5. OPERATING INSTRUCTIONS

5.1. Loading the Dishwasher

Proper loading is crucial for effective cleaning. This dishwasher accommodates up to 14 place settings.

- Scrape off large food particles before loading.
- Place glasses, cups, and smaller items in the upper rack.
- Place plates, bowls, and larger items in the lower rack.
- Ensure items do not block the spray arms.
- Utensils should be placed in the cutlery basket, handles down for forks and spoons, handles up for knives.

5.2. Adding Detergent and Rinse Aid

- **Detergent:** Fill the detergent dispenser with the appropriate amount of dishwasher detergent according to the program selected and the soil level of the dishes.
- **Rinse Aid:** Check the rinse aid indicator. Refill the rinse aid dispenser when the indicator shows low levels. Rinse aid helps with drying and prevents spots.
- **Dishwasher Salt:** If your water is hard, regularly check and refill the salt reservoir. This prevents limescale buildup.

5.3. Selecting and Starting a Program

- Close the dishwasher door.
- Press the Power button to turn on the appliance.
- Use the program selection buttons on the control panel to choose the desired wash cycle. Refer to the program chart (usually inside the door) for details on each program.
- Press the Start/Pause button to begin the cycle.

5.4. Using PowerClean

The PowerClean feature provides extra powerful water jets for heavily soiled pots and pans, eliminating the need for pre-washing. Place these items facing the PowerClean zone in the lower rack.

6. MAINTENANCE AND CLEANING

Regular maintenance ensures your dishwasher operates efficiently and hygienically.

- **Filter System:** Regularly clean the filter system located at the bottom of the dishwasher. Remove the coarse filter, fine filter, and microfilter, rinse them under running water, and reassemble.
- **Spray Arms:** Check the spray arm nozzles for blockages. If necessary, remove the spray arms and clean the holes.
- **Exterior Cleaning:** Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners.
- **Interior Cleaning:** Periodically run a dishwasher cleaning cycle with a specialized dishwasher cleaner to remove grease and limescale buildup.

7. TROUBLESHOOTING

Before contacting customer service, consult the following table for common issues and their solutions.

| Problem | Possible Cause | Solution |
|---------------------------|--|---|
| Dishwasher does not start | Power supply issue, door not closed properly, program not selected. | Check power connection, ensure door is latched, select a program and press Start. |
| Dishes are not clean | Improper loading, clogged spray arms, insufficient detergent, incorrect program. | Reload dishes correctly, clean spray arms, add more detergent, select a more intensive program. |
| Water not draining | Clogged filter, kinked drain hose, blocked drain pump. | Clean the filter system, check drain hose for kinks, consult a technician for pump issues. |
| White spots on dishes | Lack of rinse aid, hard water, insufficient salt. | Refill rinse aid, check salt level and refill if necessary, adjust water hardness setting. |

If the problem persists after attempting these solutions, please contact Whirlpool customer service.
