### PRODUCT FEATURES

## Natural Pine Wood Construction

Constructed from natural pine wood, known for its ability to absorb heat and impact, and blend harmoniously with any space. Its natural form complements both Western and Japanese style rooms, suitable for use with futons or mattresses.

Figure 2: The bed frame's natural pine wood material, offering a warm and adaptable aesthetic.

### Exceptional Ventilation

Mattresses and futons accumulate significant sweat and moisture. A slatted bed is essential in humid climates. It prevents mold and odors by allowing fresh air circulation, reducing moisture buildup.

### 3-Stage Height Adjustment

The bed can be adjusted to approximately 5cm, 18cm, and 31cm, making it a versatile bed suitable for both futons and mattresses. It accommodates various lifestyles, from high-type for easy standing to floor-level use, recommended for all ages.

### Load Capacity of Approximately 200kg

The wide backboard and six legs distribute body weight across the bed frame, ensuring safe use for two or more people. The wider backboard, compared to typical slatted beds, offers a modern aesthetic and enhanced safety.

## SAFETY INFORMATION

- Always assemble the bed frame on a soft, clean surface to prevent damage to the product or your floor.
- Ensure all screws and fasteners are securely tightened before use. Periodically check and re-tighten as necessary.
- Do not stand on the bed frame. Distribute weight evenly across the frame.
- When moving the bed, always lift it by the long sides. Do not drag the bed, as this may damage the frame or floor.
- Keep small parts away from children during assembly to prevent choking hazards.
- Do not exceed the maximum load capacity of approximately 200 kg.
- Avoid exposing the bed frame to direct sunlight or extreme temperature changes, which can cause wood warping or cracking.

## SETUP AND ASSEMBLY INSTRUCTIONS

Assembly typically takes 15-30 minutes with one person, but two people are recommended for easier handling and stability during assembly.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a soft, clean surface. Check against the package contents list.
2. **Attach Legs:** Securely attach the six legs to the designated points on the bed frame using the provided screws and Allen wrench. Ensure the legs are firmly attached and perpendicular to the frame.
3. **Connect Frame Sections (if applicable):** If your frame comes in multiple sections, align them and use the connecting plates and screws to join them securely.
4. **Install Reinforcement Parts:** Attach any reinforcement parts as indicated in the diagram to enhance stability. Ensure correct positioning to avoid stress on the frame.
5. **Adjust Height:** The bed frame offers three height settings (approx. 5cm, 18cm, 31cm). To adjust, remove the legs, re-insert them into the desired height holes, and re-tighten. Ensure all legs are set to the same height for stability.
