especially when lifting and positioning larger sections.

4. OPERATING INSTRUCTIONS

The Magnolia 7-in-1 Indoor Playground offers multiple ways for children to engage in active play. Encourage your child to explore each feature safely and creatively.

4.1. Using the Features

- **Slide:** Children can enjoy sliding down the smooth wooden slide. Ensure the landing area is clear. The slide can also be used for climbing up, enhancing motor skills.
- **Climbing Wall:** The playset includes a mini rock climbing wall with colorful holds. Encourage children to use both hands and feet to ascend.
- **Monkey Bars:** Children can practice their upper body strength and coordination by swinging across the monkey bars.
- **Rope Ladder & Wood Ladder:** These provide different climbing challenges, helping children develop balance and agility.
- **Swing:** The included swing provides a fun, rhythmic activity. Ensure the swing area is clear during use. Note that the swing may require ample space for full motion, and some users prefer to replace it with gymnastic rings for varied play.

5. MAINTENANCE AND CARE

Regular maintenance will ensure the longevity and safety of your Avenlur Magnolia Indoor Playground.

- **Cleaning:** Wipe down the wooden surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, as they can damage the varnished wood finish.
- **Fastener Check:** Periodically check all screws, bolts, and connections to ensure they are tight. Re-tighten as necessary to maintain stability.
- **Wood Inspection:** Regularly inspect all wooden components for signs of wear, cracks, or splinters. While the wood is high-quality and varnished, natural wood can sometimes develop minor imperfections. If splinters are found, gently sand the area smooth.
- **Rope and Fabric Components:** Check ropes and nets for fraying or damage. Replace any worn components immediately.
- **Storage:** If disassembling for storage, keep all parts and hardware organized in a dry place to prevent damage.
