Important: If your phone model is not listed, measure the length from the camera hole to the charging hole of your phone case. Choose size 200 for 11cm or less, size 210 for 11-12cm, and size 230 for 12-14cm. Not usable if phone length is more than 14cm.

5. SETUP & INSTALLATION

Follow these steps to properly install your Sinji Loop Clip:

- Clean the Surface:** Ensure the inside surface of your phone case is clean and dry. Use an alcohol wipe if necessary, then air dry.
- Position the Strap:** Place the silicone strap inside your phone case, aligning the C-shaped clips with the charging port opening and the camera cutout.
- Secure the Clips:** Gently push the C-shaped clips through the charging port opening and the camera cutout until they are securely fastened to the edges of the case.
- Insert Phone:** Carefully place your phone back into the case, ensuring the strap lies flat against the back of the phone.

6. OPERATING INSTRUCTIONS

Once installed, the Sinji Loop Clip offers enhanced usability for your smartphone.

Secure Hand Grip

Slide one or two fingers through the silicone loop to secure your phone. This allows for a comfortable and firm grip, reducing the chance of accidental drops, especially when multitasking or using your phone in crowded environments.

Hands-Free Viewing

The flexible nature of the silicone strap allows it to act as a makeshift stand. By adjusting the position of your fingers or resting the phone on a surface, you can prop up your device for hands-free viewing in both portrait and landscape orientations.

Wireless Charging Compatibility

The ultra-thin design (0.9mm thick) of the Sinji Loop Clip ensures that it does not interfere with most wireless charging pads. You can charge your phone wirelessly without needing to remove the grip.

7. MAINTENANCE & CARE

To maintain the longevity and cleanliness of your Sinji Loop Clip:

- Wipe the silicone strap with a soft, damp cloth to remove dust and smudges.
- Avoid using harsh chemicals or abrasive cleaners, as these may damage the silicone material or its anti-dust coating.
- If the strap becomes loose over time, ensure the C-clips are still firmly attached to the phone case openings.

8. TROUBLESHOOTING

If you encounter any issues with your Sinji Loop Clip, consider the following:

- **Strap feels loose:** Ensure the C-shaped clips are fully inserted and secured into the phone case openings. The strap is designed to be reusable, but repeated removal and reattachment may affect its initial tension.
- **Interference with wireless charging:** While designed to be compatible, some specific wireless chargers or phone case designs might cause minor issues. Ensure the strap is positioned as flat as possible against the phone back.
- **Difficulty fitting into pockets:** The Sinji Loop Clip is designed for a slim profile. If it feels bulky, ensure it is correctly installed and not twisted.
