YATTICH YT

YATTICH Paint Sprayer 1000ml Container User Manual

Models: YT-191, YT-201, YT-201-A Compatible Containers

1. Introduction

Thank you for choosing YATTICH 1000ml Paint Sprayer Containers. These containers are designed to be fully compatible with various YATTICH paint sprayer models, including YT-191, YT-201, and YT-201-A. They provide a convenient solution for storing and using paint with your sprayer, offering excellent tightness to preserve paint and facilitate color changes.

2. Product Overview

The YATTICH 1000ml Paint Sprayer Containers are essential accessories for your painting projects. Each pack includes two 1000ml containers and two corresponding lids, ensuring you have ample capacity and secure storage.

- **Quantity:** Includes 2 containers and 2 lids.
- **Capacity:** Each container holds 1000ml of paint.
- **Material:** Constructed from durable and safe polypropylene plastic, designed for strength and longevity.
- **Tightness:** Equipped with lids to create an airtight seal, preventing paint from curing and allowing for long-term storage of unused paint.
- **Compatibility:** Specifically designed for YATTICH paint sprayer models YT-191, YT-201, and YT-201-A.

Image 1: YATTICH 1000ml Paint Sprayer Containers with Lids. These containers are made from durable polypropylene plastic and are designed for secure paint storage and easy attachment to compatible YATTICH paint sprayers.

3. Setup

1. **Unpack:** Carefully remove the containers and lids from their packaging. Inspect for any damage.
2. **Initial Cleaning:** Before first use, it is recommended to rinse the containers and lids with water to remove any manufacturing residue. Ensure they are completely dry before adding paint.
3. **Prepare Paint:** Mix your paint according to the paint manufacturer's instructions and the specific requirements of your YATTICH paint sprayer. Ensure the paint is properly thinned and strained if necessary to prevent clogging.
4. **Fill Container:** Pour the prepared paint into the container. Do not overfill; leave some space for air to prevent spills when attaching to the sprayer.
5. **Attach to Sprayer:** Securely screw the filled container onto the base of your compatible YATTICH paint sprayer (e.g., YT-191, YT-201, YT-201-A). Ensure a tight fit to prevent leaks during operation.

4. Operating Instructions

These containers are designed for seamless integration with your YATTICH paint sprayer. Follow these guidelines for optimal use:

- **Secure Attachment:** Always ensure the container is firmly attached to the paint sprayer before beginning any spraying operation.
- **Lid Usage:** When not actively spraying or when storing paint, use the provided lid to seal the container. This prevents paint from drying out and keeps contaminants out.
- **Paint Storage:** The airtight lids allow for the storage of leftover paint directly in the container. This is particularly useful when switching between colors or pausing a project.
- **Monitoring Paint Level:** Periodically check the paint level in the container during use to avoid running out mid-spray, which can affect spray pattern and finish.

5. Maintenance

Proper maintenance of your paint containers will extend their lifespan and ensure consistent performance.

1. **Cleaning After Use:** Immediately after each use, empty any remaining paint (if not storing) and thoroughly clean the container and lid. Use appropriate cleaning solutions based on the type of paint (e.g., water for latex, mineral spirits for oil-based).
2. **Rinsing:** Rinse all components thoroughly to remove all paint residue. Ensure no paint dries inside the container or on the lid's sealing surfaces.
3. **Drying:** Allow the containers and lids to air dry completely before reassembling or storing. Moisture can lead to paint adhesion issues or mold growth.
4. **Storage:** Store clean, dry containers and lids in a cool, dry place away from direct sunlight and extreme temperatures.

6. Troubleshooting

If you encounter issues with your paint containers, consider the following:

- **Paint Curing in Container:**
  - Ensure the lid is securely and tightly closed when storing paint.
  - Verify the lid's seal is clean and free of dried paint or debris.
  - Store paint in a cool, dark place.
- **Leaking from Container:**
  - Check that the container is screwed onto the sprayer base tightly and correctly.
  - Inspect the container and sprayer connection point for any cracks or damage.
  - Ensure the container's rim and the sprayer's mating surface are clean and free of dried paint.
- **Difficulty Attaching/Detaching:**
  - Ensure threads on both the container and sprayer are clean and undamaged.
  - Do not overtighten; hand-tight is usually sufficient.

7. Specifications

Brand	YATTICH
Tank Volume	1000 Milliliters
Material	Polypropylene (PP)
Color	Black, White
Compatible Models	YATTICH YT-191, YT-201, YT-201-A
