FMA TB948

FMA TB948 Airsoft Tactical Helmet Suspension Chin Extender Buckle Strap User Manual

PRODUCT OVERVIEW

The FMA TB948 is a helmet suspension chin extender buckle strap designed to provide additional length for helmet chin straps. It is suitable for users who require an extended fit due to face length or specific helmet configurations. This accessory enhances comfort and securement for compatible helmets.

Material: Ribbon + Nylon Buckle

Length: 125mm

Color: Black (BK)

Compatibility Note: Please confirm the model and size of the buckle before purchasing to ensure compatibility with your existing helmet system.

PACKAGE CONTENTS

- 1 x FMA TB948 Helmet Suspension Chin Extender Buckle Strap

SETUP AND INSTALLATION

This section details the steps for installing the FMA TB948 chin extender onto a compatible helmet chin strap system.

Step 1: Identify Attachment Points

Locate the existing buckle system on your helmet's chin strap. The FMA TB948 extender is designed to integrate with standard buckle types. Ensure your helmet's chin strap has a compatible female buckle end to connect with the male end of the extender, and a male buckle end to connect with the female end of the extender.

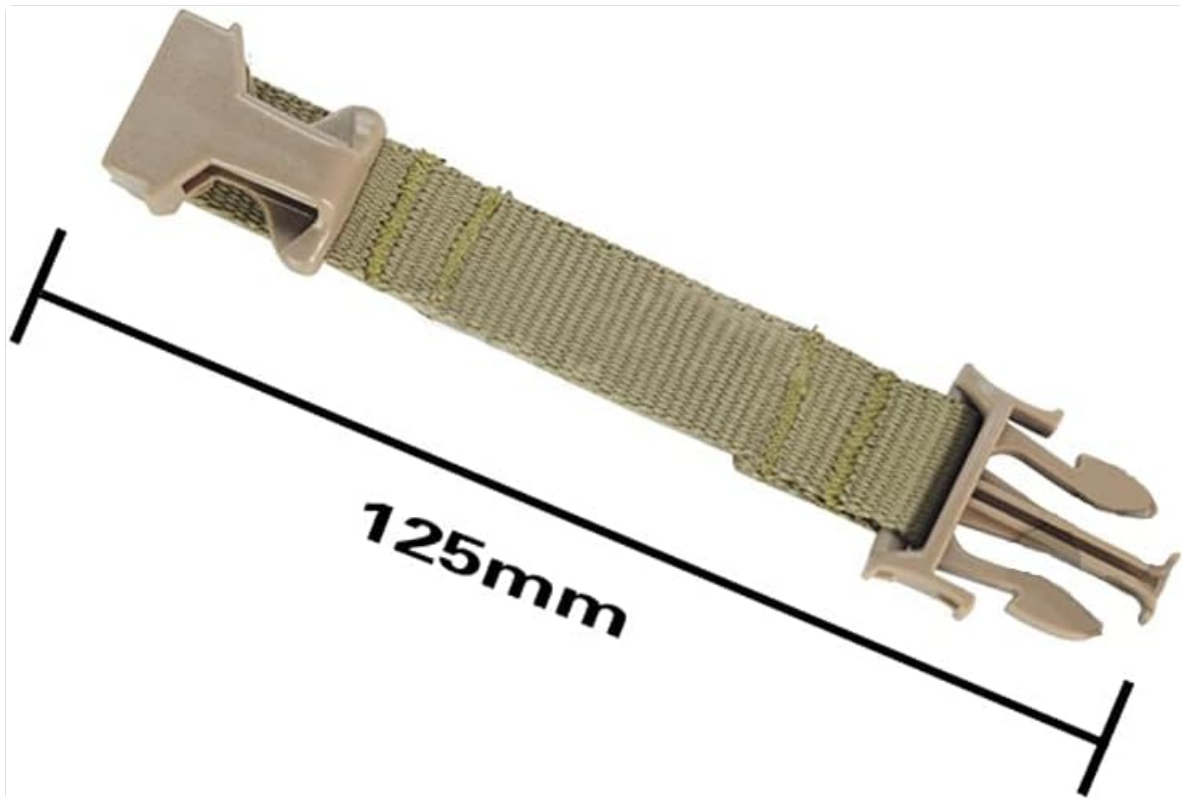

Image showing the FMA TB948 chin extender strap with its overall length of 125mm indicated. This illustrates the product's dimensions and components.

