Setup and Installation

1. **Speaker Placement:** Place the active speaker (with controls and inputs) on one side and the passive speaker on the other. For optimal stereo imaging, position them at an equal distance from your listening position, forming an equilateral triangle. Ensure they are on a stable, flat surface.
2. **Connecting the Speakers:** Use the provided speaker connecting cable to link the active speaker to the passive speaker. Connect the red terminal on the active speaker to the red terminal on the passive speaker, and the black terminal to the black terminal.
3. **Power Connection:** Connect the power adapter to the DC IN port on the back of the active speaker, then plug the adapter into a wall outlet.
