## **OLAY Regenerist Mineral Sunscreen Hydrating Moisturizer SPF 15 User Manual**

### **1. PRODUCT OVERVIEW**

---

This manual provides instructions for the OLAY Regenerist Mineral Sunscreen Hydrating Moisturizer with SPF 15. This product is formulated to hydrate skin and provide broad-spectrum UVA/UVB protection using mineral sunscreen. It features key ingredients such as Vitamin B3 and Peptides to support skin health.

Image 1.1: OLAY Regenerist Mineral Sunscreen Hydrating Moisturizer SPF 15 product bottle.

### Key Ingredients

- **Zinc Oxide:** A mineral sunscreen active ingredient that provides broad-spectrum protection against UVA and UVB rays.

Image 1.2: Illustration of Zinc Oxide, a key mineral sunscreen ingredient.

- **Vitamin B3 (Niacinamide):** Helps to improve skin's moisture barrier and overall texture.

Image 1.3: Illustration of Vitamin B3+, an ingredient for skin hydration.

- **Peptides:** Support skin's natural regeneration process.

## 2. SETUP

---

Before initial use, ensure the product packaging is intact and undamaged. Remove the product from its box. The dispenser may require priming before the first application.

### Priming the Dispenser

1. Remove the protective cap from the pump.
2. Press the pump head down fully several times until the product begins to dispense consistently. This may take 5-10 pumps.

## 3. OPERATING INSTRUCTIONS

---

Follow these steps for effective application of the OLAY Regenerist Mineral Sunscreen Hydrating Moisturizer SPF 15.

### Application Steps

1. Dispense a small amount of product onto your fingertips.

2. Apply the moisturizer liberally and evenly to your face and neck.
3. Gently blend the product into your skin until it is fully absorbed.
4. Apply 15 minutes before sun exposure.
5. Reapply at least every 2 hours for continued sun protection. Reapply immediately after swimming or sweating.

Image 3.1: Demonstrating the application of the moisturizer.

### Recommended Usage

For optimal results, incorporate this moisturizer into your daily morning skincare routine as the final step before makeup application (if applicable).

## 4. MAINTENANCE

Proper care and storage will help maintain the product's efficacy.

### Storage

- Store the product at room temperature (typically 68-77°F or 20-25°C).
- Keep away from direct sunlight and extreme temperatures.

- Ensure the protective cap is securely closed when not in use to prevent contamination and drying.

## Shelf Life

Refer to the expiration date printed on the product packaging (box and bottle). Do not use the product beyond its expiration date.

## 5. TROUBLESHOOTING

This section addresses common concerns you might encounter while using the product.

### Common Issues and Solutions

- **White Cast on Skin:** Mineral sunscreens, due to their active ingredients like zinc oxide, can sometimes leave a temporary white cast, especially on darker skin tones or if too much product is applied. To minimize this, apply a small amount and gently blend thoroughly into the skin until absorbed. If a white cast persists, try applying in smaller sections and allowing each section to absorb before applying more.
- **Skin Irritation or Redness:** If you experience any skin irritation, redness, itching, or discomfort, discontinue use immediately. Cleanse the affected area with mild soap and water. If symptoms persist, consult a healthcare professional.
- **Product Not Dispensing from Pump:** If the pump is not dispensing product, ensure it has been properly primed as described in the 'Setup' section. If priming does not resolve the issue, check for any visible blockages in the dispenser nozzle. Do not attempt to disassemble the pump mechanism.
- **Product Consistency Changes:** Store the product as recommended to prevent changes in consistency. Extreme temperatures can affect the product. If the consistency changes significantly, it may indicate the product is compromised or expired.
