2. PRODUCT OVERVIEW

2.1 Key Features

- **HD 60FPS 1080p Video:** Delivers smooth, fluid video at up to 60 frames per second for high-quality streaming and video calls. Supports resolutions up to 1920x1080.
- **Dual Stereo Noise Reduction Microphone:** Built-in omni-directional microphones with noise cancellation for clear and natural sound, even in noisy environments.
- **Auto-Focus & Automatic Light Correction:** Automatically adjusts focus, color, and brightness to ensure you always look your best, even in dim lighting conditions.
- **80° Wide Angle Lens & Privacy Cover:** Offers an 80° wide-angle view and 360° rotation for flexible positioning. Includes a sliding privacy cover for security.

- **Plug & Play and Wide Compatibility:** Easy setup without driver installation. Compatible with Windows, Mac OS, Android Smart TV, and popular applications like Skype and Zoom.

2.2 Components

- NetumScan AutoFocus HD 1080P Webcam
- Integrated USB Cable
- Privacy Cover (pre-installed or included)

3. SETUP

1. **Unpack the Webcam:** Carefully remove the webcam from its packaging.
2. **Position the Webcam:** Place the webcam on top of your monitor, laptop screen, or a flat surface. The adjustable clip allows for secure mounting.
3. **Connect to Computer:** Plug the USB cable from the webcam into an available USB port on your computer.
4. **Automatic Driver Installation:** The system will automatically detect and install the necessary drivers. No manual driver installation is required.
5. **Verify Connection:** Once installed, the webcam will be ready for use with your preferred video conferencing or streaming application.

Built-in Dual Stereo Microphone

Makes sound purer and clearer, and fits for video conferencing, online courses, video calling, home studio, etc.

4. OPERATION

4.1 Basic Usage

After successful setup, open your desired video application (e.g., Zoom, Skype, Microsoft Teams, YouTube Live, Twitch). Select the NetumScan webcam as your video and audio input device within the application's settings.

WIDE COMPATIBILITY

Image: An illustration demonstrating the wide compatibility of the NetumScan webcam with popular video conferencing and streaming platforms, as well as different operating systems.

4.2 Video Quality and Features

- **1080P Full HD:** The webcam provides clear and detailed video at 1080p resolution.

1080P

1080P Full HD

Provide you with more professional and clear videos

720P

Image: A visual comparison highlighting the superior clarity and detail of 1080P Full HD video provided by the webcam compared to 720P.

- **60FPS High Frame Rate:** Experience smooth and fluid motion, ideal for dynamic presentations or gaming streams.

60FPS High Frame Rate, Clear and fluid video

Image: A side-by-side comparison illustrating the difference between 60FPS and 30FPS video, emphasizing the smoother and more fluid motion at 60 frames per second.

- **Autofocus:** The webcam automatically adjusts focus to keep you sharp and clear, even if you move.

Fast Autofocus & Auto Brightness

Built-in HD autofocus and automatic light correction
Automatically focus as you move, get a clearer image or video

Image: A visual representation of the webcam's fast autofocus and automatic brightness correction features, ensuring clear and well-lit images.

- **Automatic Light Correction:** The webcam intelligently adjusts to various lighting conditions, ensuring you are well-lit and visible.
- **80° Wide Angle View:** Capture more of your surroundings or include multiple participants in group calls without repositioning the camera. The webcam head can be adjusted up to 90° vertically and rotated 360° horizontally.

Built-in Dual Stereo Microphone

Makes sound purer and clearer, and fits for video conferencing, online courses, video calling, home studio, etc.

Image: A depiction of the webcam's 80-degree wide-angle view, illustrating its suitability for webinars and video conferencing by capturing a broader scene.

4.3 Audio Quality

- **Dual Stereo Noise Reduction Microphone:** The built-in microphones are designed to pick up your voice clearly while minimizing background noise, providing an optimal audio experience for calls and recordings.

80° BEST VIEW ANGLE

Great for webinars & Video Conferencing

4.4 Privacy Cover

The integrated privacy cover can be slid over the lens when the webcam is not in use. This physical barrier ensures your privacy and prevents unauthorized access to your camera feed.

5. MAINTENANCE

- **Cleaning the Lens:** Use a soft, lint-free cloth specifically designed for optics to gently wipe the webcam lens. Avoid abrasive materials or harsh chemicals.
- **Cleaning the Body:** Wipe the body of the webcam with a soft, damp cloth. Do not immerse the webcam in water or any cleaning solutions.
- **Storage:** When not in use for extended periods, store the webcam in a cool, dry place, away from direct sunlight and extreme temperatures.

6. TROUBLESHOOTING

6.1 Common Issues and Solutions

Problem	Possible Cause	Solution
Webcam not detected	Loose USB connection, faulty USB port, driver issue.	Ensure the USB cable is securely plugged in. Try a different USB port. Restart your computer. Check Device Manager (Windows) or System Information (Mac) to see if the webcam is listed.
No video output	Privacy cover closed, incorrect webcam selected in software, application permissions.	Slide open the privacy cover. In your video application's settings, ensure the NetumScan webcam is selected as the video input. Check your operating system's privacy settings to ensure the application has permission to access the camera.
No audio input (microphone not working)	Incorrect microphone selected in software, application permissions, system microphone settings.	In your video application's settings, ensure the NetumScan webcam's microphone is selected as the audio input. Check your operating system's sound settings to ensure the microphone is enabled and not muted. Some laptops may require disabling the built-in microphone to use an external one.
Poor video quality (blurry, dark)	Insufficient lighting, dirty lens, software settings.	Ensure adequate lighting in your environment. Clean the webcam lens gently with a soft cloth. Check your video application's settings for any quality adjustments. The webcam features auto-focus and auto-light correction, but extreme conditions may require manual adjustment in some software.
