Aqara Hub M1S Gen 2

Aqara Hub M1S Gen 2 Smart Home Bridge User Manual

Model: Hub M1S Gen 2

1. Introduction

The Aqara Hub M1S Gen 2 is a central control unit for your smart home ecosystem. It connects Aqara Zigbee devices, enabling remote monitoring, control, and home automation. This hub supports various smart home platforms, including Apple HomeKit, Google Assistant, Amazon Alexa, and IFTTT, providing a versatile solution for managing your smart devices.
Key features include a built-in speaker for alarms and doorbells, an RGB light with an illumination sensor for customizable lighting and automation, and enhanced Wi-Fi connectivity with WPA3 support for improved security.

2. Setup Guide

2.1 Package Contents

- Aqara Hub M1S Gen 2

2.2 System Requirements

- A secure 2.4 GHz Wi-Fi network is required.
- When using dual-band Wi-Fi, temporarily disable the 5 GHz band during setup.
- Wi-Fi 6 networks are not supported.
- The Aqara Home app (available on iOS and Android).

2.3 Installation Steps

1. **Power On:** Plug the Aqara Hub M1S Gen 2 into a standard wall outlet. The hub will power on and indicate its status.
2. **Download Aqara Home App:** Download and install the Aqara Home app from your device's app store.
3. **Add Device:** Open the Aqara Home app, navigate to the 'Devices' section, and tap the '+' icon to add a

new device. Select 'Hub M1S Gen 2' from the list.

4. **Network Connection:** Follow the in-app instructions to connect the hub to your 2.4 GHz Wi-Fi network. Ensure the hub is within 400 inches (approximately 33 feet) of your Wi-Fi router. Both the hub and your router must be on the same local area network (LAN).
5. **HomeKit Integration (Optional):** If integrating with Apple HomeKit, ensure your Apple Home hub (e.g., HomePod, Apple TV, iPad) and your phone are on the same LAN. Follow the HomeKit pairing instructions within the Aqara Home app.
6. **Pairing Child Devices:** Once the hub is connected, you can begin pairing Aqara Zigbee child devices. The Hub M1S Gen 2 can link with up to 128 Aqara devices. For larger networks, Aqara Zigbee repeaters (such as Aqara Smart Plug or Aqara Smart Wall Switch with Neutral) may be required to extend the network range and device capacity.

Image: The Aqara Hub M1S Gen 2 acts as a wireless control center, enabling various smart home functions.

3. Operating Instructions

3.1 Smart Home Control

- **Aqara Home App:** Use the Aqara Home app to manage all connected Aqara devices. You can set schedules, timers, and create custom automation scenes based on sensor triggers or time.
- **Remote Control:** Control your connected lights and appliances from your smartphone, even when you are away from home.
- **Voice Control:** Integrate the hub with voice assistants like Apple HomeKit, Google Assistant, and Amazon Alexa to control devices using voice commands.

3.2 Security Features

The Hub M1S Gen 2 enhances home security with its integrated features:

- **Built-in Speaker:** The 2-watt speaker can function as an alarm siren for security alerts or as a doorbell chime. You can upload personalized ringtones for custom notifications.
- **Aqara Alert System:** The hub supports all four HomeKit alarm modes, allowing for comprehensive security system integration.

