

YEMA YM-925

YEMA Modular Motorcycle Helmet YM-925 User Manual

Model: YM-925

INTRODUCTION

This manual provides essential instructions for the proper use, care, and maintenance of your YEMA YM-925 Modular Motorcycle Helmet. Please read this manual thoroughly before using your helmet to ensure maximum safety and optimal performance. Retain this manual for future reference.

The YEMA YM-925 is a versatile modular helmet designed for various riding conditions, offering both full-face protection and the convenience of an open-face configuration. It features a dual visor system and an advanced ventilation system for rider comfort.

SAFETY INFORMATION

Your YEMA YM-925 helmet meets or exceeds FMVSS-218 and DOT safety standards, indicating it has passed rigorous testing for impact protection. Always wear your helmet correctly fastened for maximum protection.

- **Proper Fit is Crucial:** A helmet that is too loose may not provide adequate protection in an impact.
- **Chin Strap:** Always secure the chin strap firmly under your chin. It should be snug but not uncomfortable.
- **Visor Use:** Always ride with the clear outer visor down to protect your eyes from wind, debris, and insects. Use the internal sun visor for glare reduction as needed.
- **Impact Damage:** A helmet that has sustained an impact, even if it appears undamaged, may have compromised protective capabilities. It should be replaced immediately.
- **Modifications:** Do not modify your helmet in any way, as this can compromise its structural integrity and safety features.

SETUP

1. Measuring Your Head for Proper Fit

A correctly sized helmet is essential for safety and comfort. Follow these steps to determine your head size:

- 1. Use a flexible tape measure.
- 2. Measure the circumference of your head by winding the tape measure around the widest part of your head, approximately 1 inch (2.5 cm) above your eyebrows and ears.
- 3. Refer to the size chart below to find the corresponding helmet size.

Image: Guide on how to measure your head circumference for helmet sizing.

Size Chart: YEMA YM-925 Helmet

Brand Size	Head Circumference (in)	Head Circumference (cm)
Small	21.3 - 21.7	54 - 55
Medium	22.0 - 22.4	56 - 57
Large	22.8 - 23.2	58 - 59
X-Large	23.6 - 24.0	60 - 61
XX-Large	24.4 - 24.8	62 - 63

Note: If you feel slight pressure on your cheeks, it is normal. The internal padding will conform to your head shape after a few uses. For round oval head shapes, standard size is recommended. For long oval, consider a smaller size. For round, consider a larger size.

2. Securing the Chin Strap

The YM-925 helmet is equipped with a quick-release buckle system for the chin strap.

- 1. Place the helmet on your head.
- 2. Fasten the quick-release buckle securely. Ensure the strap is threaded correctly through the buckle.
- 3. Adjust the strap length so it is snug under your chin, allowing no more than two fingers to fit between the strap and your chin.
- 4. To release, press the red button on the buckle.

OPERATING INSTRUCTIONS

1. Modular Flip-Up Function

The YM-925 helmet features a modular design, allowing the chin bar to flip up for convenience when not riding at speed.

1. To raise the chin bar: Locate the flip-up button, typically at the center bottom of the chin bar. Press the button and simultaneously push the chin bar upwards until it locks into the fully open position.
2. To lower the chin bar: Press the release button (if present, or simply pull down) and gently pull the chin bar down until it clicks securely into the closed, full-face position. Ensure it is fully latched before riding.

2. Dual Visor System

The YM-925 helmet is equipped with a clear outer visor and an internal retractable sun visor.

- **Clear Outer Visor:** This visor provides primary eye protection. It can be opened and closed manually. Ensure it is fully closed when riding to protect against wind and debris. The visor is scratch-resistant and offers a wide field of view.
- **Internal Sun Visor:** To deploy the sun visor, locate the sun visor switch on the side of the helmet (refer to image below). Slide the switch forward or down to lower the sun visor. Slide it backward or up to retract it. Use the sun visor to reduce glare in bright conditions.

3. Ventilation System

The helmet features adjustable intake and exhaust vents to regulate airflow and maintain comfort.

- **Chin Vent:** Located on the chin bar, this vent can be opened or closed to direct airflow to the face and visor, helping to reduce fogging.
- **Top Air Intakes:** Located on the top of the helmet, these adjustable vents allow air to flow over the scalp. Slide the

controls to open or close them.

- **Rear Exhaust Outlets:** These vents, located at the rear, allow warm air to escape, creating a flow-through ventilation effect.

Premium Ventilation Performance

Equipped with 3 adjustable intake vents & 2 exhaust vents for optimum ventilation.

2 Closabe Air Intakes

1. Cleaning the Helmet Shell

Clean the helmet shell with a soft, damp cloth and mild soap. Avoid harsh chemicals, solvents, or abrasive cleaners, as these can damage the helmet's finish and materials.

2. Cleaning Visors

- **Clear Outer Visor:** Clean with warm water and a soft microfiber cloth. For stubborn dirt, use a helmet-specific visor cleaner. Do not use abrasive materials or household glass cleaners.
- **Internal Sun Visor:** Clean with a soft, damp cloth. Avoid excessive rubbing to prevent scratches.

3. Removing and Washing Liner/Cheek Pads

The helmet's liner and cheek pads are removable and washable for hygiene.

1. Carefully detach the liner and cheek pads from their snap or velcro fasteners inside the helmet.
2. Hand wash them in cool water with mild soap.
3. Rinse thoroughly and allow them to air dry completely before re-installing. Do not machine wash or tumble dry.
4. Re-install the dry liner and cheek pads, ensuring all fasteners are securely attached.

TROUBLESHOOTING

- **Visor Fogging:** If the visor fogs up, ensure the chin vent and top air intakes are open to increase airflow. Slightly cracking the clear outer visor can also help. Consider anti-fog treatments for persistent issues.
- **Helmet Feels Too Tight/Loose:** Refer to the "Measuring Your Head for Proper Fit" section. If the helmet is new, the padding may compress slightly over time. If it remains uncomfortable or too loose, consider exchanging for a different size.
- **Chin Bar Not Latching Securely:** Ensure no debris is obstructing the latching mechanism. Firmly push the chin bar down until you hear a distinct click. If the issue persists, contact customer support.
- **Excessive Wind Noise:** While the YM-925 is designed for aerodynamics, some wind noise is normal. Ensure all vents are closed if you wish to minimize noise. A proper fit also helps reduce wind noise.

SPECIFICATIONS

- **Model:** YM-925
- **Item Model Number:** YEMA-925MBS
- **Shell Material:** Advanced Lightweight Durable ABS Shell
- **Liner Material:** EPS Impact Absorption Inner Liner, Removable and Washable Fabric
- **Visor System:** Modular Flip-up Function, Anti-scratch Clear Outer Visor, Integrated Dual Sun Visor
- **Ventilation:** Fully Adjustable Flow-through Ventilation (3 intake, 2 exhaust vents)
- **Safety Standards:** Meets or Exceeds FMVSS-218 and DOT Safety Standards
- **Department:** Unisex-Adult
- **Manufacturer:** Lanxi Yema Motorcycle Fittings Co.,LTD
- **Origin:** Imported

WARRANTY AND SUPPORT

YEMA helmets are manufactured with quality and safety in mind. For specific warranty details, please refer to the warranty card included with your purchase or visit the official YEMA website.

For technical support, replacement parts, or any inquiries regarding your YEMA YM-925 helmet, please contact YEMA customer service through their official channels. You can often find contact information on the manufacturer's website or through the retailer where you purchased the helmet.
