## Macally BLSLIMKEYPROSG

# Macally BLSLIMKEYPROSG Backlit Mac Keyboard Instruction Manual

Model: BLSLIMKEYPROSG

Brand: Macally

## INTRODUCTION

This manual provides essential information for the setup, operation, and maintenance of your Macally BLSLIMKEYPROSG Backlit Mac Keyboard. This wired keyboard is designed for Mac systems, featuring a 107-key layout with macOS shortcut keys and adjustable backlighting.

The keyboard is engineered for a comfortable and efficient typing experience, integrating seamlessly with your Apple devices. Its slim profile and space gray finish complement modern Mac setups.

## PACKAGE CONTENTS

- Macally BLSLIMKEYPROSG Backlit Mac Keyboard
- User Guide (this document)

## SETUP

The Macally BLSLIMKEYPROSG keyboard offers a simple plug-and-play setup. No additional drivers or software are required for basic functionality on macOS.

## Connecting the Keyboard

1. Locate an available USB-A port on your Mac computer (iMac, MacBook Pro/Air, Mac Mini, etc.).
2. Plug the 5ft USB-A cable from the keyboard into the USB-A port on your computer.
3. The keyboard should be recognized automatically by your macOS system and be ready for use.

# USB-A Wired Connection.

A 5ft USB-A cable offers a reliable plug and play solution that works every time

**Note:** If your Mac only has USB-C ports, a USB-C to USB-A adapter (not included) will be required.

## OPERATING INSTRUCTIONS

### Backlight Control

The keyboard features crisp white LED backlighting with three adjustable brightness levels to suit various lighting conditions.

- To increase brightness: Press the **F6** key.
- To decrease brightness: Press the **F5** key.
- To turn off the backlight: Continue pressing **F5** until the lights are off.

## Enjoy Backlit Keys.

Crisp white LED lit keys with 3 brightness settings provide visibility in all lighting situations

## MAINTENANCE

### Cleaning the Keyboard

- Disconnect the keyboard from your computer before cleaning.
- Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to wipe the keys and surface.
- Avoid using harsh chemicals, abrasives, or spraying liquids directly onto the keyboard.
- For dust and debris between keys, use compressed air.

## TROUBLESHOOTING

### Keyboard Not Responding

- Ensure the USB-A cable is securely plugged into your Mac's USB port.
- Try plugging the keyboard into a different USB port on your Mac.
- If using a USB-C to USB-A adapter, ensure the adapter is functioning correctly and is securely connected.
- Restart your Mac computer.

### Backlight Not Working or Adjusting

- Ensure the keyboard is properly connected and receiving power.
- Press the **F6** key multiple times to increase brightness.
- If the issue persists, try disconnecting and reconnecting the keyboard.