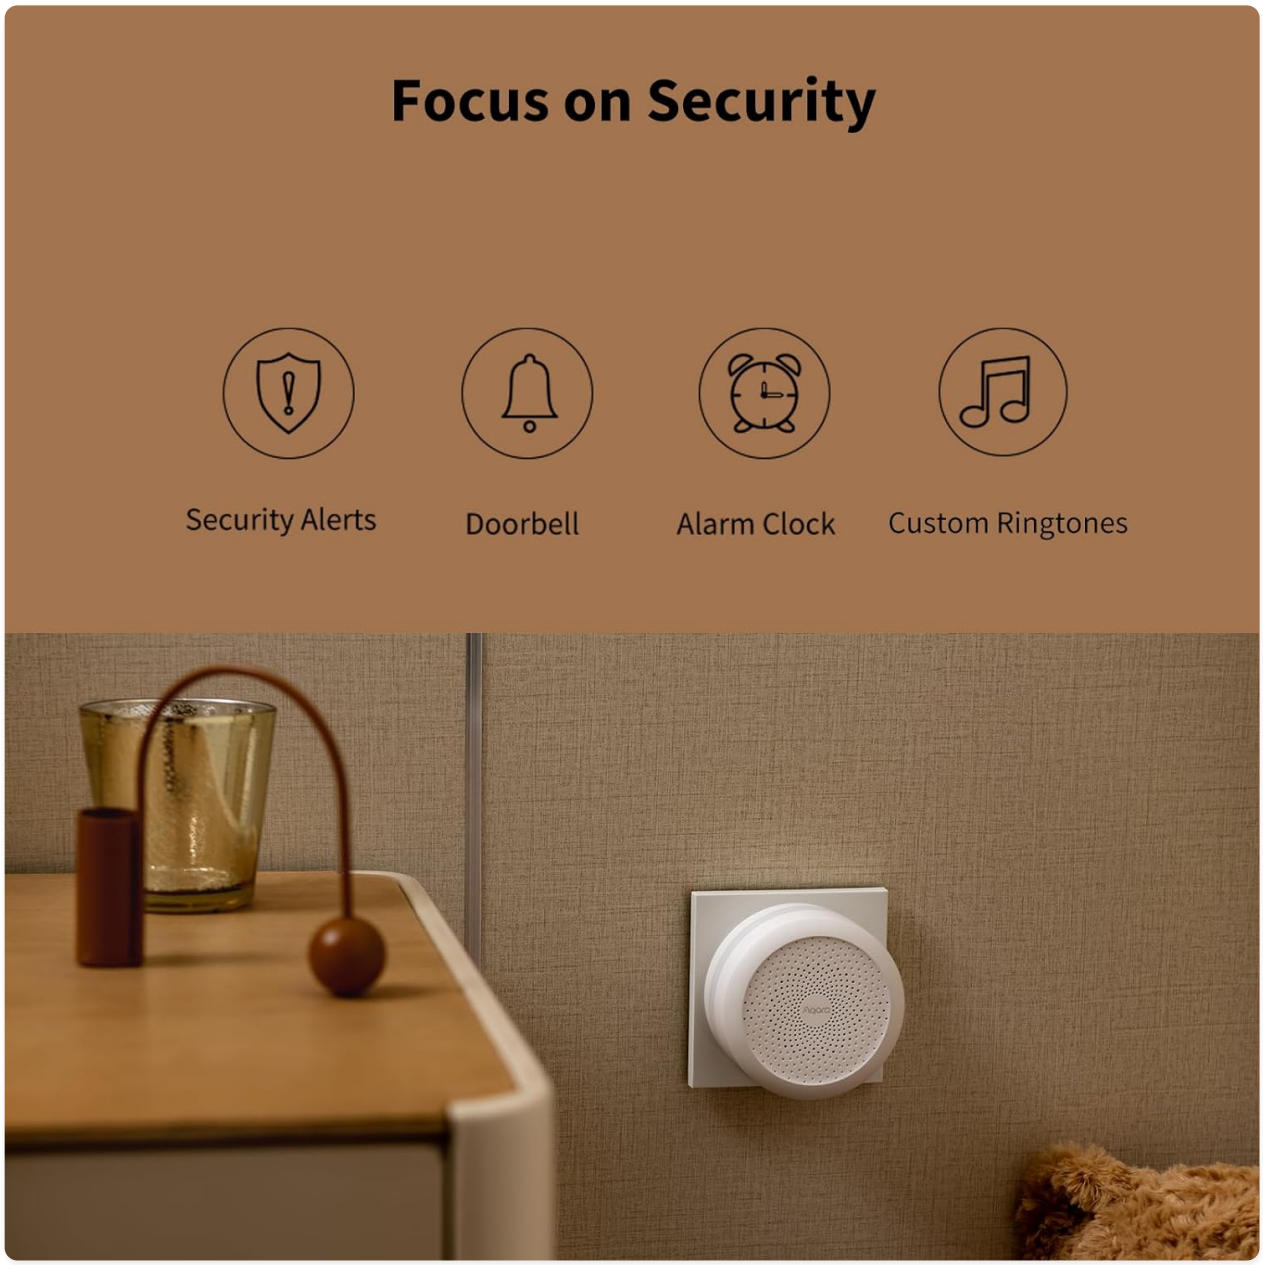

Image: The Aqara Hub M1S Gen 2 offers various security and alert functions.

3.3 RGB Light and Illumination Sensor

The M1S Gen 2 features a built-in RGB light with 18 powerful LEDs and a diffuser, along with a fully functional illumination sensor.

- **Versatile Lighting:** Use the RGB light as an alarm indicator, accent lighting, or a night light. Brightness and color are fully configurable through the Aqara Home app.
- **Automation Trigger:** The illumination sensor can be used in automations within the Aqara Home app, allowing for light-sensitive routines (e.g., turning on lights when it gets dark).

Image: The Aqara Hub M1S Gen 2 features an RGB light and illumination sensor.

3.4 Compatibility

The Aqara Hub M1S Gen 2 ensures compatibility with a wide range of smart home ecosystems and voice assistants:

- Apple HomeKit
- Google Assistant
- Amazon Alexa
- IFTTT

Note: Not all Aqara child devices are universally compatible with all platforms. Refer to specific device details

for full compatibility information.

