## 2. SAFETY INFORMATION

---

### Important Safety Instructions:

- Ensure the appliance is properly grounded.
- Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- Do not damage the refrigerant circuit.
- Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
- Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
- This appliance is intended for household use only.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- Children should be supervised to ensure that they do not play with the appliance.

## 3. SETUP AND INSTALLATION

---

### 3.1 Unpacking

Carefully remove all packaging materials. Inspect the freezer for any damage. Report any damage to your retailer immediately.

### 3.2 Placement

Place the freezer on a firm, level surface. Ensure adequate ventilation around the appliance. Avoid direct sunlight and heat sources. This model is designed for freestanding installation.

### 3.3 Leveling

Adjust the adjustable feet at the bottom of the freezer to ensure it is level. A level appliance operates more efficiently and quietly.

### 3.4 Electrical Connection

Connect the freezer to a dedicated 220 Volt power outlet. Allow the appliance to stand for at least 2-4 hours before plugging it in to allow refrigerants to settle.

### 3.5 Door Reversal

The door of this freezer is reversible. If you wish to change the door's opening direction, please refer to the detailed instructions provided in the separate door reversal kit or contact customer support for guidance. This process typically involves moving hinges and the door handle to the opposite side.

## 4. OPERATING INSTRUCTIONS

---

### 4.1 Initial Operation

After plugging in the freezer, allow it to run empty for several hours (e.g., 4-6 hours) to reach the desired temperature before loading food.

### 4.2 Temperature Control

The freezer features a manual temperature control knob, typically located inside the appliance or on the top panel. Rotate the knob to adjust the cooling intensity. Settings usually range from 'Min' to 'Max' or numerical values, where higher numbers or 'Max' indicate colder temperatures.

### 4.3 Food Storage

Organize food items within the freezer drawers for efficient storage and easy access. Ensure proper sealing of food to prevent freezer burn and maintain quality.

## 5. MAINTENANCE

---

### 5.1 Cleaning

Regularly clean the interior and exterior of the freezer with a mild detergent and warm water. Avoid abrasive cleaners or solvents. Ensure the appliance is unplugged before cleaning.

### 5.2 Defrosting

This freezer model requires manual defrosting. Frost buildup can reduce efficiency. Defrost the freezer when the frost layer reaches approximately 5mm (0.2 inches) thick. To defrost:

1. Unplug the freezer from the power outlet.
2. Remove all food items and store them in a cool place or another freezer.
3. Leave the freezer door open to allow the frost to melt naturally. Place towels at the bottom to absorb water.
4. Once defrosted, clean and dry the interior thoroughly.
5. Plug the freezer back in and allow it to cool down before returning food.

### 5.3 Door Seal Care

Periodically check and clean the door seals to ensure they are free from debris and maintain a tight seal. A damaged or dirty seal can lead to inefficient operation and frost buildup.

## 6. TROUBLESHOOTING

Before contacting customer service, please check the following common issues:

Problem	Possible Cause	Solution
Freezer does not operate.	No power supply; power cord not plugged in; circuit breaker tripped.	Check power connection; reset circuit breaker.
Freezer is not cold enough.	Temperature setting too high; door opened too frequently; excessive food load; poor ventilation.	Adjust temperature setting; ensure door is closed properly; reduce food load; ensure adequate space around the freezer.
Excessive frost buildup.	Door not sealed properly; frequent door opening; high humidity.	Check door seal; reduce door opening frequency; perform manual defrost.
Unusual noise.	Appliance not level; objects vibrating against the freezer; compressor noise (normal).	Level the appliance; ensure nothing is touching the freezer; normal compressor sounds are expected.