Step 2: Connect the Extender

Take one end of the FMA TB948 extender and securely click it into the corresponding buckle on your helmet's chin strap. Ensure a firm connection. Repeat for the other end of the extender, connecting it to the remaining part of your helmet's chin strap.

This image displays the FMA TB948 chin extender buckle strap properly installed within a helmet's suspension system,

demonstrating how it integrates with the existing chin strap for an extended fit.

Step 3: Verify Connection

After connecting both ends, gently pull on the strap to ensure all buckles are securely fastened and will not detach during use. The strap should feel firm and integrated with the helmet's existing chin strap system.

OPERATING INSTRUCTIONS

Once installed, the FMA TB948 chin extender operates as a seamless extension of your helmet's chin strap. No special operating procedures are required beyond the normal use of your helmet's chin strap.

- **Adjusting Fit:** Use the existing adjustment mechanisms on your helmet's chin strap to achieve a comfortable and secure fit. The extender provides additional length but does not alter the adjustment method.
- **Secure Fastening:** Always ensure the chin strap, including the extender, is properly fastened and snug before wearing the helmet for any activity.

MAINTENANCE AND CARE

Proper maintenance ensures the longevity and reliable performance of your FMA TB948 chin extender.

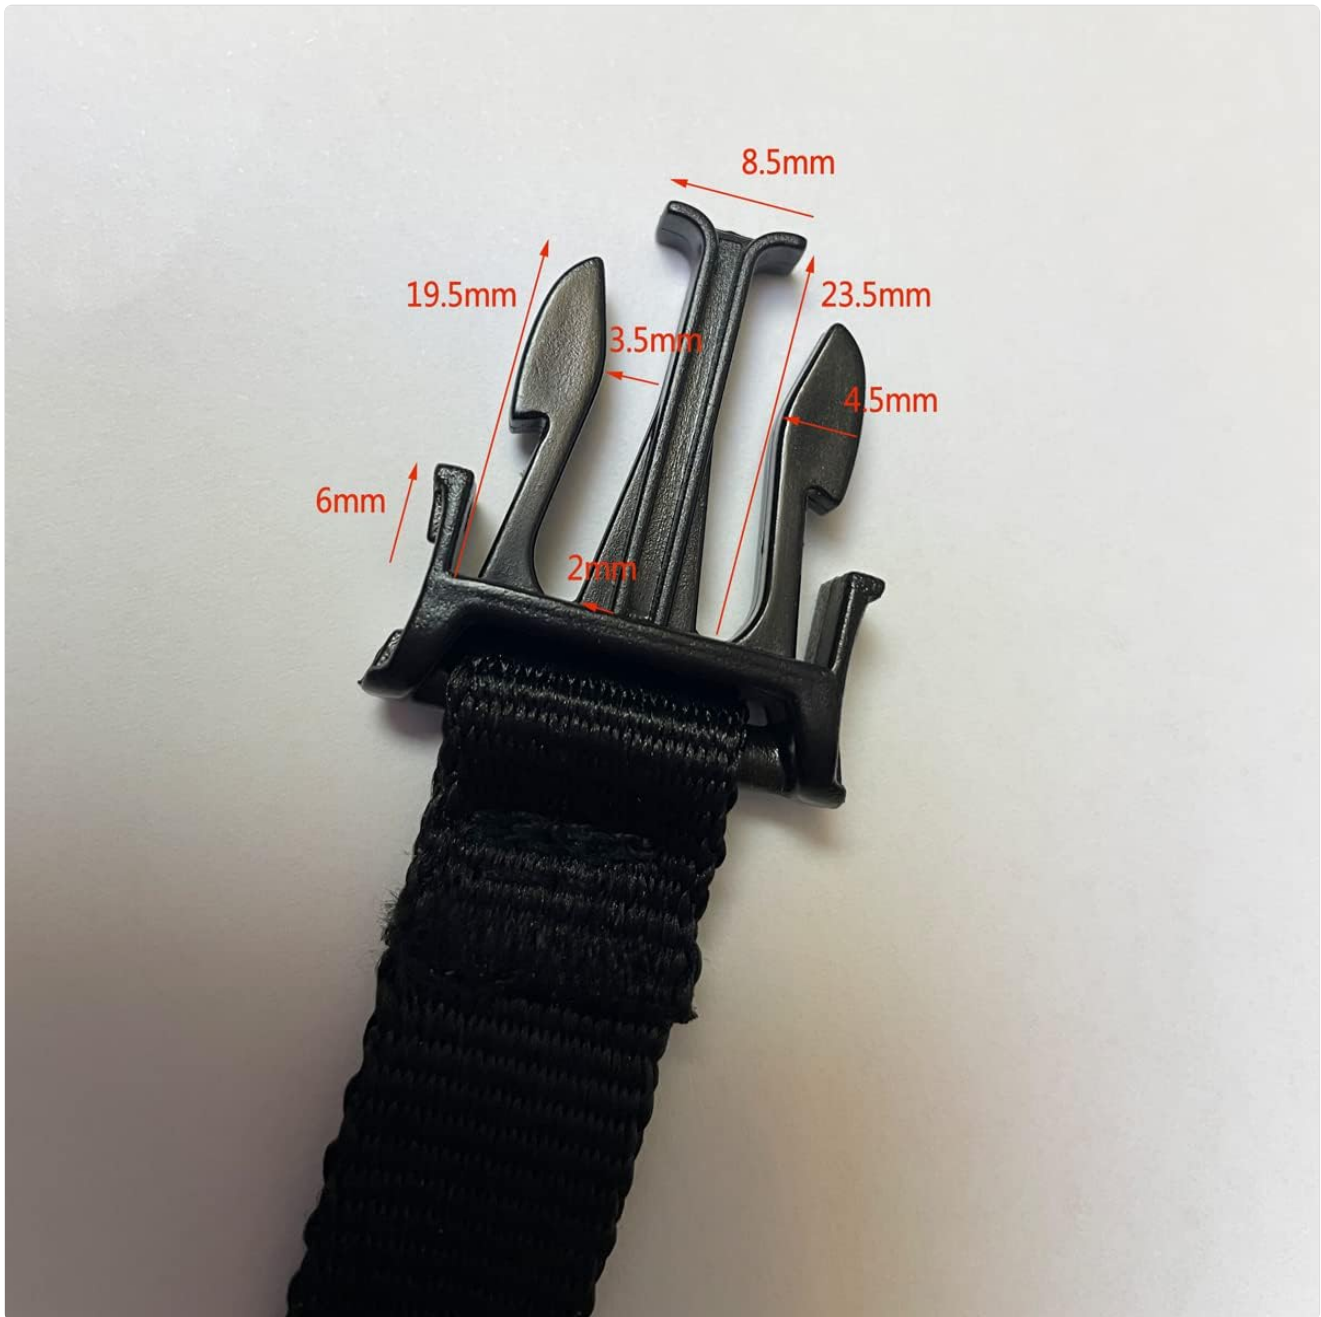

