6. MAINTENANCE

- **Regular Cleaning:** Use a lint roller or vacuum cleaner to remove loose fur and dust from the plush surfaces.
- **Spot Cleaning:** For small stains, use a damp cloth with mild soap. Avoid excessive moisture.
- **Sisal Care:** The sisal scratching surfaces can be cleaned with a stiff brush to remove debris. Do not use harsh

chemicals or excessive water, as this can damage the material.

- **Odor Control:** If odors develop, sprinkle baking soda on the plush areas, let it sit for 15-30 minutes, then vacuum thoroughly.
- **Check for Wear:** Regularly inspect scratching posts and other components for significant wear and tear. Replace heavily worn parts to maintain functionality and safety.

7. TROUBLESHOOTING

- **Instability:** If the cat tree feels wobbly, ensure all screws are tightly fastened. Verify that the anti-tipping device is correctly installed and secured to a wall. Ensure the tree is on a level surface.
- **Cat Not Using Tree:** Introduce your cat to the tree gradually. Place treats or familiar toys on different levels. Use catnip to attract them. Some cats may take time to adjust to new furniture.
