## SYBO SF-CB-1AA

# SYBO SF-CB-1AA Commercial 12-Cup Drip Coffee Maker Instruction Manual

Model: SF-CB-1AA

## 1. INTRODUCTION

Thank you for choosing the SYBO SF-CB-1AA Commercial 12-Cup Drip Coffee Maker. This appliance is designed for efficient and consistent coffee brewing, ideal for commercial settings or large households. Please read this manual thoroughly before operating the coffee maker to ensure safe and optimal performance. Keep this manual for future reference.

## 2. IMPORTANT SAFETY INSTRUCTIONS

- Read all instructions before using the appliance.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against fire, electric shock, and injury to persons, do not immerse cord, plugs, or appliance in water or other liquid.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair, or adjustment.
- The use of accessory attachments not recommended by the appliance manufacturer may result in fire, electric shock, or injury to persons.
- Do not use outdoors.
- Do not let cord hang over edge of table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, turn any control to "off," then remove plug from wall outlet.

- Do not use appliance for other than intended use.
- The thermal carafe is designed for use with this appliance only. It must never be used on a range top.
- Do not place a hot carafe on a cold or wet surface.
- Do not use a cracked carafe or a carafe having a loose or weakened handle.
- Do not clean carafe with cleansers, steel wool pads, or other abrasive material.
- Ensure the thermal carafe is correctly positioned before brewing to prevent overflow.

### 3. PRODUCT OVERVIEW

---

The SYBO SF-CB-1AA coffee maker features a durable stainless steel construction and a 74 oz (12-cup) thermal carafe designed to keep your coffee hot for extended periods. Its simple, user-friendly design ensures efficient operation.

## SYBO vacuum insulation technology locks the temperature you want

12 hours  
hot preservation

24 hours  
cold preservation

Figure 3.3: User-friendly thermal carafe with press-button pour spout and non-slip base.

## User Friendly Coffee Pot

Figure 3.4: Multi-stream spray head ensures even hot water distribution over coffee grounds for optimal flavor.

## 4. SETUP

1. **Unpack the Coffee Maker:** Carefully remove all packaging materials and ensure all components are present: the coffee maker unit, thermal carafe, and filter basket.
2. **Clean Components:** Before first use, wash the thermal carafe, filter basket, and lid in warm, soapy water. Rinse thoroughly and dry. Wipe the exterior of the coffee maker with a damp cloth.
3. **Position the Coffee Maker:** Place the coffee maker on a flat, stable, heat-resistant surface, away from the edge of the counter. Ensure there is adequate clearance above the unit for opening the water reservoir lid.
4. **Initial Rinse Cycle:** Fill the water reservoir with cold water up to the 12-cup mark. Place an empty filter paper in the filter basket and position the thermal carafe on the warming plate. Turn on the coffee maker and allow a full cycle of water to run through without coffee grounds. Discard the water. This cleans the internal components and removes any manufacturing residues.

## 5. OPERATING INSTRUCTIONS

Follow these steps for brewing coffee with your SYBO SF-CB-1AA coffee maker:

1. **Prepare the Filter Basket:** Place a #4 flat-bottom paper filter into the filter basket.
2. **Add Coffee Grounds:** Add your desired amount of ground coffee into the filter. A general guideline is 1-2 tablespoons of coffee per cup (5-6 oz) of water, adjusting to personal preference.
3. **Position Filter Basket:** Slide the filter basket securely into its position under the multi-stream spray head.
4. **Fill Water Reservoir:** Open the lid of the water reservoir. Fill the thermal carafe with fresh, cold water to the desired number of cups (up to 12 cups / 74 oz). Pour the water into the reservoir. Close the reservoir lid.
5. **Place Thermal Carafe:** Ensure the thermal carafe is empty and its lid is removed. Place the thermal carafe securely on the base plate beneath the filter basket. The carafe's design ensures it is correctly positioned to receive brewed coffee.
6. **Start Brewing:** Plug the coffee maker into a standard 120V AC outlet. Press the ON/OFF switch to the 'ON' position. The 'Brewing' indicator light will illuminate.
7. **Monitor Brewing:** The coffee maker will begin brewing. The multi-stream spray head will evenly distribute hot water over the coffee grounds. Brewing a full 12-cup carafe takes approximately 10 minutes.
8. **After Brewing:** Once brewing is complete, the 'Brewing' indicator light will turn off. Carefully remove the thermal carafe, attach its lid, and serve. The vacuum insulation will keep coffee hot for up to 12 hours.

## 6. CLEANING AND MAINTENANCE

---

Regular cleaning and maintenance will ensure the longevity and optimal performance of your SYBO coffee maker.

### 1. Daily Cleaning:

- After each use, discard the used coffee filter and grounds.
- Wash the filter basket and thermal carafe (including its lid) in warm, soapy water. Rinse thoroughly and dry. The carafe is not dishwasher safe.
- Wipe the exterior of the coffee maker with a damp cloth. Do not use abrasive cleaners or scouring pads.

## 2. Descaling (Monthly or as needed):

- Mineral deposits from water can build up over time and affect performance. To descale, fill the water reservoir with a mixture of one part white vinegar and two parts water.
- Place an empty paper filter in the filter basket and the empty thermal carafe on the base.
- Run a full brewing cycle with the vinegar solution.
- After the cycle, discard the solution and run two full cycles with fresh, clean water to rinse thoroughly.

3. **Storage:** Ensure the coffee maker is clean and dry before storing. Store in a cool, dry place.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Coffee does not brew.	Power cord unplugged; ON/OFF switch not activated.	Ensure power cord is securely plugged in; press ON/OFF switch to 'ON'.
Coffee brews too slowly.	Mineral buildup in the coffee maker; coffee grounds too fine.	Descal the coffee maker (see Cleaning and Maintenance); use a coarser grind of coffee.
Coffee overflows from filter basket.	Too much coffee grounds; filter not properly seated; carafe not properly placed.	Reduce amount of coffee grounds; ensure filter is correctly seated; ensure thermal carafe is centered on the base.
Coffee is not hot enough.	Thermal carafe lid not sealed properly.	Ensure the thermal carafe lid is securely twisted on after brewing.

## 8. SPECIFICATIONS

- **Brand:** SYBO
- **Model Name:** SF-CB-1AA
- **Color:** Stainless
- **Capacity:** 12 Cups (74 oz)
- **Product Dimensions:** 13.9"D x 8.2"W x 21.65"H
- **Special Feature:** Manual operation, Thermal Carafe
- **Coffee Maker Type:** Pour Over, Drip
- **Included Components:** Coffee Maker Unit, Thermal Carafe
- **Operation Mode:** Fully Automatic
- **Voltage:** 120.0V
- **Coffee Filter Size:** #4
- **Coffee Input Type:** Ground
- **Is Dishwasher Safe:** No (Carafe)
- **Item Weight:** 15 pounds
- **UPC:** 850027078007
