PACKAGE CONTENTS

Upon opening the product packaging, verify that all components are present. The set includes:

- Approximately 3850 building block pieces, sorted into numbered bags.
- One comprehensive instruction manual.
- Additional small bags containing connector pieces, often found within larger numbered bags.

It is recommended to organize the pieces before starting assembly to facilitate the building process.

ASSEMBLY INSTRUCTIONS

The assembly of the Nifeliz Super Sports Car GT4 MOC is a multi-step process that requires patience and attention to detail. Follow the included instruction manual step-by-step.

1. Preparation and Sorting

Before you begin, clear a spacious and well-lit work area. The building blocks are organized into numbered bags, typically grouped (e.g., groups 1-4). Within these larger groups, you will find smaller bags with specific numbers and separate bags for various connector pieces. Carefully open bags as instructed in the manual to avoid mixing parts prematurely.