Image: The Aqara Hub M1S Gen 2 offers wide compatibility with major smart home platforms.

4. Maintenance

To ensure optimal performance and longevity of your Aqara Hub M1S Gen 2, follow these general maintenance guidelines:

- **Cleaning:** Gently wipe the device with a soft, dry cloth. Do not use liquid cleaners or aerosol sprays.
- **Placement:** Ensure the hub is placed in a well-ventilated area, away from direct sunlight, excessive heat, or moisture. The perforated base is designed for consistent airflow.
- **Firmware Updates:** Regularly check for and install firmware updates through the Aqara Home app to benefit from new features, improvements, and security enhancements.

5. Troubleshooting

If you encounter issues with your Aqara Hub M1S Gen 2, refer to the following common problems and solutions:

- **Hub not connecting to Wi-Fi:**
  - Ensure your Wi-Fi network is 2.4 GHz. The hub does not support 5 GHz Wi-Fi or Wi-Fi 6.
  - Temporarily disable the 5 GHz band on your router if you have a dual-band network during setup.
  - Verify the hub is within approximately 33 feet (400 inches) of your Wi-Fi router.
  - Confirm that the hub and your smartphone are connected to the same local area network (LAN) during setup.
- **Aqara devices not pairing or losing connection:**
  - Ensure the child devices are within range of the hub.
  - If you have many devices (over 128), consider adding Aqara Zigbee repeaters to extend the network.
  - The hub only supports Aqara Zigbee devices. Third-party Zigbee devices are not supported.
- **HomeKit integration issues:**
  - Ensure your Apple Home hub (e.g., HomePod, Apple TV, iPad) and your phone are on the same LAN as the Aqara Hub.
  - Verify that your HomeKit setup is up-to-date and functioning correctly.
- **Zigbee2MQTT or third-party USB dongles:**
  - Zigbee2MQTT and comparable third-party USB dongles are not officially supported by Aqara. Full product functionality may be limited or unavailable when using these.
- **Hub unresponsive:**
  - Unplug the hub from the power outlet, wait for 10 seconds, and then plug it back in to restart it.
  - Check your Wi-Fi router to ensure it is functioning correctly.

If problems persist after attempting these solutions, please contact Aqara customer support for further assistance.

6. Specifications

Feature	Detail
Brand	Aqara
Model Number	Hub M1S Gen 2 (HM1S-G01)
Dimensions (L x W x H)	3.15 x 3.15 x 1.63 inches
Item Weight	6.4 ounces (0.18 Kilograms)
Color	White
Power Source	Corded Electric
Voltage	5 Volts
Connectivity Technology	Wireless (2.4 GHz Wi-Fi, Zigbee 3.0)
Sensor Technology	Zigbee

Compatible Devices	Apple HomeKit, Google Assistant, Amazon Alexa, IFTTT, Aqara Zigbee devices
Maximum Range	33 Feet (Wi-Fi)
Included Components	Hub M1S Gen 2
UPC	192784000588

7. Warranty Information

Specific warranty details for the Aqara Hub M1S Gen 2 are typically provided with the product packaging or on the official Aqara website. Please refer to these sources for the most accurate and up-to-date warranty terms and conditions. For any warranty claims or inquiries, retain your proof of purchase.

8. Customer Support

For technical assistance, troubleshooting, or any questions regarding your Aqara Hub M1S Gen 2, please contact Aqara customer support.
You can find support resources and contact information on the official Aqara website or through the Aqara Home app.
Visit the official Aqara Store for more product information and accessories.

How do I choose the Aqara Hub M1S Gen 2 installation location?

1. It is recommended that the hub be installed at the center area of the accessories to ensure that the hub and all accessories can communicate steadily. If the distance between the accessories and the hub is too far apart, the accessories may appear to be offline. In this case, please add another hub and connect the accessories to the newly installed hub.

2. The hub should not be too far away from the router whenever possible. In order to ensure stable Wi-Fi communication, a straight-line distance of 2 to 6 meters (6 to 19 feet) is the most optimal.

3. To ensure that the hub's signal can reach longer distances, it is recommended that the hub be installed no less than 1 meter (3 feet) from the ground.

Test Verification of Conformity

Verification Number: 220200836SHA-V1

On the basis of the referenced test report(s), sample(s) tested of the below product have been found to comply with the standards harmonized with the directives listed on this verification at the time the tests were carried out. Other standards and Directives may be relevant to the product. This verification is part of the full test report(s) and should be read in conjunction with it <Item>.

Once compliance with all product relevant CE mark directives are verified, including any relevant e.g. risk assessment and production control, the manufacturer may indicate compliance by signing a Declaration of Conformity themselves and applying the mark to products identical to the tested sample(s).
