iDOO I-C-04-N1

iDOO Queen Inflatable Air Mattress User Manual

Model: I-C-04-N1

INTRODUCTION

This manual provides comprehensive instructions for the iDOO Queen Inflatable Air Mattress. Designed for comfort and portability, this airbed features a built-in electric pump for rapid inflation and deflation, dual-chamber technology for stable support, and durable, waterproof material, making it ideal for home use, camping, or accommodating guests.

SAFETY INFORMATION

- **Overinflation Risk:** Do not overinflate the mattress.
- **Stable Surface Requirement:** Ensure the airbed is laid on a level surface free from stones and sharp objects.
- **Moisture Exposure:** Do not expose the electric pump to moisture.
- **Valve Position:** When fully inflated, always turn the valve at the pump to the off (middle) position to prevent deflation.
- **Cleaning:** Hand wash only.

SETUP AND INFLATION

The iDOO Air Mattress features a built-in electric dual air pump for convenient inflation and deflation.

1. **Unpack:** Remove the air mattress from its travel storage bag and unroll it on a clean, level surface.
2. **Connect Power:** Locate the built-in pump on the side of the mattress. Open the compartment and pull out the power cord. Plug the cord into a standard 110V electrical outlet.
3. **Inflate:** Turn the inflation dial to the "Inflate" position. The dual air pump will begin to inflate the mattress. Ensure both operating buttons are pressed simultaneously if required by the model.
4. **Monitor Firmness:** The mattress will inflate in approximately 2-3 minutes. Once desired firmness is reached, turn the dial to the "Off" position.
5. **Secure Valve:** After inflation, ensure the valve at the pump is turned to the off (middle) position to prevent air leakage.

EXTRA-STRONG SUPPORT UP TO 600LB

Keep your whole body well supported & Avoid ends flipped

OPERATING INSTRUCTIONS

The iDOO Air Mattress is designed for versatile use, providing comfortable sleeping or lounging space.

Dual Chamber Technology

The dual chamber design ensures even support across the entire mattress, preventing sagging and providing stability from head to toe. This structure helps maintain firmness and comfort for various sleeping positions.

Dual Chamber Air Bed

Deflation and Storage

1. **Deflate:** To deflate, turn the pump dial to the "Deflate" position. The pump will actively remove air from the mattress.
2. **Fold:** Once fully deflated, fold the mattress neatly.
3. **Store:** Place the folded mattress into the included travel storage bag. The compact size allows for easy storage in small spaces.

Familly Queen Size

Extra wide base to create a family suited for loved ones

Video Description: An official iDOO video showcasing the rapid deflation process of the Queen Air Mattress, highlighting its space-saving storage and multi-purpose use.

MAINTENANCE AND CARE

- **Cleaning:** The mattress is made of extra-thick, waterproof material. For cleaning, hand wash only. Do not use harsh chemicals or abrasive cleaners.
- **Puncture Repair:** Repair patches are included for minor punctures. Follow the instructions provided with the patches for proper application.
- **Material Expansion:** The PVC material may naturally expand after initial uses, which might appear as a slight loss of air. This is a normal phenomenon; simply re-inflate to desired firmness.

- **Storage:** Store in a cool, dry place away from direct sunlight and extreme temperatures.

3 minutes
inflation

2-month use

Image Description: Close-up of the waterproof top layer of the iDOO Air Mattress, showing water beads on the surface, indicating its water-resistant properties.

TROUBLESHOOTING

Mattress Losing Air

- **Initial Stretch:** New PVC material can stretch during the first few inflations, causing it to feel softer. This is normal; simply add more air to reach desired firmness.
- **Valve Seal:** Ensure the inflation/deflation valve is securely closed and turned to the "Off" position after inflation.
- **Punctures:** Inspect the mattress surface for any small holes or punctures. Use the included repair

patches to seal them.

- **Pump Connection:** Verify the power cord is fully inserted into the pump and the outlet.

Pump Not Working

- **Power Supply:** Check if the power outlet is functional.
- **Overheating:** The pump may automatically shut off if overheated. Allow it to cool down before attempting to use it again.
- **Obstructions:** Ensure there are no obstructions in the pump's air intake or exhaust vents.

SPECIFICATIONS

Feature	Detail
Size	Queen
Brand	iDOO
Color	Grey
Product Dimensions	80"L x 60"W x 18"Th
Material	Eco-friendly PVC material
Maximum Recommended Load	650 Pounds
Pump Type	Built-in electric dual air pump (110V)
Inflation Time	Approx. 2-3 minutes
Special Features	Repair Patches included, Integrated rope storage, Storage bag, Waterproof top, non-slip bottom, stain resistant colors, durable material
Included Components	User Guide, Carry Bag, Repair Patch, Queen Air Mattress With Built In Pump
