Maintenance

- Keep the hub away from moisture and extreme temperatures.
- Clean the device with a soft, dry cloth. Avoid using harsh chemicals.
- Do not attempt to disassemble or repair the device yourself. Contact customer support if issues arise.
- Ensure proper ventilation around the hub during extended use.

Troubleshooting

Common Issues and Solutions

- **Device not recognized:** Ensure the hub is properly connected to your computer and the power adapter

(if used) is plugged in. Try connecting the device directly to your computer to rule out device-specific issues.

- **Slow data transfer:** Verify that both the connected device and the hub are using USB 3.0 ports. Ensure the power adapter is connected for optimal performance, especially with power-hungry devices.
- **LED indicator not lighting up:** Check if the individual on/off switch for that port is pressed. If the power adapter is used, ensure it's properly connected.
- **Intermittent connection:** Ensure all cables are securely connected. Avoid placing the hub near sources of electromagnetic interference.