- **Cleaning:** Clean the strap and buckles with a damp cloth and mild soap. Avoid harsh chemicals or abrasive materials that could damage the nylon webbing or plastic buckles.
- **Inspection:** Regularly inspect the strap for any signs of wear, fraying, cuts, or damage to the buckles. Discontinue use if any significant damage is observed.
- **Storage:** Store the extender in a cool, dry place away from direct sunlight and extreme temperatures when not in use.

TROUBLESHOOTING

This section addresses common issues you might encounter with the FMA TB948 chin extender.

Problem	Possible Cause	Solution
Extender does not fit helmet buckle.	Incompatibility with helmet buckle type or size.	Verify the dimensions and type of your helmet's buckle against the extender's specifications (e.g., 19.5mm, 8.5mm, 6mm, 2mm, 23.5mm, 3.5mm as shown in image). Ensure the extender's male and female ends match your helmet's corresponding buckle parts.
Buckle feels loose or detaches easily.	Improper connection or damaged buckle.	Ensure the buckle is fully engaged and clicks into place. Inspect the buckle for cracks or deformities. If damaged, replace the extender.

Problem	Possible Cause	Solution
Strap shows signs of wear or fraying.	Normal wear and tear or abrasive contact.	Regularly inspect the strap. If wear is significant and compromises integrity, replace the extender to maintain safety.

This image provides detailed measurements of the buckle components of the FMA TB948 chin extender, including dimensions like 19.5mm, 8.5mm, 6mm, 2mm, 23.5mm, and 3.5mm. This information is crucial for verifying compatibility with existing helmet systems.
