

## HisoHu PA0336

# HisoHu 36-Inch Wall Mount Range Hood User Manual

Model: PA0336 | Brand: HisoHu

## INTRODUCTION

---

Thank you for choosing the HisoHu 36-inch Wall Mount Range Hood. This manual provides essential information for the safe installation, operation, and maintenance of your new kitchen appliance. Please read these instructions thoroughly before installation and use, and retain them for future reference.

## IMPORTANT SAFETY INFORMATION

---

To reduce the risk of fire, electric shock, or injury, observe the following:

- Install this range hood in accordance with all local codes and ordinances.
- Ensure the electrical supply matches the requirements specified on the rating label.
- Always disconnect power before servicing or cleaning the unit.
- Do not operate any fan with a damaged cord or plug. Discard fan or return to an authorized service facility for examination and/or repair.
- Do not use this unit with any solid-state speed control device.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Clean grease filters frequently. Grease should not be allowed to accumulate on fan or filter.
- Never leave surface units unattended at high settings. Boilovers cause smoking and greasy spillovers that may ignite.
- Always turn hood ON when cooking at high heat or when flaming food.
- Use appropriate size cookware on each surface burner.
- In the event of a grease fire, smother flames with a close-fitting lid, cookie sheet, or metal tray, then turn off the burner. **NEVER PICK UP A FLAMING PAN.**
- Do not use water on grease fires.

### Package Contents

Verify that all components are present before beginning installation:

- HisoHu Wall Mount Range Hood Unit
- Remote Control
- Air Outlet
- Installation Parts and Screws
- 6-inch Round Duct
- User Manual
- LED Lights (pre-installed or separate, as applicable)
- Prong Plug

### Installation Guidelines

The HisoHu range hood is designed for wall-mount installation and can be configured for ducted or ductless operation (carbon filter kit required for ductless, sold separately). Proper installation is crucial for optimal performance and safety.

- **Ducting:** This unit exhausts air vertically upwards. If replacing a microwave hood that vented horizontally, new ductwork may be required. Ensure duct runs are as straight and short as possible. Each 90-degree turn significantly reduces airflow efficiency.
- **Mounting:** Securely mount the hood to wall studs. If ductwork interferes with stud placement, reinforce the wall with plywood or suitable blocking behind the hood mounting area.
- **Chimney Adjustment:** The chimney is adjustable from 15.75 inches to 31.29 inches to accommodate various ceiling heights.
- **Electrical Connection:** Connect the hood to a grounded electrical outlet.

Refer to the detailed installation diagrams and instructions provided in the included user manual for specific measurements and steps.

Figure 1: Range Hood Dimensions and Adjustable Chimney. The diagram illustrates the overall dimensions of the range hood, including its width (35.74"), depth (19.69"), and the adjustable height range of the chimney (15.75" to 31.29").

Figure 2: Installed Range Hood with Airflow Indication. This image shows the range hood mounted above a stovetop, with visual cues indicating the powerful 780 CFM airflow effectively removing cooking fumes.

## OPERATING INSTRUCTIONS

---

The HisoHu range hood offers multiple control options for convenience.

### Control Panel

The unit features a touch control switch panel located on the front. Buttons typically include power, fan speed adjustment, light control, and timer settings.

### Gesture Sensing

For hands-free operation, the range hood is equipped with gesture sensing technology. Wave your hand across the two sensing points to turn the unit on/off and adjust fan speed. This feature helps maintain cleanliness by reducing direct contact with the control panel.

## Gesture sensing

With a wave of your hand, you can turn on the machine and adjust the wind speed, so that the oil stains on your fingers will not stain the hood

**Tips:** gesture control only take effect when passing two sensing points.

Figure 3: Gesture Sensing Operation. This image illustrates how to use the gesture sensing feature by waving a hand across the designated sensing points on the hood's control panel.

## Remote Control

An infrared remote control is included for convenient operation from a distance.

## Fan Speed Settings

Select from 4 different fan speeds to match your cooking needs. The maximum airflow is 780 CFM, effectively removing cooking fumes and odors.

Figure 4: Four-Speed Airflow Settings. This graphic visually represents the four distinct fan speed settings, suitable for various cooking activities from light simmering to heavy frying.

## LED Lighting

The two energy-saving LED lights provide ample illumination for your cooking area. They are dimmable, allowing you to adjust brightness as desired.

Figure 5: Dimmable LED Lights. A close-up view of one of the integrated LED lights, highlighting its dimmable functionality for adjustable illumination.

## Delay Shutdown Timer

Utilize the 1-15 minute delay shutdown function to automatically clear residual fumes after cooking.

## MAINTENANCE

---

### Cleaning Grease Filters

The range hood is equipped with two 5-layer aluminum mesh filters designed to capture grease. For optimal performance, clean these filters regularly.

- **Removal:** Carefully unlatch and remove the filters from the hood.
- **Cleaning:** The filters are dishwasher-safe. Place them in your dishwasher for thorough cleaning. Alternatively, wash them by hand with warm, soapy water.
- **Reinstallation:** Ensure filters are completely dry before reinserting them into the hood.

Figure 6: Dishwasher-Safe Filters. This image demonstrates a grease filter placed inside a dishwasher, highlighting the ease of cleaning.

## Exterior Cleaning

Wipe the stainless steel exterior with a soft cloth and a non-abrasive stainless steel cleaner. Avoid harsh chemicals or abrasive pads that could scratch the surface.

## TROUBLESHOOTING

If you encounter issues with your HisoHu range hood, refer to the following common problems and solutions:

| Problem                | Possible Cause                                          | Solution                                                                                                                                |
|------------------------|---------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Hood does not turn on. | No power supply; loose connection; control panel issue. | Check power plug and circuit breaker. Ensure all connections are secure. Contact customer support if the control panel is unresponsive. |

| Problem                         | Possible Cause                                                    | Solution                                                                                                                                                |
|---------------------------------|-------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Poor suction performance.       | Clogged grease filters; obstructed ductwork; incorrect duct size. | Clean grease filters. Inspect ductwork for blockages or excessive bends. Ensure duct diameter is 6 inches as recommended.                               |
| Excessive noise or vibration.   | Loose mounting; fan obstruction; motor issue.                     | Verify the hood is securely mounted. Check for any foreign objects in the fan area. If noise persists, contact customer support.                        |
| LED lights not working.         | Loose connection; faulty LED bulb.                                | Check light connections. Replace LED bulbs if necessary (refer to the full manual for replacement instructions).                                        |
| Gesture sensing not responding. | Incorrect gesture; sensor obstruction; sensor malfunction.        | Ensure hand passes clearly across both sensing points. Clean the sensor area. If the issue persists, use touch controls or remote, and contact support. |
